Making Children's Furniture And Play Structures:

The Design of Childhood Alexandra Lange, 2018-06-12 Pulitzer Prize winning design critic Alexandra Lange's eye opening exploration of how children's playthings and physical surroundings affect their development from building blocks to city blocks. Parents obsess over their children's playdates, kindergarten curriculum, and every bump and bruise, but the toys, classrooms, playgrounds, and neighborhoods little ones engage with are just as important. These objects and spaces encode decades, even centuries, of changing ideas about what makes for good child rearing and what does not. Do you choose wooden toys or plastic or increasingly digital? What do youngsters lose when seesaws are deemed too dangerous and slides are designed primarily for safety? How can the built environment help children cultivate self reliance? In these debates, parents, educators, and kids themselves are often caught in the middle. Now prominent design critic Alexandra Lange reveals the surprising histories behind the human made elements of our children's pint size landscape. Her fascinating investigation shows how the seemingly innocuous universe of stuff affects kids' behavior, values, and health, often in subtle ways. And she reveals how years of decisions by toymakers, architects, and urban planners have helped and hindered American youngsters' journeys toward independence. Seen through Lange's eyes, everything from the sandbox to the street becomes vibrant with buried meaning. **The Design of Childhood** will change the way you view your children's world and your own. **Making**

Children's Furniture and Play Structures Bruce Palmer, 1974 Shows how to make a variety of stools, chairs, tables, desks, beds, storage units, play structures, tents, domes, geoshapes, habitats, vehicles, and other apparatuses using inexpensive, easily obtained materials. **Index to Handicraft Books, 1974-1984** Carnegie Library of Pittsburgh. Science and Technology Department, 1986 Handicrafts and do it yourself projects have always been a library's most popular and heavily requested subject. And for more than a decade, a definitive index to handicraft books has not been published. To fill this gap, the Science and Technology Department at Carnegie Library of Pittsburgh has compiled the **Index to Handicraft Books**, listing more than 900 books and over 12,400 subject entries covering books published from 1974 to 1984. The **Index to Handicraft Books** is an essential reference tool for librarians who want to help someone find instructions for a varied range of do it yourself projects, providing quick access to craft projects in books more recent than previous handicraft index books have listed. Each entry in the index consists of a subject heading, the name of the project as listed in the book, the author, and title of the book, and the page numbers on which the project can be found. The author and title correspond to those in the List of Works Cited section, which gives full bibliographic information in order to help librarians find the book on their shelves or obtain the book through inter library loan. Because this index developed from a card file index of craft books acquired by Carnegie Library since 1974, the list concentrates mainly on medium priced books that most libraries buy. **Designing the Creative Child** Amy F. Ogata, 2013-04-21 The postwar American stereotypes of suburban sameness, traditional gender roles, and educational conservatism have masked an alternate self image tailor made for the Cold War. The creative child, an idealized future citizen,

was the darling of baby boom parents psychologists marketers and designers who saw in the next generation promise that appeared to answer the most pressing worries of the age Designing the Creative Child reveals how a postwar cult of childhood creativity developed and continues to this day Exploring how the idea of children as imaginative and naturally creative was constructed disseminated and consumed in the United States after World War II Amy F Ogata argues that educational toys playgrounds small middle class houses new schools and children s museums were designed to cultivate imagination in a growing cohort of baby boom children Enthusiasm for encouraging creativity in children countered Cold War fears of failing competitiveness and the postwar critique of social conformity making creativity an emblem of national revitalization Ogata describes how a historically rooted belief in children s capacity for independent thinking was transformed from an elite concern of the interwar years to a fully consumable and aspirational ideal that persists today From building blocks to Gumby playhouses to Playskool trains Creative Playthings to the Eames House of Cards Crayola fingerpaint to children s museums material goods and spaces shaped a popular understanding of creativity and Designing the Creative Child demonstrates how this notion has been woven into the fabric of American culture *Creating Innovative Classroom Materials for Teaching Young Children* Marianne Debelak, Martha Jacobson, 1981 **Catalog of Copyright Entries.
