Making Peace With The Planet:

Making Peace with the Planet Barry Commoner, 1990 Reviews past efforts to repair environmental damage and documents the shortcomings of the eco revolution *Environmental Crime* Mary Clifford, 1998 Appendices include Glossary Important environmental activities Criminal sanctions outlined in federal environmental legislation environmental legal cases environmental crimes investigations for law enforcement officers **Barry Commoner and the Science of Survival**

Michael Egan, 2009-01-23 Chronicles the activist career of Barry Commoner one of the most influential American environmental thinkers and his role in recasting the environmental movement after World War II For over half a century the biologist Barry Commoner has been one of the most prominent and charismatic defenders of the American environment appearing on the cover of Time magazine in 1970 as the standard bearer of the emerging science of survival In *Barry Commoner and the Science of Survival* Michael Egan examines Commoner's social and scientific activism and charts an important shift in American environmental values since World War II Throughout his career Commoner believed that scientists had a social responsibility and that one of their most important obligations was to provide citizens with accessible scientific information so they could be included in public debates that concerned them Egan shows how Commoner moved naturally from calling attention to the hazards of nuclear fallout to raising public awareness of the environmental dangers posed by the petrochemical industry He argues that Commoner's belief in the importance of dissent the dissemination of scientific information and the need for citizen empowerment were critical planks in the remaking of American environmentalism Commoner's activist career can be defined as an attempt to weave together a larger vision of social justice Since the 1960s he has called attention to parallels between the environmental civil rights labor and peace movements and connected environmental decline with poverty injustice exploitation and war arguing that the root cause of environmental problems was the American economic system and its manifestations He was instrumental in pointing out that there was a direct association between socioeconomic standing and exposure to environmental pollutants and that economics not social responsibility was guiding technological decision making Egan argues that careful study of Commoner's career could help reinvigorate the contemporary environmental movement at a point when the environmental stakes have never been so high

The Politicized Concert Mass (1967-2007) Stephanie Roche, 2022-07-29 Since the transformative 1960s concert masses have incorporated a range of political and religious views that mirror their socio cultural context Those of the long 1960s c1958 1975 reflect non conformism and social activism those of the 1980s environmentalism those of the 1990s universalism and those of the 2000s cultural pluralism Despite utilizing a format with its roots in the Roman Catholic liturgy many of these politicized concert masses also reflect the increasing religious diversification of Western societies By introducing non Catholic and often non Christian beliefs into masses that also remain respectful of Christian tradition composers in the later twentieth century have employed the genre to promote a conciliatory way of being that promotes the value of heterogeneity and reinforces the need to protect the diversity of music's species and spiritualities that enrich life In combining the political with the religious the case studies presented pose challenges for both supporters and detractors of the secularization paradigm Overarchingly they demonstrate that any binary division that separates life into either the religious or the secular and promotes one over the other denies the complexity of lived experience and constitutes a diminution of what it is to be human

examination copy here *Gathered in my Name* William T. Cavanaugh, 2020-12-28 This volume differs from many quincennial discussions of the Protestant Reformation and ecumenical scholarship more generally in that it shifts the focus from Europe and the West to the global South where ecumenism's promises and challenges are quite different In postcolonial and post missionary Africa the churches continue to expand competition among denominations is lively and Christian rivalry with Islam is often a reality In Latin America Protestants have severely eroded the Catholic Church's hegemony originally forged in the zeal of the Counter Reformation to combat the perceived errors of Luther and Calvin In India the Christian churches are a tiny beleaguered minority facing an increasingly militant Hindu nationalism These essays pay close attention to the different contexts of intra Christian relationships worldwide the actual situation on the ground If ecumenism will succeed it cannot be simply a matter of experts at a conference attempting to agree about doctrines abstracted from the contexts in which they were forged the contexts in which doctrinal disagreements caused ecclesial ruptures or the contexts in which Christians continue to live out our divided existence This volume attempts to be sensitive to the lived experience of divided Christians in whatever part of the world they find themselves Listening To The Sea Robert Jay Wilder, 2010-06-15 Environmental politics and policy while gaining a significant place in the nation's consciousness constantly comes up against the United States desire for more development more profit and a collective lack of foresight Nowhere is this more evident than in the crucial biodiversity of the world's oceans which are victim to pollution overharvesting habitat destruction and simplistic and fragmented environmental policies that do not speak to underlying problems Robert Wilder describes how management of the world's oceans and their ecosystems has long faced two principal obstacles The first is the seemingly infinite capacity of human apathy something that permits us to take the sea's comfort sustenance ecological services and integrity for granted The second is the myriad lines for rigid offshore jurisdiction That people believe the diversity of life on land should be protected is reflected in well publicized efforts to save the celebrated biodiversity of rainforests Far less is known however about protecting a larger two thirds of this planet the oceans Drawing on academic literature and practical experience Wilder illustrates the nature of the questions facing decision makers and provides intelligent well crafted solutions By describing how the emerging idea of precautionary action can help build second generation policy Wilder offers means to halt problematic overfishing He integrates political science with the goals of environmental protection revealing why agencies often fail in their mission to preserve the environment and offers fresh sensible new paths ahead Wilder shows how damage to marine ecosystems often stems from distant land based activities and details emerging ideas such as how industrial ecology can be a cost effective way to prevent pollution Through a rigorous integration of policy and science Wilder suggests a much improved second generation governance of the ocean and coasts and proposes new ideas for resolving the environmental policy stalemate found within the U S government The Ethics of Giacomo Leopardi Alice Gibson, 2023-10-19 Providing a comprehensive introduction to the work of pioneering poet

philosopher Giacomo Leopardi Alice Gibson pushes his thought into new directions by investigating how his ethics and philosophy of nature offer means for understanding and taking responsibility for the environmental crisis Through examination of the whole of Leopardi s oeuvre from the Zibaldone to the poems he wrote towards the end of his life this book disrupts the common image of Leopardi as a pessimist poet whose works contribute to the nihilistic tradition The Ethics of Giacomo Leopardi instead uncovers his forward looking views on living in a multispecies world in which humans live alongside other living beings in a delicate ecosystem that not only requires respect but also instigates wonder Bringing Leopardi s thought into dialogue with contemporary ecological theorists such as Donna Haraway Bruno Latour and Timothy Morton Gibson reveals how a Leopardian ethics of solidarity compassion and community is the guide we need today to reframe our relationship with nature

The Vulnerable Planet John Bellamy Foster,1999-09 Rejecting both individualistic solutions and policies that tinker at the margins John Bellamy Foster calls for a fundamental reorganization of production on a social basis so as to make possible a sustainable and ecological economy This revised edition includes a new afterword by the author
