The Crises of the Christ George Campbell Morgan,1903 American Brewers' Review ,1915 **The Concept of 'God'** Vinoth,2018-02-02 God the supernatural being the perfect the omnipotent and the omniscient originator and ruler of the universe is the object of worship in almost all religions across the world Usually people understand God through the religions they're born in This way they get to learn how and why their Gods created reality and put them in it But is this the only possible way to understand the entity What if one takes an alternate route to understand God What if one first understands the reality God created the reality that everything and everyone's a part of and then identifies the entity itself Reality includes everything around and inside it and inevitably includes us Understanding the reality requires a metaphysical analysis of life and the universe and metaphysics reaches an incredibly new level if the knowledge of the Western sciences is merged with the everlasting ideas of the Eastern spiritual philosophies With multiple perspectives making the reader constantly inquisitive The Concept of God merges the knowledge of science and spirituality to understand the nature of life and reality and then finds out who the all powerful God is Facing Climate Change Jeffrey T. Kiehl,2016-03-01 Facing Climate Change explains why people refuse to accept evidence of a warming planet and shows how to move past partisanship to reach a consensus for action A climate scientist and licensed Jungian analyst Jeffrey T Kiehl examines the psychological phenomena that twist our relationship to the natural world and their role in shaping the cultural beliefs that distance us further from nature He also accounts for the emotions triggered by the lived experience of climate change and the feelings of fear and loss they inspire which lead us to deny the reality of our warming planet But it is not too late By evaluating our way

of being Kiehl unleashes a potential human emotional understanding that can reform our behavior and help protect the Earth Kiehl dives deep into the human brain s psychological structures and human spirituality s imaginative power mining promising resources for creating a healthier connection to the environment and one another Facing Climate Change is as concerned with repairing our social and political fractures as it is with reestablishing our ties to the world teaching us to push past partisanship and unite around the shared attributes that are key to our survival Kiehl encourages policy makers and activists to appeal to our interdependence as a global society extracting politics from the process and making decisions about our climate future that are substantial and sustaining
