Crossing the Sierra de Gredos Peter Handke, 2025-08-22 In this visionary novel Nobel Prize winner Peter Handke offers descriptions of objects relationships and events that teach readers a renewed way of seeing he creates a wealth of images to replace those lost to convention and conformity On the outskirts of a northwestern European river port city lives a powerful woman banker a public figure admired and hated in equal measure who has decided to turn from the worlds of high finance and modern life to embark on a quest Having commissioned a famous writer to undertake her authentic biography she journeys through the Spanish Sierra de Gredos and the region of La Mancha to meet him As she travels by all terrain vehicle bus and finally on foot the nameless protagonist encounters five way stations that become the stuff of her biography and the biography of the modern world a world in which genuine images and unmediated experiences have been exploited and falsified by commercialization and by the voracious mass media *Crossing the Sierra de Gredos* is a very human book of yearning and the ancient quest for love peopled with memorable characters from multiple historical periods and imbued with Handke's inimitable ability to portray universal inner worldly adventures that blend past future present and dreamtime

The Novels of Balzac Honoré de Balzac, 1899 Fiction, 1876-1983: Titles R.R. Bowker Company. Department of Bibliography, R.R. Bowker Company. Publications Systems Department, 1983 Profiles and Plotlines Katherine D. Johnston, 2023-06-06 Algorithmic data profiling is not merely an important topic in contemporary fiction it is an increasingly dominant form of storytelling and characterization in our society These stories are being told inside boardrooms banks presidential briefings police stations advertising agencies and technology companies And so to the extent that data has taken up storytelling literature must take up data After all profiling coincides with character development surveillance reflects point of view and data points track as plot points in tales of the political economy In *Profiles and Plotlines* Katherine Johnston engages this energetic reformation of contemporary literature to account for a society and economy of frenetic counting Fiction and poetry are capable of addressing precisely that for which algorithms cannot or do not account the effects of profile culture the ideologies and supposed truth power of data the gendered and racialized dynamics of watching and being watched and the politics of who counts and what gets counted Johnston analyzes prescient work by contemporary authors such as Jennifer Egan Claudia Rankine Mohsin Hamid and William Gibson to probe how the claims of data surveillance serve
