Making Of High Performance Athletes Discipline Diversity And Ethics:

The Making of High-performance Athletes Debra A. Shogan, 1999-01-01 A study of the ethical dilemmas of producing high performance athletes through use of technology using Foucault's work on disciplinary power as a theoretical framework

The Making of High Performance Athletes Debra Shogan, 1999-12-15 Highly skilled athletes are produced by technologies of training which seek to create the athlete as a singular identity Yet the disciplinary model of modern sport is consistently disrupted by the diversity and hybridity of the participants Using Foucault's work on disciplinary power as a theoretical framework Debra Shogan an academic in sports ethics and a coach of high performance athletes examines the ways in which athletes are produced through technologies of training and the ethical issues which emerge when demands to improve performance envelopes athletes coaches administrators and sports scientists in decisions about how far to push the limits of performance Making the case for a new postmodern sports ethic Shogan shows how the juxtaposition of hybrid athletes with the homogenizing technologies of sport discipline opens up spaces for questioning refusing and perhaps creating new ways of participating in sport

Sport Ethics in Context Debra Shogan, 2007 This thought provoking collection of essays explores what constitutes the ethical domain ethical practice ethics education and ethics all in the context of sport Sport Ethics in Context goes beyond the usual focus in sport ethics on responsibilities and explores ethical responsibilities to teammates coaches and others associated with a team As well this collection describes a new sport ethics through which participants might come to question those practices that sport discipline creates The author argues that if sport is to be a vehicle for a better understanding of and appreciation for ethical responses it is necessary to pay attention to just what is at stake in the ethical domain including the components of ethical response and how sport leaders might facilitate ethical responses in a sport environment

en mathématiques la cohomologie galoisienne est l'étude de l'action d'un groupe de galois sur certains groupes par des méthodes cohomologiques elle permet d'obtenir des résultats à la fois sur le groupe de galois agissant et sur le groupe sur lequel il agit en particulier le groupe de galois d'une extension de corps de nombres L/K agit naturellement par exemple sur le

galois cohomology wikipedia - Aug 14 2023

in mathematics galois cohomology is the study of the group cohomology of galois modules that is the application of homological algebra to modules for galois groups a galois group g associated to a field extension l/k acts in a natural way on some abelian groups for example those constructed directly from l but also through other galois representations that may be derived by more abstract means galois cohomology accounts for the way in which taking galois invariant elements fails
