Ngos States And Donors Too Close For Comfort:

NGOs, States and Donors David Hulme, Michael Edwards, 1997 *Non-Governmental Organizations, Management and Development* David Lewis, 2014-03-05 Non Governmental Development Organizations have seen turbulent times over the decades however recent years have seen them grow to occupy high profile positions in the fight against poverty They are now seen as an important element of civil society a concept that has been given increasing importance by global policy makers This book has evolved during the course of that period to be a prime resource for those working or wishing to work with and for NGOs The third edition of *Non Governmental Organizations Management and Development* is fully updated and thoroughly reorganized covering key issues including but not limited to debates on the changing global context of international development and the changing concepts and practices used by NGOs The interdisciplinary approach employed by David Lewis results in an impressive text that draws upon current research in non profit management development management public management and management theory exploring the activities relationships and internal structure of the NGO This book remains the first and only comprehensive and academically grounded guide to the issues facing international development NGOs as they operate in increasingly complex and challenging conditions around the world It is the perfect resource for students undertaking studies of NGOs and the non profit sector in addition to being an excellent resource for development studies students more generally

Hazards, Risks, and Disasters in Society Andrew E. Collins, Jones Samantha, Bernard Manyena, Janaka Jayawickrama, 2014-11-21 *Hazards Risks and Disasters in Society* provides analyses of environmentally related catastrophes within society in historical political and economic contexts Personal and corporate culture mediates how people may become more vulnerable or resilient to hazard exposure Societies that strengthen themselves or are strengthened mitigate decline and resultant further exposure to what are largely human induced risks of environmental social and economic degradation This book outlines why it is important to explore in more depth the relationships between environmental hazards risk and disasters in society It presents challenges presented by mainstream and non mainstream approaches to the human side of disaster studies By hazard categories this book includes critical processes and outcomes that significantly disrupt human wellbeing over brief or long time frames Whilst hazards risks and disasters impact society individuals groups institutions and organisations offset the effects by becoming strong healthy resilient caring and creative Innovations can arise from social organisation in times of crisis This volume includes much of use to practitioners and policy makers needing to address both prevention and response activities Notably as people better engage prevalent hazards and risks they exercise a process that has become known as disaster risk reduction DRR In a context of climatic risks this is also indicative of climate change adaptation CCA Ultimately it represents the quest for development of sustainable environmental and societal futures Throughout the book cases studies are derived from the world of hazards risks and disasters in society Includes sections on prevention of and response to hazards risks and disasters

Provides case studies of prominent societal challenges of hazards risks and disasters Innovative approaches to dealing with disaster drawing from multiple disciplines and sectors

When Women Have Wings Donna F. Murdock,2008 Offers a look at the tensions contradictions and positive moments apparent in one Women s Culture Center in Medellin Columbia This book depicts the frailty and complexity of cross class organizing and the ways this process may be threatened by professionalized NGO styles

Can NGOs Make a Difference? Anthony J. Bebbington,Samuel Hickey,Diana C. Mitlin,2013-04-04 Can non governmental organisations contribute to more socially just alternative forms of development Or are they destined to work at the margins of dominant development models determined by others Addressing this question this book brings together leading international voices from academia NGOs and the social movements It provides a comprehensive update to the NGO literature and a range of critical new directions to thinking and acting around the challenge of development alternatives The book s originality comes from the wide range of new case study material it presents the conceptual approaches it offers for thinking about development alternatives and the practical suggestions for NGOs At the heart of this book is the argument that NGOs can and must re engage with the project of seeking alternative development futures for the world s poorest and more marginal This will require clearer analysis of the contemporary problems of uneven development and a clear understanding of the types of alliances NGOs need to construct with other actors in civil society if they are to mount a credible challenge to disempowering processes of economic social and political development

Beyond Liberal Democracy Daniel A. Bell,2009-01-10 Is liberal democracy appropriate for East Asia In this provocative book Daniel Bell argues for morally legitimate alternatives to Western style liberal democracy in the region Beyond Liberal Democracy which continues the author s influential earlier work is divided into three parts that correspond to the three main hallmarks of liberal democracy human rights democracy and capitalism These features have been modified substantially during their transmission to East Asian societies that have been shaped by nonliberal practices and values Bell points to the dangers of implementing Western style models and proposes alternative justifications and practices that may be more appropriate for East Asian societies If human rights democracy and capitalism are to take root and produce beneficial outcomes in East Asia Bell argues they must be adjusted to contemporary East Asian political and economic realities and to the values of nonliberal East Asian political traditions such as Confucianism and Legalism Local knowledge is therefore essential for realistic and morally informed contributions to debates on political reform in the region as well as for mutual learning and enrichment of political theories Beyond Liberal Democracy is indispensable reading for students and scholars of political theory Asian studies and human rights as well as anyone concerned about China s political and economic future and how Western governments and organizations should engage with China

State Formation in Palestine Inge Amundsen,George Giacaman,Mushtaq Husain Khan,2004-07-08 This book examines key questions and challenges the widely prevalent view that the Palestinian Authority collapsed because of its internal governance failures its lack of commitment to

democracy and corruption It argues that the analytical framework of good governance is not appropriate for assessing state performance in developing countries and that it is especially inappropriate in conflict and post conflict situations Instead an alternative framework is proposed for assessing state performance in a context of economic and social transformation This is then applied in detail to different aspects of state formation in Palestine showing that the institutional architecture set up by the Oslo agreements was responsible for many of the serious failures Encyclopedia of the Developing World Thomas M. Leonard,2013-10-18 A RUSA 2007 Outstanding Reference Title The Encyclopedia of the Developing World is a comprehensive work on the historical and current status of developing countries Containing more than 750 entries the Encyclopedia encompasses primarily the years since 1945 and defines development broadly addressing not only economics but also civil society and social progress Entries cover the most important theories and measurements of development relate historical events movements and concepts to development both internationally and regionally where applicable examine the contributions of the most important persons and organizations and detail the progress made within geographic regions and by individual countries *Civil Life, Globalization and Political Change in Asia* Robert P. Weller,2004-08-02 Academics and policy makers have grown increasingly interested in the ways that non governmental organizations NGOs may encourage better governance democratic politics and perhaps ultimately a global civil society In *Civil Life Globalization and Political Change in Asia* Robert Weller has brought together an international group of experts on the subject whose chapters address these questions through a series of extensive case studies from East and Southeast Asia including Japan China South Korea Taiwan Hong Kong Singapore Indonesia and Vietnam *Community Organization and Development* Steve Clarke,2017-03-23 This book traces the development of community development organization as it evolved separately in Britain and the United States and how the social and political situations in each country determined the various shapes and directions it took In presenting a comprehensive history of the subject *Community Organization and Development* draws on local and international factors that have helped to shape its application and fortunes across varied settings Recent economic and social pressures the changing demographics of developed economies and the rise of social and cultural diversity all contribute to the need for a comprehensive model that can be deployed to effect the necessary social changes required for sustained change with stability The history of this intervention technique throws up many examples from which insight can be gained for the present time and Wales is used as an example of how national policy and local development could be combined for maximum effect *Community development* should become reliable and quantifiable and the comprehensive model developed here demonstrates how and when it should be deployed *Economic Justice in a Flat World* Steven Rundle,2009-08-07 Writers urge the church to help identify the essentials of Christian perspective on the societal environmental and economic implications of globalization and to live accordingly *Human Rights Futures* Stephen Hopgood,Jack Snyder,Leslie Vinjamuri,2017-08-31 For the first time in one collected volume mainstream and critical human

rights scholars together examine the empirical and normative debates around the future of human rights. They ask what makes human rights effective, what strategies will enhance the chances of compliance, what blocks progress, and whether the hope for human rights is entirely misplaced in a rapidly transforming world. Human Rights Futures sees the world as at a crucial juncture. The project for globalizing rights will either continue to be embedded or will fall backward into a maelstrom of nationalist backlash, religious resurgence, and faltering Western power. Each chapter talks directly to the others in an interactive dialogue providing a theoretical and methodological framework for a clear research agenda for the next decade. Scholars, graduate students, and practitioners of political science, history, sociology, law, and development will find much to both challenge and provoke them in this innovative book.

Non-Governmental Development Organizations and the Poverty Reduction Agenda Jonathan Makuwira, 2013-12-04

The Non Governmental Development Organisations (NGDOs) have over the past two decades entered centre stage in their active participation in the social, political, and economic issues affecting both the developing and developed world. This book offers a highly stimulating and concise summary of the NGDO sector by examining their history and metamorphosis, their influence on the social, political, and economic landscapes of the Northern and Southern governments and societies. The author analyses competing theoretical and conceptual debates, not only regarding their contribution to the global social, political dynamism, but also on the sector's changing external influence as they try to mitigate poverty in marginalized communities. This book presents NGDOs as multidimensional actors propelled by the desire to make a lasting change but constrained by market-oriented approaches to development and other factors, both internal and external to their environment. While a lot of attention has been given to understanding international NGDOs like World Vision, International Oxfam, Care International, and Plan International, this book offers a critical analysis of grassroots organizations, those NGDOs founded and established by locals and operate at the deepest end of the development contexts. This work will be of interest to students and scholars in a range of areas including Development Studies, International Organizations, and Globalization.

NGO Field Workers in Bangladesh Mokbul Morshed Ahmad, 2017-11-22

This title was first published in 2002. NGOs are receiving increasing international attention and resources from policy makers, donors, academics, and others. The New Policy Agenda accepts NGOs as agents for social welfare alongside the state and as fostering democracy in the Developing World. Astonishingly, however, there have been very few studies and no books on NGO field workers. This study of field workers in Bangladesh provides excellent insights into this neglected field. Bangladesh is an excellent example as, since independence in 1971, it has been a donor-dependent country, both financially and functionally, and since the 1980s has concentrated this funding towards NGOs rather than to the state. The book shows how field workers are seen simply as implementers carrying out directions given by their superiors and never being consulted on how best to achieve their goals. The book examines four types of NGOs: international, national, regional, and small local, in a number of sample locations. It compares the benefits and facilities provided by each NGO to their field workers, then explores the socio

economic background of both field workers and their mid level managers and examines the interactions between these two groups and between field workers and their clients It also looks at the field workers personal and professional lives and problems and details their opinions on their NGO s activities and policies and on development The findings show that NGO managers and donors lack knowledge of the realities in the field and do not realise how certain policies such as their positive discrimination of women can have negative results It proposes that NGO field workers should be more active in policy making and puts forward several recommendations for changes in the management and structure of future NGOs

Future Positive Michael Edwards,2013-06-17 An optimistic assessment of the prospects for a new international order acting as a counter blast to global pessimism The text explains how the international system operates the pressures it faces and the changes it must undergo and offers concrete ideas to re frame international relations foreign aid and humanitarian intervention without using jargon or simplistic judgements

State & NGOs Shinichi Shigetomi,2003-08-01 There is already much literature on the significance of NGOs in the development process However there has been little discussion on why the NGOs take on different forms in different countries This volume examines the state NGO relationships in fifteen countries It is not however a pot pourri of country reports All the contributors use the same analytical framework and focus on the key concept of the economic and political space for NGOs Readers will find that the analysis of the various NGO forms is well synthesized in this volume

Countering Mission Drift in a Faith-based Organization Peirong Lin,2019-09-27 This book presents the case study of World Vision as a useful contribution in the discussion of mission drift a common phenomenon facing faith based organizations Mission drift has been categorised as a drifting away from the organization s founding mission purpose and identity Practical theological interpretation is undertaken in this case study There are four phases involved in this approach design collection analysis and recommendation In the first phase design the key terms of the dissertation are explicated One key model used is the identity formation model of organizations In the second phase collection the actual collection of the empirical research is documented Empirical research was done in two separate locations where World Vision worked in Papua New Guinea and Nepal In the third phase analyzing the findings of the empirical research are analysed firstly using the identity formation model and more normatively through the use of the normative practice model In the final phase recommendations are made in light of the analysis These recommendations are also framed using the identity formation model with content and process recommendations given

NGOs as Advocates for Development in a Globalising World Barbara Rugendyke,2007-12-12 This book traces the recent historical shift in the policies and practises of development NGOS towards increased advocacy activity as a means of achieving poverty alleviation and increased global equity and through case studies illustrates the impacts of the advocacy activities of a range of international NGOs at different geographical scales

The State and NGOs Shinichi Shigetomi,2002 This volume examines the state NGO relationships in fifteen Asian countries

The Rise of Global Health Joshua K. Leon,2015-02-10

Chronicles the expanding global effort to confront public health challenges Since the year 2000 unprecedented resources have been committed to the complex challenge of developing global public health solutions by national governments multilateral organizations and civil society groups This vast global movement is one of the most remarkable political phenomena of twenty first century international relations but is it working In *The Rise of Global Health* Joshua K Leon argues against the conventional wisdom which argues that collective action on development issues including controversial increases in foreign aid is too inherently inefficient to succeed Leon shows that public action on a global level can successfully pursue health equality Often at the behest of grassroots activists these disparate groups of actors are cooperating more than ever with the aim of improving our human potential through better health Though operating at cross purposes with unequal trade agreements and other factors within the global economy harming the Global South we learn something surprising about global health governance it is evolving in ways more efficient than we think
