Muelos A Stone Age Superstition About Sexuality:

Muelos Weston La Barre, 1984 No area of the world has been viewed by Americans with greater moral disapproval and yet less attention than southern Africa writes Anthony Lake in the introduction to *The Tar Baby* Option Feeling that there is much to be learned from an examination of the American response to the Rhodesian problem he offers a detailed account of America's Southern Rhodesia policy since the Smith government's unilateral declaration of independence from Great Britain in 1965 The book provides information essential to an understanding of the American approach to the current crisis in the region The author's use of previously undisclosed materials and interviews with U S foreign policymakers gives the reader an inside look not only at the Rhodesian question but also at the politics of American foreign policy **Muelos** Weston La Barre, 1984 The Origins and Role of Same-Sex Relations in Human Societies James Neill, 2011-10-17 This groundbreaking work draws on a vast range of research into human sexuality to demonstrate that homosexuality is not a phenomenon limited to a small minority of society but is an aspect of a complex sexual harmony that the human race inherited from its animal ancestors Through a survey of the patterns of sexual expression found among animals and among societies around the world and an examination of the functional role homosexual behavior has played among animal species and human societies alike the author arrives at some provocative conclusions that a homosexual or bisexual phase is a normal part of sexual development that same sex relations play an important balancing role in regulating human reproduction that many societies have institutionalized homosexual traditions in the past and that the harsh condemnation of homosexuality in Western society is a relatively recent phenomenon unique among world societies throughout history This well researched and meticulously documented book is the first that integrates into a coherent picture the startling revelations about human sexuality coming from the recent work of sexual researchers psychologists anthropologists and historians The view that emerges of an ambisexual human species whose complex sexual harmony is being thwarted by the imposition of an artificial understanding of nature represents a new way of thinking about sex *The Encultured Brain* Daniel H. Lende, Greg Downey, 2012-08-24 Basic concepts and case studies from an emerging field that investigates human capacities and pathologies at the intersection of brain and culture The brain and the nervous system are our most cultural organs Our nervous system is especially immature at birth our brain disproportionately small in relation to its adult size and open to cultural sculpting at multiple levels Recognizing this the new field of neuroanthropology places the brain at the center of discussions about human nature and culture Anthropology offers brain science more robust accounts of enculturation to explain observable difference in brain function neuroscience offers anthropology evidence of neuroplasticity's role in social and cultural dynamics This book provides a foundational text for neuroanthropology offering basic concepts and case studies at the intersection of brain and culture After an overview of the field and background information on recent research in biology a series of case studies demonstrate neuroanthropology in practice Contributors first focus on capabilities and skills including memory in medical

practice skill acquisition in martial arts and the role of humor in coping with breast cancer treatment and recovery then report on problems and pathologies that range from post traumatic stress disorder among veterans to smoking as a part of college social life Contributors Mauro C Baileiro Kathryn Bouskill Rachel S Brezis Benjamin Campbell Greg Downey Jos Ernesto dos Santos William W Dressler Erin P Finley Agust n Fuentes M Cameron Hay Daniel H Lende Katherine C MacKinnon Katja Pettinen Peter G Stromberg

Classics Phyllis Culham,1989 Books like The Closing of the American Mind and debates like the one over the Stanford reading list have called for reconsideration of the role of the Greek and Roman classics in American education This collection meets that challenge by offering classicists of divergent viewpoints the opportunity to rethink Classics as a discipline Contents The State of the Classics Classics as a Profession Classics as an Academic Discipline and The Classics Community

Sexuality and the Devil Edward J. Tejirian,2016-06-10 At the time of publication our understanding of sexuality relied heavily on biology and also on morality as was particularly evident when homosexuality and bisexuality were discussed In this title originally published in 1990 the author presents a compelling case for viewing the sexual dimension of life through an understanding of its symbols The potent figure of the devil serves as his avenue of approach In the first part of the book the author presents a detailed case history of a young man who began psychoanalytic therapy with him because of a terrifying conviction that he could be possessed by the devil In the course of therapy it emerged that the devil had entered into his consciousness as a vehicle to express a complex of homosexual wishes and fears that were deeply troubling to a man whose life history had been entirely heterosexual The author argues that the assumptions about male psychology that came to pervade psychoanalytic theory after Freud s death could not account for the nature of this young man s conflicts or for the outcome of the analysis In the second part of the book the author cites historical and anthropological data to demonstrate that the depth and breadth of male psychology extend beyond the limits of what was considered normal by the neoconservative theorists who revised Freud s theories to exclude his ideas about bisexuality Rejecting the reduction of sexuality to biology the author asserts that sexuality can be properly regarded as symbolic in the same way that meaningful works of art and rituals are symbolic The power of sexual images and actions comes from their ability to combine important meaning with intensely felt emotion Finally the author examines the way in which culture affects sexuality through its control of consciousness and its influence on what kinds of sexual symbols may be utilized and what kinds of meanings they may express

Censoring Sex Research Thomas K Hubbard,Beert Verstraete,2016-06-16 This volume sheds light on one of the most explosive episodes of censure of academic scholarship in recent decades Bruce Rind a former psychology professor at Temple University investigated sexual relations between male adults and adolescents through history and across cultures from highly institutionalized relationships in Ancient Greece and Rome to 33 contemporary cultures including the USA and among various species His conclusions that

these relations when consensual are not always negative was radical but based in his research findings Even before publication of an invited article on the topic he was subjected to intensive attacks censured and censored This book presents a substantially extended version of Rind s original unpublished article plus 12 scholarly responses to his work that argue for or against Rind s conclusions or offer useful context on his work For anyone interested in sex research and the academic freedom issues surrounding it whether supportive of or vehemently opposed to Rind s ideas this book is a must read **The Mainland Haole** Elvi W. Whittaker, 1986 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government s responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Toyko District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi s investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

The Return of Science Philip Pomper, David Gary Shaw, 2002 In this collection of essays historians discuss the applications of evolutionary theory to cultural social economic and political phenomena William H McNeill presents a magisterial statement about the convergence of the sciences toward an evolutionary worldview Several contributors offer support for this thesis Anthropologist Donald Brown and archaeologist Albert Naccache bring together the realms of biology and culture in examinations of evolved human features and modes of evolution Demographer Noel Bonneuil and neuroscientist Alonso Pena apply mathematics to historical evolutionary processes such as the decision making of human agents and cultural diffusion
