China Goes Global David Shambaugh, 2013-03-07 Eminent China scholar David Shambaugh s China Goes Global is the sweeping synthesis of that nation s growing prominence on the world stage that we have been waiting for Thirty years ago China s role in global affairs beyond its immediate East Asian periphery was decidedly minor Its military was extremely weak and it had little geostrategic power As Shambaugh charts though China s expanding economic power has allowed it extend its reach and influence virtually everywhere After establishing the main precondition the astounding growth of the Chinese

economy Shambaugh turns his focus to the manifestations of China's global ambitions its growing military power characterized best by its current pursuit of a blue water navy its increasing cultural influence i.e. soft power and its new prominence in global governance institutions like the G 20 He is no alarmist however Rather he will draw on his extremely deep knowledge of the subject to offer a balanced and well reasoned account of where China is now and where he thinks it is headed *Report to Congress of the U.S.-China Economic and Security Review Commission* U.S.-China Economic and Security Review Commission,2007 **America's Challenge** Michael D. A War Like No Other Richard C. Bush, Michael E. O'Hanlon, 2007-04-01 Nobody approaches the objectivity and precision of Bush and O'Hanlon when it comes to analysis of the military and political dimensions of the Taiwan issue This is one challenge that U S policymakers and military strategists cannot afford to get wrong and scholars cannot afford to ignore Michael Green former Senior Director for Asian Affairs National Security Council The Showdown to Come In 1995 during a heated discussion about that year's Taiwan crisis a Chinese general remarked to a U S diplomat In the end you care more about Los Angeles than you do about Taipei In a single sentence he both questioned the level of America's commitment to a longtime ally and threatened massive perhaps nuclear retaliation should the United States intervene militarily on Taiwan's behalf In the end President Clinton sent two aircraft carriers to the region and China ceased its military exercises in the Taiwan Strait A decade later however China is much stronger both economically and militarily and it holds a significant amount of America's national debt If another Taiwan crisis should occur as it almost certainly will would China back down In *A War Like No Other* you'll discover how little it would take to transform the close cooperation and friendly rivalry between the United States and the People's Republic of China into the first ever shooting war between two nuclear powers This chilling look into one possible future offers thoughtful advice to both governments on how to reduce the chances of such a nightmare actually occurring

Two Brookings Institution scholars offer specific prescriptions on how the two nations can improve communications especially in times of crisis avoid risky behavior even when provoked and above all remember which buttons not to push

The US-China Military and Defense Relationship during the Obama Presidency James Johnson, 2018-04-28 This book offers a timely and compelling explanation for the deterioration of U S China security relations during the Obama Presidency The U S China relationship has become one of if not the most vital features of contemporary world politics and with arrival the Donald Trump to the White House in 2017 this vital geopolitical relationship sits at a precarious and dangerous crossroads This book assesses a wide array of sources to systematically unpack the policy rhythms drivers and dynamics that defined the course of Sino American security relations during the Obama era It fills several gaps in the literature on international security and conflict and offers a nuanced and innovative comparative approach to examine individual military domains The case study chapters draw on recent Chinese and English sources on military doctrine capabilities and defense strategy to build a clear understanding the main sources of U S China misperceptions and highlight the problems these assessments can create for the conduct of statecraft across strategically competitive geopolitical dyads The book builds a sobering picture of U S China relations that will appeal to specialists and generalists alike with an interest in future warfare emerging military technologies military studies arms control and foreign policy issues in the Asia Pacific region more broadly

PLA Influence on China's National Security Policymaking Phillip C. Saunders, Andrew Scobell, 2015-09-09 In recent years there have been reports of actions purportedly taken by People s Liberation Army PLA units without civilian authorization and of Chinese Communist Party CCP civilian leaders seeking to curry favor with the military suggesting that a nationalistic and increasingly influential PLA is driving more assertive Chinese policies on a range of military and sovereignty issues To many experienced PLA watchers however the PLA remains a party army that is responsive to orders from the CCP PLA Influence on China s National Security Policymaking seeks to assess the real relationship between the PLA and its civilian masters by moving beyond media and pundit speculation to mount an in depth examination and explanation of the PLA s role in national security policymaking After examining the structural factors that shape PLA interactions with the Party State the book uses case studies to explore the PLA s role in foreign policy crises It then assesses the PLA s role in China s territorial disputes and in military interactions with civilian government and business exploring the military s role in China s civil military integration development strategy The evidence reveals that today s PLA does appear to have more influence on purely military issues than in the past but much less influence on political issues and to be more actively engaged in policy debates on mixed civil military issues where military equities are at stake

Handbook of Military Administration Jeffrey A. Weber, Johan Eliasson, 2007-12-07 While policy makers are perpetually conceptualizing new reform packages the actual enactment of those reforms is typically more challenging Remarkably the one public institution that is able to meet that challenge is also the largest The United States Department of Defense which

employs over 600 000 people and deals with 500 billion in fundin *Shaping China's Security Environment* Andrew Scobell, Larry M. Wortzel, 2006 The contributions contained herein address the role of the Chinese military in shaping its country s security environment Of course the PLA itself is shaped and molded by both domestic and foreign influences In the first decade of the 21st century the PLA is not a central actor in China s foreign policy the way it was just a few decades ago Nevertheless the significance of the PLA must be understood The military remains a player that seeks to play a role and influence China s policy towards such countries and regions as the United States Japan the Koreas Southeast Asia South Asia and of course Taiwan It is important not to overlook that in times of crisis or conflict the role and influence of the PLA rise significantly
