**Darwin's Psychology** Ben Bradley, 2020-09-11 Darwin has long been hailed as forefather to behavioural science especially nowadays with the growing popularity of evolutionary psychologies Yet until now his contribution to the field of psychology has been somewhat understated This is the first book ever to examine the riches of what Darwin himself wrote about psychological matters It unearths a Darwin new to contemporary science whose first concern is the agency of organisms from which he derives both his psychology and his theory of evolution A deep reading of Darwin s writings on climbing plants and babies blushing and bower birds worms and facial movements shows that for Darwin evolution does not explain everything about human action Group life and culture are also keys whether we discuss the dynamics of conscience or the dramas of desire Thus his treatment of facial actions sets out from the anatomy and physiology of human facial movements and shows how these gain meanings through their recognition by others A discussion of blushing extends his theory to the way reading others expressions rebounds on ourselves I care about how I think you read me This dynamic proves central to how Darwin understands sexual desire the production of conscience and of social standards through group dynamics and the role of culture in human agency Presenting a new Darwin to science and showing how widely Darwin s understanding of evolution and agency has been misunderstood and misrepresented in biology and the social sciences this important new book lights a new way forward for those who want to build psychology on the foundation of evolutionary biology      Charles Dickens in Cyberspace Jay Clayton, 2003-08-07 Charles Dickens in Cyberspace opens a window on a startling set of literary and scientific links between contemporary American culture and the nineteenth century heritage it often repudiates Surveying a wide range of novelists scientists filmmakers and theorists from the past two centuries Jay Clayton traces the concealed circuits that connect the telegraph with the Internet Charles Babbage s Difference Engine with the digital computer Frankenstein s monster with cyborgs and clones and Dickens life and fiction with all manner of contemporary popular culture from comic books and advertising to recent novels and films In the process Clayton argues for two important principles that postmodernism has a hidden or repressed connection with the nineteenth century and that revealing those connections can aid in the development of a historical cultural studies In Charles Dickens in Cyberspace nineteenth century figures Jane Austen Charles Darwin Charles Dickens Thomas Hardy Henry James Ada Lovelace Joseph Paxton Mary Shelley and Mary Somerville meet a lively group of counterparts from today Andrea Barrett Greg Bear Peter Carey H l ne Cixous Alfonso Cuar n William Gibson Donna Haraway David Lean Richard Powers Salman Rushdie Ridley Scott Susan Sontag Neal Stephenson Bruce Sterling and Tom Stoppard The juxtaposition of such a diverse cast of characters leads

to a new way of understanding the undisciplined culture the two eras share an understanding that can suggest ways to heal the gap that has long separated literature from science Combining storytelling and scholarship this engaging study demonstrates in its own practice the value of a self reflective stance toward cultural history Its personal voice narrative strategies multiple points of view recursive loops and irony emphasize the improvisational nature of the methods it employs Yet its argument is serious and urgent that the afterlife of the nineteenth century continues to shape the present in diverse and sometimes conflicting ways
