Giotto the Painter. Volume 2: Works Michael Viktor Schwarz, 2023-04-17 The paintings examined and contextualised in this volume are those secured for Giotto through early written sources These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while Giotto was spiritually and intellectually formed in the sphere of the Florentine Dominicans his artistic path began in Rome in the shadow of the Curia The breakthrough to his own artistic concept came immediately before and during his work in Padua In addition to prominent churchmen ecclesiastical institutions and the King of Naples his clients were predominantly members of Italy's urban and financial elites The adoption and further development of his inventions by other especially Sienese painters pressured him in his later years to try new approaches again

Lorenzo Ghiberti's Gates of Paradise Amy R. Bloch, 2016-02-09 This book examines the heretofore unsuspected complexity of Lorenzo Ghiberti's sculpted representations of Old Testament narratives in his Gates of Paradise 1425-52 the second set of doors he made for the Florence Baptistery and a masterpiece of Italian Renaissance sculpture One of the most intellectually engaged and well read artists of his age Ghiberti found inspiration in ancient and medieval texts many of which he and his contacts in Florence's humanist community shared read and discussed He was fascinated by the science of vision by the functioning of nature and above all by the origins and history of art These unusually well defined intellectual interests reflected in his famous Commentaries shaped his approach in the Gates Through the selection imaginative interpretation and arrangement of biblical episodes Ghiberti fashioned multi textured narratives that explore the human condition and express his ideas on a range of social political artistic and philosophical issues

Giotto the Painter. Volume 1-3 Michael Viktor Schwarz, 2023-04-17 Vol 1 Life Giotto 1334 is the first European artist about whom it is possible to write following the schema of life and work The situation of the sources however is complicated On Giotto's life there are on the one hand biographical accounts from the mid fourteenth century onwards that responded to various ideological requirements patriotism humanism Renaissance ideology cult of the artist on the other there is extensive documentary material from Giotto's lifetime which seems to reflect less the biography of an artist than that of a bourgeois businessman resolutely climbing the

social ladder The present volume focuses on this second aspect of the Giotto figure's double life relating it to the form of existence of the pre modern artist Vol 2 Works The paintings examined and contextualised in this volume are those secured for Giotto through early written sources These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while Giotto was spiritually and intellectually formed in the sphere of the Florentine Dominicans his artistic path began in Rome in the shadow of the Curia The breakthrough to his own artistic concept came immediately before and during his work in Padua In addition to prominent churchmen ecclesiastical institutions and the King of Naples his clients were predominantly members of Italy's urban and financial elites The adoption and further development of his inventions by other especially Sienese painters pressured him in his later years to try new approaches again Vol 3 Survival Giotto is considered by many to be the founder of modern painting This thesis is discussed and modified in the present volume on an empirical basis What emerges is that Giotto's impact cannot be reduced simply to the introduction of the study of nature Rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies

role and influence of politics culture and societal norms and technology on the Western church Unbiased details on the major theological controversies and issues of each period **AUTHORS PERSPECTIVE** Authors John D Woodbridge and Frank A James III wrote this history of the church from the perspective that such a history is the story of the greatest movement and community the world has known as imperfect as it still is It s a human story of a divinely called people who want to live by a divine revelation It s a story of how they succeeded and how they failed and of how they are still trying to live out their calling From the Reformation theologians in Europe to the revivalists apologists and Christian thinkers all over the world the historical figures detailed are people who have struggled with the meaning of the greatest event in history the coming of the Son of God and with their role in that event and in the lives of God s people [Art and Architecture in Naples, 1266 - 1713](#) Cordelia Warr,Janis Elliott,2010-05-11 Often overshadowed by the cities of Florence and Rome in art historical literature this volume argues for the importance of Naples as an artistic and cultural centre demonstrating the breadth and wealth of artistic experience within the city Generously illustrated with some illustrations specifically commissioned for this book Questions the traditional definitions of cultural centres which have led to the neglect of Naples as a centre of artistic importance A significant addition to the English language scholarship on art in Naples **Renaissance Vision from Spectacles to Telescopes** Vincent Ilardi,2007 Deals with the history of eyeglasses from their invention in Italy ca 1286 to the appearance of the telescope three cent later By the end of the 16th cent eyeglasses were as common in western and central Europe as desktop computers are in western developed countries today Eyeglasses served an important technological function at both the intellectual and practical level not only easing the textual studies of scholars but also easing the work of craftsmen small bus During the 15th cent two crucial developments occurred the ability to grind convex lenses for various levels of presbyopia and the ability to grind concave lenses for the correction of myopia As a result eyeglasses could be made almost to prescription by the early 17th cent Illus [A Documentary History of Art, Volume 1](#) Elizabeth Gilmore Holt,2024-05-21 An illuminating one volume compendium of primary documents on the art of medieval and Renaissance Europe This unique collection brings together notebooks letters treatises and contracts dealing with the art of the Middle Ages and Renaissance providing extraordinary insights into the personalities and conditions of the times and revealing the stylistic and philosophical concerns that evolved during these intensively creative eras These documents many of them available here in English for the first time range from Raoul Glaber s famous 1003 treatise on the synthesis of old and new art forms to Durand s essay on Christian symbolism in art and the writings of Leonardo and D rer on anatomy perspective and the recreation of reality They trace how a medieval conception of life that was inspired oriented and dominated by the church evolved gradually into the great reawakening of the Renaissance in which humankind itself assumed primary importance in Western art *Romanesque Renaissance* Konrad Adriaan Ottenheim,2021-01-11 In early modern times scholars and architects investigated age old buildings in order to look for useful sources of inspiration They too occasionally misinterpreted younger

buildings as proofs of majestic Roman or other ancient glory such as the buildings of the Carolingian Ottonian and Stauffer emperors But even if the correct age of a certain building was known buildings from c 800 1200 were sometimes regarded as Antique architecture since the concept of Antiquity was far more stretched than our modern periodisation allows This was a Europe wide phenomenon The results are rather diverse in style but they all share an intellectual and artistic strategy a conscious revival of an ancient architecture whatever the date and origin of these models Contributors Barbara Arciszewska Lex Bosman Ian Campbell Eliana Carrara Bianca de Divitiis Krista De Jonge Emanuela Ferretti Emanuela Garofalo Stefaan Grieten Hubertus G nther Stephan Hoppe Sanne Maekelberg Kristoffer Neville Marco Rosario Nobile Konrad Ottenheym Stefano Piazza and Richard Schofield *Reading the Middle Ages, Volume II* Barbara H. Rosenwein, 2014-01-01 Spanning the period from c 900 to c 1500 and containing primary source material from the European Byzantine and Islamic worlds Barbara H Rosenwein s *Reading the Middle Ages* Second Edition once again brings the Middle Ages to life Building on the strengths of the first edition this volume contains 24 new readings including 10 translations commissioned especially for this book and a stunning new 10 plate color insert entitled *Containing the Holy* that brings together materials from the Western Byzantine and Islamic religious traditions Ancillary materials including study questions can be found on the History Matters website www.utphistorymatters.com Original Treatises, Dating from the XIIth to the XVIIIth Centuries, [o]n the Arts of Painting, Mary Philadelphia Merrifield, 1849 **Giotto the Painter. Volume 3: Survival** Michael Viktor Schwarz, 2023-04-17 Giotto is considered by many to be the founder of modern painting This thesis is discussed and modified in the present volume on an empirical basis What emerges is that Giotto s impact cannot be reduced simply to the introduction of the study of nature Rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies **New Trinitarian Ontologies, Volume I** John Milbank, Ryan Haecker, JD Lyonhart, 2025-11-11 The Holy Trinity is the oldest idea of Christian hope The study of being or ontology was once regarded as a seminal preparation for the study of God as the creative cause of all being in theology Yet due to a series of theological mistakes metaphysics came to be separated from the Trinity before God came to be conceived as the supreme being of all beings in general metaphysics natural theology and modern ontology The analytic and continental philosophical traditions have since tended to treat the Trinity as at best superfluous and at worst redundant to modern formal ontologies Yet the postmodern collapse of all such formal ontologies has prepared the path for a renewed study of metaphysics or ontology that shares in participation with the Trinity *New Trinitarian Ontologies* names a creative response to this pivotal collapse of modern formal ontologies If ontology cannot contain but rather more radically points to God and if all nature thus tends towards the supernatural the

angelic and the metaphysical then we should renew the study of the metaphysics or ontology of the Trinity This volume represents a collection of responses to this challenge of rendering ontology in a Trinitarian style
