economic flowering of Scotland and argues that a single Law institution had a marked influence on the Scottish Society, 1707-1830 Christopher A. Whatley, 2000 This book challenges conventional wisdom and provides new insights into Scottish social and economic history Christopher A Whatley argues that the Union of 1707 was vital for Scottish success but in ways which have hitherto been overlooked He proposes that the central place of Jacobitism in the historiography of the period should be revised Comprehensive in its coverage the book is based not only on an exhaustive reading of secondary material but also incorporates a wealth of new evidence from previously little used or unused primary sources **The**

Cambridge History of Eighteenth-century Philosophy Knud Haakonssen, 2006 This two volume set presents a comprehensive and up to date history of eighteenth century philosophy The subject is treated systematically by topic not by individual thinker school or movement thus enabling a much more historically nuanced picture of the period to be painted

The Language of Mineralogy Matthew D. Eddy, 2016-12-05 Classification is an important part of science yet the specific methods used to construct Enlightenment systems of natural history have proven to be the *black box* of studies of eighteenth century culture One reason that systematic classification has received so little attention is that natural history was an extremely diverse subject which appealed to a wide range of practitioners including wealthy patrons professionals and educators In order to show how the classification practices of a defined institutional setting enabled naturalists to create systems of natural history this book focuses on developments at Edinburgh's medical school one of Europe's leading medical programs In particular it concentrates on one of Scotland's most influential Enlightenment naturalists Rev Dr John Walker the professor of natural history at the school from 1779 to 1803 Walker was a traveller cleric author and advisor to extremely powerful aristocratic and government patrons as well as teacher to hundreds of students some of whom would go on to become influential industrialists scientists physicians and politicians This book explains how Walker used his networks of patrons and early training in chemistry to become an eighteenth century naturalist Walker's mineralogy was based firmly in chemistry an approach common in Edinburgh's medical school but a connection that has been generally overlooked in the history of British geology By explicitly connecting eighteenth century geology to the chemistry being taught in medical settings this book offers a dynamic new interpretation of the nascent earth sciences as they were practiced in Enlightenment Britain Because of Walker's influence on his many students the book also provides a unique insight into how many of Britain's leading Regency and Victorian intellectuals were taught to think about the composition and structure of the material world

Money in the Western Legal Tradition David Fox, Wolfgang Ernst, 2016-01-28 Monetary law is essential to the functioning of private transactions and international dealings by the state nearly every legal transaction has a monetary aspect Money in the Western Legal Tradition presents the first comprehensive analysis of Western monetary law covering the civil law and Anglo American common law legal systems from the High Middle Ages up to the middle of the 20th century Weaving a detailed tapestry of the changing concepts of money and private transactions throughout the ages the contributors

investigate the special contribution made by legal scholars and practitioners to our understanding of money and the laws that govern it. Divided in five parts, the book begins with the coin currency of the Middle Ages, moving through the invention of nominalism in the early modern period to cashless payment and the rise of the banking system and paper money, then charting the progression to fiat money in the modern era. Each part commences with an overview of the monetary environment for the historical period, written by an economic historian or numismatist. These are followed by chapters describing the legal doctrines of each period in civil and common law. Each section contains examples of contemporary litigation or statute law which engages with the distinctive issues affecting the monetary law of the period. This interdisciplinary approach reveals the distinctive conception of money prevalent in each period, which either facilitated or hampered the implementation of economic policy and the operation of private transactions.

The Persistence of Party Max Skjönsberg, 2021-01-13

Political parties are taken for granted today, but how was the idea of party viewed in the eighteenth century when core components of modern representative politics were trialled? From Bolingbroke to Burke, political thinkers regarded party as a fundamental concept of politics, especially in the parliamentary system of Great Britain. The paradox of party was best formulated by David Hume, while parties often threatened the total dissolution of the government, they were also the source of life and vigour in modern politics. In the eighteenth century, party was usually understood as a set of flexible and evolving principles associated with names and traditions which categorised and managed political actors, voters and commentators. Max Skjönsberg thus demonstrates that the idea of party as ideological unity is not purely a nineteenth or twentieth century phenomenon but can be traced to the eighteenth century.

Scottish Philosophical Theology David Fergusson, 2012-10-05

This volume concentrates on the period from the beginning of the 18th century to the latter part of the 20th. It is impossible to depict a single school of philosophical theology in Scotland across three centuries, yet several strains have been identified that suggest some recurrent themes or intellectual habits. These include the following: the mutually beneficial cross-fertilisation of the disciplines of philosophy and theology; the tendency to eschew powerful philosophical systems that might threaten to imprison theological ideas; a stress on both the providential limitations and reliability of human reason; a suspicion of reductive theories of a materialist inclination; and a determination to inspect critically the proposals of theology and to place these in positive relation to other disciplines.
