Maritime Sector Institutions And Sea Power Of Premodern China:

Maritime Sector, Institutions, and Sea Power of Premodern China K. Gang Deng, 1999-10-30 Challenging the stereotype of premodern China as an agricultural nation this book examines the development of the maritime sector maritime institutions and sea power in the premodern era Initially discussing topics related to China's exports such as ship design and construction goods produced solely for export capital accumulation and investment in the maritime sector and trade networking the volume goes on to consider the impact of maritime institutions governmental trade and non trade policies and Confucian attitudes toward maritime activities Finally the book shows how China obtained technological economic and naval supremacy in Asian waters until the 18th century and goes on to discuss the reasons for the decline of the maritime sector in the 19th century *China as a Sea Power, 1127-1368* Lo Jung-pang, 2012-01-01 Lo Jung pang argues that during each of the three periods when imperial China embarked on maritime enterprises the Qin and Han dynasties the Sui and early Tang dynasties and Song Yuan and early Ming dynasties coastal states took the initiative at a time when China was divided maritime trade and exploration subsequently peaked when China was strong and unified and declined as Chinese power weakened At such times China's people became absorbed by internal affairs and state policy focused on threats from the north and the west These cycles of maritime activity each lasting roughly five hundred years corresponded with cycles of cohesion and division strength and weakness prosperity and impoverishment expansion and contraction In the early 21st century a strong and outward looking China is again building up its navy and seeking maritime dominance with important implications for trade diplomacy and naval affairs Events will not necessarily follow the same course as in the past but Lo Jung pang's analysis suggests useful questions for the study of events as they unfold and decades to come [China's Marine Legal System and the Law of the Sea](#) Keyuan Zou, 2005-06-01 Being one of the largest coastal States in the world China's marine legal system is significant in the overall development of the international law of the sea This book focuses on the establishment and development of China's marine legal system in the context of the new law of the sea centered on the 1982 United Nations Convention on the Law of the Sea which China ratified in 1996 It consists of five parts concerning respectively a general survey of China's marine legal system navigation and maritime security marine resources management marine environmental protection and marine scientific research China's basic marine laws and regulations are discussed and assessed in detail throughout the book The book is of interest to lawyers whether practicing or academic officials in national governments and international organizations and students and scholars in academia who are interested in international law international relations and ocean affairs **Asian Maritime Power in the 21st Century** Vijay Sakhuja, 2011 Maritime power has been a key defining parameter of economic vitality and geostrategic power of nations This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates exponential expansion of science technology and industrial growth *From Colonial Seaports to Modern*

Coastal Cities Edmund Li Sheng, 2024-01-10 This book explores China's ambition to build itself into a maritime power. Despite having a continental coastline of 18,000 kilometers and territorial waters that cover an area one-third the size of its land mass, China has traditionally been considered a continental power. However, Beijing is currently trying to change this historical situation through two national strategies. This book will use the world island and sea power theories to explore the development of China's maritime power from historical and geopolitical perspectives. Using fieldwork in depth interviews and comprehensive data collection, this book will present a series of compelling examples and vivid stories to help readers understand China's maritime strategies with interest for China scholars, historians, and economists alike. **The Cambridge**

History of the Pacific Ocean: Volume 1, The Pacific Ocean to 1800 Ryan Tucker Jones, Matt K. Matsuda, 2023-01-05 Volume I of *The Cambridge History of the Pacific Ocean* provides a wide-ranging survey of Pacific history to 1800. It focuses on varied concepts of the Pacific environment and its impact on human history, as well as tracing the early exploration and colonization of the Pacific, the evolution of Indigenous maritime cultures after colonization, and the disruptive arrival of Europeans. Bringing together a diversity of subjects and viewpoints, this volume introduces a broad variety of topics engaging fully with emerging environmental and political conflicts over Pacific Ocean spaces. These essays emphasize the impact of the deep history of interactions on and across the Pacific to the present day. **Zheng He's Maritime Voyages (1405-1433)**

and China's Relations with the Indian Ocean World, 2014-08-07 *Zheng He's Maritime Voyages 1405-1433 and China's Relations with the Indian Ocean World: A Multilingual Bibliography* provides a multidisciplinary guide to publications on this great navigator's activities and their impact on Chinese and world history. Admiral Zheng He commanded the fifteenth-century world's largest fleet. In the course of seven voyages made between 1405 and 1433, his massive ships visited over thirty present-day countries in Asia and Africa. Those voyages reflected and reinforced the development of complex networks of trade, migration, cultural exchange, and political interactions between China and the Indian Ocean world. This bibliography lists sources in thirteen languages, including both scholarly studies and popular works like Gavin Menzies's controversial bestsellers claiming the Chinese sailed around the world before Columbus. Relevant translations, transliterations, and annotations are provided to aid the reader. **China and the Silk Roads (ca. 100 BCE to 1800 CE)** Angela

Schottenhammer, 2023-09-14 The book investigates China's relations to the outside world between ca. 100 BCE and 1800 CE. In contrast to most histories of the Silk Roads, the focus of this book clearly lies on the maritime Silk Road and on the period between Tang and high Qing, selecting aspects that have so far been neglected in research on the history of China's relations with the outside world. The author examines, for example, the issue of imperialism in imperial China, the specific role of frontier tribal troops during Song times, the interrelationship between maritime commerce, military expansion, and environmental factors during the Yuan, the question of whether or not early Ming China can be considered a proto-colonialist country, the role of force and violence played during the Zheng He expeditions, and the significance to the Asia-Pacific world.

possessed for late Ming and early Qing rulers *The Global in the Local Xin Zhang*,2023-04-04 In the nineteenth and early twentieth centuries world historic political economic and technological developments transformed everyday life in places like Zhenjiang a midsize Chinese river town Xin Zhang explores the local negotiation of globalization through the experience of Zhenjiang s merchants entrepreneurs and ordinary residents **Why Did Europe Conquer the World?** Philip T. Hoffman,2017-01-24 The startling economic and political answers behind Europe s historical dominance Between 1492 and 1914 Europeans conquered 84 percent of the globe But why did Europe establish global dominance when for centuries the Chinese Japanese Ottomans and South Asians were far more advanced In *Why Did Europe Conquer the World* Philip Hoffman demonstrates that conventional explanations such as geography epidemic disease and the Industrial Revolution fail to provide answers Arguing instead for the pivotal role of economic and political history Hoffman shows that if certain variables had been different Europe would have been eclipsed and another power could have become master of the world Hoffman sheds light on the two millennia of economic political and historical changes that set European states on a distinctive path of development military rivalry and war This resulted in astonishingly rapid growth in Europe s military sector and produced an insurmountable lead in gunpowder technology The consequences determined which states established colonial empires or ran the slave trade and even which economies were the first to industrialize **Debunking traditional arguments Why Did Europe Conquer the World reveals the startling reasons behind Europe s historic global supremacy** *Southeast Asia between China and Japan* Lam Peng Er,Victor Teo,2011-11-15 Triangular relations which frame China and Japan as two sides of an isosceles triangle usually focus on the United States as the significant third side This edited book examines another relatively underexplored set of triangular relations those between China Japan and Southeast Asia The region comprised of eleven small and medium size states is often considered inconsequential in the tempestuous world of international politics where political clout economic prowess military strength and soft power matter most Often seen as easily dominated by extra regional great powers this volume reconsiders the region s relationship with China and Japan their two Asian neighbours to the northeast which also happen to be the world s second and third largest economies While China and Japan do compete for turf in Southeast Asia states in the region do not perceive themselves as strategic pawns of these two great Asian powers but instead as proactively engaging China and Japan in the region The country specific case studies of this book collectively support the thesis that the Southeast Asian states actively seek to manoeuvre between China and Japan for their own advantage and at the same time grapple with developments in Northeast Asia through regional integration efforts Through the establishment of benchmark norms and values Southeast Asia attempts to socialise China and Japan and other external powers to the ASEAN way Indeed Southeast Asia as a region is now the driver of East Asian multilateralism and regionalism and the East Asian reality is that Southeast Asia is a major political economic and cultural player in its own right vis vis the great powers **China in the World Market** Thomas Geoffrey Moore,2002-03-18 This book will be provocative reading for

anyone concerned with China and the world economy **Marco Polo Was in China** Hans Ulrich Vogel,2012-11-21 In Marco Polo was in China Hans Ulrich Vogel offers an innovative look at the highly complex topics of currencies salt production and taxes commercial levies and other kinds of revenue as well as the administrative geography of the Mongol Yuan empire The author s rigorous analysis of Chinese sources and all the important Marco Polo manuscripts as well as his thorough scrutiny of Japanese Chinese and Western scholarship show that the fascinating information contained in Le devisement dou monde agrees almost perfectly with that we find in Chinese sources the latter only available long after Marco Polo s stay in China Hence the author concludes that despite the doubts that have been raised the Venetian was indeed in Khubilai Khan s realm **East Asia Before the West** David Kang,2012 Focusing on the role of the tribute system in maintaining stability in East Asia and in fostering diplomatic and commercial exchange Kang contrasts this history against the example of Europe and the East Asian states skirmishes with nomadic peoples to the north and west Although China has been the unquestioned hegemon in the region with other political units always considered secondary the tributary order entailed military cultural and economic dimensions that afforded its participants immense latitude Europe s Westphalian system on the other hand was based on formal equality among states and balance of power politics resulting in incessant interstate conflict A Past of Possibilities Quentin Deluermoz,Pierre Singaravelou,2021-10-12 An exploration of hypothetical turning points in history from Ancient Greece to September 11 What if history as we know it had run another course Touching on alternate histories of the future and the past or uchronias A Past of Possibilities encourages deeper consideration of watershed moments in the course of history Wide ranging in scope it examines the Boxer Rebellion in China the 1848 revolution in France and the assassination of Archduke Franz Ferdinand in 1914 and integrates science fiction history historiography sociology anthropology and film In probing the genre of literature and history that is fascinated with hypotheticals surrounding key points in history Quentin Deluermoz and Pierre Singaravelou reach beyond a mere reimagining of history exploring the limits and potentials of the futures past From the most bizarre fiction to serious scientific hypothesis they provide a survey of the uses of counterfactual histories methodological issues on the possible in Social Sciences and practical proposals for using alternate histories in research and the wider public *Dictionary of the Ben Cao Gang Mu, Volume 2* Hua Linfu,Paul D. Buell,2015 The Ben cao gang mu compiled in the second half of the sixteenth century by a team led by the physician Li Shizhen 1518-1593 on the basis of previously published books and contemporary knowledge is the largest encyclopedia of natural history in a long tradition of Chinese materia medica works Its description of almost 1 900 pharmaceutically used natural and man-made substances marks the apex of the development of premodern Chinese pharmaceutical knowledge The Ben cao gang mu dictionary offers access to this impressive work of 1 600 000 characters This second book in a three-volume series verifies and localizes all 2 158 geographical and associated administrative names referred to in the Ben cao gang mu in connection with the origin and use of pharmaceutical substances **Arabic Medicine**

in China Paul David Buell, Eugene N. Anderson, 2021-06-22 The Huihui Yaofang was an encyclopedia of Near Eastern medicine compiled under the Mongol Yuan Dynasty for the benefit of themselves and the then Chinese medical establishments. Some 15% of the work survives from a Ming Dynasty edition and is here translated for the first time into English. We extensively introduce the translation with introductions situating it within the history of western and Chinese medicine and provide critical apparatus for understanding. We provide accounts of the medicines and foods with comparisons to other works of the time and to modern folk uses of these medicines in the Middle East. We show that the work is solidly western Asian specifically derived from Persian speaking Central Asia and is adapted to Chinese use in several ways but without losing its western character. *From Object to Concept* Stacey Pierson, 2013-01-01 Ming porcelain is widely regarded among the world's finest cultural treasures. From ordinary household items patiently refined for imperial use, porcelain became a dynamic force in domestic consumption in China and a valuable commodity in export trade. In the modern era it has reached unprecedented heights in art auctions and other avenues of global commerce. This book examines the impact of consumption on the evolution of porcelain and its transformation into a foreign cultural icon. The book begins with an examination of ways in which porcelain was appreciated in Ming China, followed by a discussion of encounters with Ming porcelain in several global regions including Europe and the Americas. The book also looks at the invention of the phrase and concept of the Ming vase in English speaking cultures and concludes with a history of the transformation of Ming porcelain into works of art. *The European Canton Trade 1723* Marlene Kessler, Kristin Lee, Daniel Menning, 2016-06-20 This critically commented source edition contains the commercial directions, merchant diary and naval log of four East India Company ships which sailed from London to Canton, China, in 1723, as well as the travelogue of another contemporary trader who sailed from Ostend. It highlights the roles of cooperation and competition in shaping the relations between these and other European companies as well as the everyday lives of European merchants and mariners. The edition thus sheds new light on the history of the East Indies trade during the eighteenth century and its role in encouraging early modern globalization. [History of Technology Volume 29](#) Ian Inkster, 2016-09-30 The common question from the western point of view is of the sort: why did China lose its early leadership of productive technologies to Europe during the early modern period? Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance. This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of Europe. Our second collection on the Mindful Hand also shifts common ground by querying and modifying common views of the links between knowledge and technique in early modern European development. Scientific or related knowledge was not brought to technique as a socio-cultural gift from an educated elite to the working man. Rather, educated gents, practitioners, instrument makers, craftsfolk and technicians of all kinds intermingled both socially and in terms of the recognition of technical problems as well as in the assemblage of the mental.
