Making Of Ireland Landscapes In Geology:

The Making of Ireland Michael Williams, D. A. T. Harper, 2003 Ireland contains some of the most impressive and unspoilt scenery in western Europe From the conical white quartzite mountains of Donegal in the north to the ragged clutching fingers of the Skellig Rocks in the south the constant changes of light and shade alter these vistas moment by moment This country was forged on the anvil of time in a way which reflects the constantly changing patterns and configurations in the history of the planet

The Origins of the Irish J. P. Mallory, 2013-04-01 An essential new history of ancient Ireland and the Irish written as an engrossing detective story About eighty million people today can trace their descent back to the occupants of Ireland But where did the occupants of the island themselves come from and what do we even mean by Irish in the first place This is the first major attempt to deal with the core issues of how the Irish came into being J P Mallory emphasizes that the Irish did not have a single origin but are a product of multiple influences that can only be tracked by employing the disciplines of archaeology genetics geology linguistics and mythology Beginning with the collision that fused the two halves of Ireland together the book traces Ireland's long journey through space and time to become an island The origins of its first farmers and their monumental impact on the island is followed by an exploration of how metallurgists in copper bronze and iron brought Ireland into increasingly wider orbits of European culture Assessments of traditional explanations of Irish origins are combined with the very latest genetic research into the biological origins of the Irish

Ireland Michael Viney, 2014-10-28 Ireland conjures up images of nature's majesty sweeping coastlines rolling green hills and secluded peat bogs and marshlands A place of legendary beauty it is also a land with a rich natural history Michael Viney invites us to discover the geologic forces that created the island peer into the famous bone caves that hold unique clues about animals from long ago and experience the dramatic scenes of the cliff lined coast and tempestuous seas Viney begins deep in the past when rivers of molten rock and enormous glaciers stripped the land bare Soon after the glaciers retreated the island was transformed into a fresh new landscape home to an intriguing variety of plants and animals and an environment that has cultivated a rich human history and inspired countless myths Infused with the lyricism of Irish prose Ireland A Smithsonian Natural History is indispensable for anyone seeking to understand the natural beauty of the Emerald Isle

Making Ireland Modern Enda Delaney, 2025-10-02 A provocative and original reinterpretation of modern Irish history There is a widespread misconception that Ireland became modern much later than its neighbours in the 1960s and 1970s This is grounded in several enduring stereotypes and caricatures of Ireland as a timeless and unchanging land of saints and scholars of its society and culture in the long nineteenth century as puritanical regressive or archaic of Gaelic language and culture as backward or inward looking in contrast to a modern English counterpart and of the island as natural and rural in the face of the urban and technological progress of modernity Drawing on an extensive range of sources from poetry and novels to contemporary historical documents acclaimed historian Enda Delaney here offers a reinterpretation of Ireland's

encounter with modernity that corrects these stereotypes By situating the island's history between 1780 and 1916 within its broader European global and colonial contexts he demonstrates that Ireland's pathway to modernity was not inevitable belated or uni directional over a complex and centuries long process it was made modern and in its own distinctive way This was related to but distinct from Ireland's complicated colonial relationship with Britain and played out in the broader contexts of globalisation and the rise of capitalism And at the heart of this history are the Irish people themselves both those who lived on the island and the millions of those who left during this period and made their lives in Britain America Australia and beyond who made sense of modernity in a variety of conflicting ways and in so doing sought to shape their own destinies and adapt the old ways of doing things in the face of relentless waves of progress Changes in values consciousness and beliefs interacted with broader social political and cultural revolutions to create a distinctive experience of becoming modern The result is a bold and wide ranging new history of modern Ireland that restores agency to those who lived and made its history raising important and timely questions about modernity globalisation modern history and post colonialism

Hillforts, Warfare and Society in Bronze Age Ireland William O'Brien, James O'Driscoll, 2017-07-24 This is the first project to study hillforts in relation to warfare and conflict in Bronze Age Ireland This project combines remote sensing and GIS based landscape analysis with conventional archaeological survey to investigate ten prehistoric hillforts across southern Ireland

GeoHibernica Paul Lyle, 2025-08-27 GeoHibernica explores how Ireland's diverse geological foundations have shaped its people culture and heritage over millennia From ancient megaliths to modern artistic interpretations the book examines the deep connections between landscape and identity offering a scholarly yet personal perspective on Ireland's evolving relationship with its natural environment

The Making of the Geological Society of London Cherry Lewis, Simon J. Knell, 2009 IRELAND Viney Michael, 2003-03-17 He begins by answering some common questions about the region and explains its intricate geology An in depth examination follows of three factors that play an enormous role in shaping the complex life of the boreal forest snow forest fires and peatlands Henry looks at the dynamics of the region's vegetation and the evolution of its animals and discusses the fascinating ten year predator prey cycle of snowshoe hares and Canadian lynx one of the most famous examples of ecological interconnection In Canada's boreal forest loggers have clear cut an area the size of Great Britain The final portion of the book examines initiatives from Scandinavia and Finland in order to offer alternatives to large scale logging and mining suggesting how humans can live and work in the boreal forest in a sustainable and responsible manner

BOOK JACKET Routledge Handbook of Landscape Character Assessment Graham Fairclough, Ingrid Sarlöv Herlin, Carys Swanwick, 2018-05-11 In this multi authored book senior practitioners and researchers offer an international overview of landscape character approaches for those working in research policy and practice relating to landscape Over the last three decades European practice in landscape has moved from a narrow if relatively straightforward focus on natural beauty or scenery to a much broader concept of landscape character constructed

through human perception and transcending any of its individual elements Methods tools and techniques have been developed to give practical meaning to this idea of landscape character The two main methods Landscape Character Assessment LCA and Historic Landscape Characterisation HLC were applied first in the United Kingdom but other methods are in use elsewhere in Europe and beyond to achieve similar ends This book explores why different approaches exist the extent to which disciplinary or cultural specificities in different countries affect approaches to land management and landscape planning and highlights areas for reciprocal learning and knowledge transfer Contributors to the book focus on examples of European countries such as Sweden Turkey and Portugal that have adopted and extended UK style landscape characterisation but also on countries with their own distinctive approaches that have developed from different conceptual roots as in Germany France and the Netherlands The collection is completed by chapters looking at landscape approaches based on non European concepts of landscape in North America Australia and New Zealand This book has an introductory price of 125 205 which will last until 3 months after publication after this time it will revert to 140 225 Making One's Way in the World Martin Bell, 2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and

rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life **British**
