Construction Digitalisation Douglas Aghimien,Clinton

Aigbavboa,Ayodeji Oke,Wellington Thwala,2021-07-25 This book explores construction digitalisation particularly in developing countries The book conceptualises a digitalisation capability maturity model that will enable construction organisations to self assess and benchmark their digital capabilities in their quest for digital transformation Digitalisation offers a significant solution to the age long problems of the construction industry Research shows that when construction organisations transform from a traditional service delivery approach to a more digitalised approach significant improvement in project delivery and better competitive advantage for these organisations will be attained The attainment of these benefits is evident in developed countries where the digitalisation of construction activities continues apace Unfortunately the story is not the same for construction organisations in developing economies While some organisations might be willing to be digitally transformed most have no clue how to go about it To this end this book provides guidelines for construction organisations seeking to transform their entities digitally Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries
