Making Of The Second Reform Bill:

The Two Mr. Gladstones Travis L. Crosby, 1997-01-01 This text explains that although Gladstone was among the most revered figures of his age there was another side to his character one of sudden bursts of anger and aggressiveness towards opponents It applies a psychological framework to Gladstone's life to explain this duality of his character *The Historiography of Gladstone and Disraeli* Ian St John, 2016-08-03 This book traces the often sharply differing perspectives historians have formed with regard to the key incidents in the careers of the two foremost politicians of the Victorian age Gladstone and Disraeli Following the parallel careers of both men it focuses upon a series of contentious questions ranging from why Disraeli opposed Corn Law repeal in 1846 and Gladstone abandoned his High Tory politics for Peelism to whether Disraeli was ever an Imperialist and why Gladstone took up the cause of Irish Home Rule By juxtaposing the contrasting interpretations advocated by historians it brings home to students how history is a continually evolving subject in which every generation poses new questions or reformulates answers to old ones encouraging those studying the subject to realise that history is an ongoing dialogue to which they are called upon to contribute *Thomas Hare and Political Representation in Victorian Britain* F. Parsons, 2009-07-30 This book is a history of the emergence and development of the concept of proportional representation and its relation to political theory within the context of nineteenth century British party politics focusing on Thomas Hare 1806 1891 **Ambivalent Nation** Hugh Dubrulle, 2018-06-11 In *Ambivalent Nation* Hugh Dubrulle explores how Britons envisioned the American Civil War and how these conceptions influenced their discussions about race politics society military affairs and nationalism Contributing new research that expands upon previous scholarship focused on establishing British public opinion toward the war Dubrulle offers a methodical dissection of the ideological forces that shaped that opinion many of which arose from the complex Anglo American postcolonial relationship Britain's lingering feeling of ownership over its former colony contributed heavily to its discussions of the American Civil War Because Britain continued to have a substantial material interest in the United States its writers maintained a position of superiority and authority in respect to American affairs British commentators tended to see the United States as divided by two distinct civilizations even before the onset of war a Yankee bourgeois democracy and a southern oligarchy supported by slavery They invariably articulated mixed feelings toward both sections and shortly before the Civil War the expression of these feelings was magnified by the sudden emergence of inexpensive newspapers periodicals and books The conflicted nature of British attitudes toward the United States during the antebellum years anticipates the ambivalence with which the British reacted to the American crisis in 1861 Britons used prewar stereotypes of northerners and southerners to help explain the course and significance of the conflict Seen in this fashion the war seemed particularly relevant to a number of questions that occupied British conversations during this period the characteristics and capacities of people of African descent the proper role of democracy in society and politics the future of armed conflict and the composition of a durable nation These questions helped

shape Britain's stance toward the war and in turn the war informed British attitudes on these subjects Dubrulle draws from numerous primary sources to explore the rhetoric and beliefs of British public figures during these years including government papers manuscripts from press archives private correspondence and samplings from a variety of dailies weeklies monthlies and quarterlies The first book to examine closely the forces that shaped British public opinion about the Civil War *Ambivalent Nation* contextualizes and expands our understanding of British attitudes during this tumultuous period

Britain in fragments Satnam Virdee, Brendan McGeever, 2023-04-04 Britain today is falling apart One of the most dominant states in world history finds itself confronted with growing demands for nationalist secessionism Brexit has already secured its break from the European Union while looming Scottish independence promises to undermine the integrity of the British state Meanwhile class gender regional and generational inequalities are deepening while endemic racism has been reinvigorated How has it come to this *Britain in fragments* traces how the historic pillars sustaining the democratic settlement have begun to crumble This stability was constructed amid a century of imperial expansion abroad and working class struggles for justice at home The post war welfare state was the apex of this historic arrangement however the ground beneath it began to shake as the processes of decolonisation and neoliberalism unfolded This book traces how successive Labour and Conservative governments have incrementally dismantled the democratic settlement A bipartisan commitment to neoliberalism has culminated in a historic crisis of representation and legitimacy opening the door to competing nationalist forces

The Oxford Handbook of Modern British Political History, 1800-2000 David Brown, Robert Crowcroft, Gordon Pentland, 2018-03-29 The two centuries after 1800 witnessed a series of sweeping changes in the way in which Britain was governed the duties of the state and its role in the wider world Powerful processes from the development of democracy the changing nature of the social contract war and economic dislocation have challenged and at times threatened to overwhelm

both governors and governed Such shifts have also presented challenges to the historians who have researched and written about Britain's past politics This Handbook shows the ways in which political historians have responded to these challenges providing a snapshot of a field which has long been at the forefront of conceptual and methodological innovation within historical studies It comprises thirty three thematic essays by leading and emerging scholars in the field Collectively these essays assess and rethink the nature of modern British political history itself and suggest avenues and questions for future research The Oxford Handbook of Modern British Political History thus provides a unique resource for those who wish to understand Britain's political past and a thought provoking long view for those interested in current political challenges

Age of Promises David Thackeray, Richard Toye, 2021 Age of Promises explores the issue of electoral promises in twentieth century Britain how they were made how they were understood and how they evolved across time through a study of general election manifestos and election addresses The authors argue that a history of the act of making promises which is central to the political process but which has not been sufficiently analysed illuminates the development of political communication and democratic representation The twentieth century saw a broad shift away from politics viewed as a discursive process whereby at elections it was enough to set out broad principles with detailed policymaking to follow once in office following reflection and discussion Over the first part of the century parties increasingly felt required to compile lists of specific policies to offer to voters which they were then considered to have an obligation to carry out come what may From 1945 onwards moreover there was even more focus on detailed costed pledges We live in an age of growing uncertainty over the authority and status of political promises In the wake of the 2016 EU referendum controversy erupted over parliamentary sovereignty Should the will of the people as manifested in the referendum result be supreme or did MPs owe a primary responsibility to their constituents and or to the party manifestos on which they had been elected Age of Promises demonstrates that these debates build on a long history of differing understandings about what status of manifestos and addresses should have in shaping the actions of government

The making of the second Reform Bill Francis Barrymore Smith, **Reification and Representation** Graham Cairns, 2018-08-15 The relationship between politics and the public relations industry is controversial and at times polemic However one component of this relationship that has yet to be investigated is the role of architecture Arguing for a fundamental reconfiguration of our understanding of political architecture this book suggests it is not only a question of constructed buildings but equally a case of mediated imagery Considered through examples of architecture as a backdrop for photo shoots by politicians in the democracies of the United States and the United Kingdom this book suggests these images give us both a better understanding of recent developments in the Western political economy and the architectural and urban developments of the late 20th and early 21st Centuries Using case studies of Margaret Thatcher Tony Blair David Cameron Barack Obama George W Bush and Donald Trump this book represents a ground breaking triangular analysis that will be essential reading for scholars in architecture politics media and communication studies
