Making Of The Scottish Countryside:

The Making of the Scottish Countryside M.L. Parry,T.R. Slater,1980-01-01 **The Making of the Scottish Rural Landscape** David Turnock,2016-12-05 This book looks at the evolution of rural settlement in Scotland from the Mesolithic period through to the improving movement of the 18th and 19th centuries The main emphasis is on changes in society and technology but the book also considers how the development of the physical landscape laid the foundation for such changes The author strikes a balance between general perspectives including relevant contextual materials such as the political structures and local studies with much emphasis on individual sites Lack of documentation prior to the 10th century places particular importance on the archaeological evidence but imaginative interpretation of this evidence has led to a major re evaluation Ideas emphasizing continuity of settlement and local adaptation are replacing older invasionist theories emphasizing Celtic war lords and broch building pirates

The Changing Scottish Landscape Ian Whyte,Kathleen Whyte,2021-10-12 Originally published in 1991 and focussing on the countryside this book examines patterns of settlement and agriculture in Scotland and considers how these were increasingly altered during the 17th and 18th Centuries by the first Improvers and then by the more widespread impact of the Agricultural Revolution It considers the effect on the landscape of the changing role of the church the development of improved communications and the rise of new industries The book analyses in detail the ways in which the landscape changed in Scotland s transition from a medieval impoverished country and an undeveloped economy to a modern society and one of the most highly urbanised countries in Europe

Exploring the Scottish Past Thomas Martin Devine,1995 This is a collection of fifteen essays written over the last twenty years by one of Scotland s most eminent historians The material concentrates on four broad themes in seventeenth eighteenth and nineteenth century Scottish history Merchants Unions and Trade Scottish Economic Development The Highlands and the Rural Lowlands *The Scottish Countryside* Rosemary Gibson,2007 Making use of the extensive plans holdings of the National Archives of Scotland to illustrate the great change on the face of the country this selection from the 100 000 plans shows the value of these sources for many aspects of Scotland s past and to display snapshots of the landscape through three centuries of change **Landscapes of Protest in the Scottish Highlands after 1914** Iain J.M.

Robertson,2016-04-15 In November 1918 the implementation of agrarian change in the Scottish Highlands threatened another wave of unemployment and eviction for the land working population which led to widespread and varied social protest Those who had been away on war service and their families faced returning to exactly the same social and economic conditions in the Scottish Highlands they had hoped they had left behind in the struggle to make a land fit for heroes Widespread and varied social protest rapidly followed It argues that previously there has been a failure to capture fully the geography chronology typology and rate of occurrence of these events The book not only offers new insights and a greater understanding of what was happening in the Highlands in this period but illustrates how a range of forms of protest were

used which demand attention not least for the fact that these events unlike most of the earlier Land Wars period were successful There are functioning townships in the Highlands today that owe their existence to the land invasions of the 1920s The book innovatively concentrates on formulating explanation and interpretation from within and looks to the crofting landscape as base means and motive to disturbance and interpretation It proposes that protest is much more convincingly understood as an expression of environmental ethics from the bottom up coming increasingly into conflict with conservationist views expressed from the top down It focuses on individual case studies in order to engage more convincingly with an important evidential base that of popular memory of land disturbances and to adopt a frame and lens through which to explore the fluid and contingent nature of protest performances Based upon the belief that in the study of landscapes of social protest the old shibboleth of space as solely passive setting and symbolic register is no longer tenable is paid here to nature culture interactions to vernacular ecological b

The Historical Geography of Scotland Since 1707 David Turnock, 2005-08-04 This is the first book to take a comprehensive view of the historical geography of Scotland since the Union The period is divided into sections separated by the Napoleonic Wars and the First World War and each section offers a general view followed by detailed studies giving a balanced coverage of regional and urban rural criteria and the economic infrastructure The book contains a number of original researches and Dr Turnock attempts to set the Scottish experience in a framework of general ideas on modernisation

History of Everyday Life in Scotland, 1800 to 1900 Graeme Morton, 2010-08-31 This volume explores the experience of everyday life in Scotland over two centuries characterised by political religious and intellectual change and ferment It shows how the extraordinary impinged on the ordinary and reveals people s anxieties joys comforts passions hopes and fears It also aims to provide a measure of how the impact of change varied from place to place The authors draw on a wide range of primary and secondary sources including the material survivals of daily life in town and country and on the history of government religion ideas painting literature and architecture As B S Gregory has put it everyday history is an endeavour that seeks to identify and integrate everything all relevant material social political and cultural data that permits the fullest possible reconstruction of ordinary life experiences in all their varied complexity as they are formed and transformed

The Late Medieval Landscape of North-east Scotland Colin Shepherd, 2021-10-31 The landscape of the north east of Scotland ranges from wild mountains to undulating farmlands from cosy quaint fishing coves to long sandy bays This landscape witnessed the death of MacBeth the final stand of the Comyns earls of Buchan against Robert the Bruce and the last victory in Britain of a catholic army at Glenlivet But behind these momentous battles lie the quieter histories of ordinary folk farming the land and supping their local malts Colin Shepherd paints a picture of rural life within the landscapes of the north east between the 13th and 18th centuries by using documentary cartographic and archaeological evidence He shows how the landscape was ordered by topographic and environmental constraints that resulted in great variation across the region and considers the evidence for the way late

medieval lifestyles developed and blended sustainably within their environments to create a patchwork of cultural and agricultural diversity. However, these socio-economic developments subsequently led to a breakdown of this structure, resulting in what Adam Smith in the 18th century described as oppression. The 12th century Renaissance, the Protestant Reformation, and the Industrial Revolution are used here to define a framework for considering the cultural changes that affected this region of Scotland. These include the dispossession of rights to land ownership that continue to haunt policy makers in the Scottish government today. While the story also shows how a regional cultural divergence recognized here can undermine big theories of socio-political change when viewed across the wider stage of Europe and the Americas.

Rural Society in the Age of Reason Chris J. Dalglish, 2006-04-11. My interest in the archaeology of the Scottish Highlands began long before I had any formal training in the subject. Growing up on the eastern fringes of the southern Highlands close to Loch Lomond, it was not hard to stumble across ruined buildings, old field boundaries, and other traces of everyday life in the past. This is especially true if you spend much time as I have done climbing the nearby mountains and walking and driving through the various glens that give access into the Highlands. At the time, I had no real understanding of these remains, simply accepting them as being built and old. After studying archaeology for a few years at the University of Glasgow itself, only a short commute from the area where I grew up, I became acutely aware that I still had no real understanding of these myriad yet enigmatic buildings and fields. This and a growing interest in Scotland's historical archaeology drove me to take several courses on the subject of rural settlement studies. These courses allowed me to place what I now knew to be houses, barns, mills, shieling transhumance settlements, rig and furrow cultivation, and other related remains in history. Overwhelmingly, they seemed to date from the period of the last 300 years. I also began to understand how they all worked together as component parts of daily rural life in the past.

It is particularly concerned with the relationship of landlord and peasant in the rural village and examines the open/closed model of English rural social structure in great depth. Whyte, 2004-03-03 Landscape and History explores a complex relationship over the past five centuries The book is international and interdisciplinary in scope drawing on material from social economic and cultural history as well as from geography archaeology cultural geography planning and landscape history In recent years as the author points out there has been increasing interest in and concern for many aspects of landscape within British European and wider contexts This has included the study of the history development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies economic and social structures cartography art and literature There is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites but in the countryside more generally Further Ian D Whyte argues changes in European Union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and
