Making Democracy Work A Framework For Macroeconomic Policy In South Africa:

South Africa and the Logic of Regional Cooperation James J. Hentz, 2005-07-19 In *South Africa and the Logic of Regional Cooperation* James J Hentz addresses changes in South Africa's strategies for regional cooperation and economic development since its transition from apartheid to democracy Hentz focuses on why the new South African government continues to make regional cooperation a priority and what methods this dominant state uses to pursue its neighborly goals While providing a synthetic overview of the history of regional cooperation in southern Africa Hentz considers the logic of cooperation more generally An extensive discussion of South African politics provides the context for Hentz's exploration of the more widely felt effects of domestic change Readers interested in the international organization of the politics and economy of southern Africa will find thought provoking material in this important book [Making Democracy Work](#) Macroeconomic Research Group, 1993 MERG has become convinced that a sea change in economic policy is essential to generate growth in the next few years It can demonstrate that its proposed policy framework is both coherent and affordable The MERG proposals offer a radically different vision of the future of South Africa They have been designed to address the current imbalances through direct intervention in a way which would benefit all sections of the South African population within a short period of time MERG took the objectives of the democratic movement as its starting point The aim of the MERG framework is therefore to secure a rapid improvement in the quality of the daily lives of South Africa's poorest most oppressed and disadvantaged people The strategy stresses programmes to initiate job creation and training programmes for the unemployed improve the status of the poorest women in the rural areas improve the availability and quality of education health housing and electrification raise the level of wages of low income workers and dramatically improve the skills of employed workers **The Oxford Handbook of the South African Economy** Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021 This Handbook provides a detailed and wide ranging coverage of the key economic questions in South Africa concentrating on the more recent economic challenges facing the country **The Oxford Companion to the Economics of South Africa** Haroon Borat, Alan Hirsch, Ravi Kanbur, Mthuli Ncube, 2014-11-27 In 1994 South Africa saw the end of apartheid The new era of political freedom was seen as the foundation for economic prosperity and inclusion The last two decades have seen mixed results Economic growth has been volatile While inequalities in public services have been reduced income inequality has increased and poverty has remained stagnant As the twentieth anniversary of the transition to democracy approaches in 2014 the economic policy debates in South Africa are in full flow They combine a stocktake of the various programs of the last two decades with a forward looking discussion of strategy in the face of an ever open but volatile global economy Underlying the discourse are basic and often unresolved differences on an appropriate strategy for an economy like South Africa with a strong natural resource base but with deeply entrenched inherited inequalities especially across race This volume contributes to the policy and analytical debate by pulling together perspectives on a range of issues

micro macro sectoral country wide and global from leading economists working on South Africa Other than the requirement that it be analytical and not polemical the contributors were given freedom to put forward their particular perspective on their topic The economists invited are from within South Africa and from outside from academia and the policy world from international and national level economic policy agencies The contributors include recognized world leaders in South African economic analysis as well as the very best of the younger crop of economists who are working on the study of South Africa the next generation of leaders in thought and policy

No More Tears Richard Levin, Daniel Weiner, 1997 This text demonstrates why incorporating extensive knowledge that exists in poor rural areas into development of land and reform policies is essential for truly democratic social and economic transformation

South Africa's Uneasy Alliance Martin Plaut, 2012-10-31 The communist party in South Africa began as a revolutionary movement In exile in the 1960s and 1970s it took on significance its numbers never warranted through its relationship with the Soviet Union and the weapons it brought to the armed struggle Today it worries that it has been absorbed into the ANC machinery of government without being able to retain its own identity The unions of Cosatu were born out of the fight against poverty level wages of the 1970s Their culture comes from the shop floor and the democracy of the shop steward movement They played a critical role in ending apartheid through their links with the United Democratic Front and the grassroots groups in the townships African Nationalism Marxism Leninism and popular democracy are never easy ideological partners Yet the Alliance has survived and flourished The cost of this relationship has been endless disputes While each element of the Alliance pledges its support for the greater good it fights for its own corner The history of post apartheid South Africa is littered with examples of how this has been played out The overthrow of President Thabo Mbeki by Jacob Zuma in 2007 would have been unthinkable without the complex web of relationships that were developed within the Alliance As the ANC moves towards its elective conference in Mangaung in December 2012 tensions within the Alliance are at breaking point once more In theory this is a purely internal ANC party issue But candidates for the top job are battling it out and the support of the unions and the Communist Party is a critical element in their campaigns These battles can only be understood in the context of the Alliance an extraordinary but poorly understood movement

Twentieth-Century South Africa Bill Freund, 2019 This unique history highlights South Africa's complex and dynamic attempt to build a developmental state an attempt that ultimately faltered

Ownership and Governance of Companies Jonathan Michie, Vishnu Padayachee, 2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to

whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC's mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics

The Experience of Economic Redistribution Clarence Tshitereke, 2006-10-09 This book provides an analysis of the country's political economy in transition It documents the history of the gold mining industry's involvement in shaping the political landscape of South Africa and shows the degree to which the political transition was induced to put in place a new mode of regulation for capital accumulation In the process the victims of apartheid have now become victims of democracy's neo liberalism as the government is constrained from being developmental interventionist and redistributive

presented in the World Trade and Trade Policy workshop looked at the new trends in regionalism from a variety of points of view for different institutions They considered the effects of regions their implications for policy and performance in the developing countries and for international economic institutions and tried to interpret them in terms of economic and political theory **Corrupted** Jonathan D Jansen,2023-02 Through investigatory reports and interviews Jonathan Jansen
