Pathway Analysis And Optimization In Metabolic Engineering:

Pathway Analysis and Optimization in Metabolic Engineering Néstor V. Torres, Eberhard O. Voit, 2002-12-19
Facility in the targeted manipulation of the genetic and metabolic composition of organisms combined with unprecedented computational power is forging a niche for a new subspecialty of biotechnology called metabolic engineering. First published in 2002, this book introduces researchers and advanced students in biology and engineering to methods of optimizing biochemical systems of biotechnological relevance. It examines the development of strategies for manipulating metabolic pathways, demonstrates the need for effective systems models, and discusses their design and analysis while placing special emphasis on optimization. The authors propose power law models and methods of biochemical systems theory toward these ends. All concepts are derived from first principles, and the text is richly illustrated with numerous graphs and examples throughout. Special features include nontechnical and technical introductions to models of biochemical systems, a review of basic methods of model design and analysis, concepts of optimization, and detailed case studies. **Metabolic Pathway Engineering** Jean F. Challacombe, 2021-07-14
Metabolic systems engineering combines the tools and approaches of systems biology, synthetic biology, and evolutionary engineering. This book reviews studies on metabolism from the earliest work of Lavoisier and Buchner to current cutting edge research in metabolic systems engineering. This technology has been used in bioengineering applications to create high performing microbes and plants that produce important chemicals, pharmaceuticals, crops, and other natural products. Current applications include optimizing metabolic pathways to enhance degradation of biomass for biofuel production and accelerated processing of environmental waste products and contaminants. The book includes examples to illustrate the applications of this technology in the optimization of metabolic pathways to create robust industrial strains, as well as in the engineering of biological processes involving health and diseases of humans, animals, and plants. Written by a seasoned computational biologist with many years of experience in genomics, bioinformatics, and systems biology, this book will appeal to anyone interested in metabolic systems analysis and metabolic pathway engineering. **Bioprocessing for Value-Added Products from Renewable Resources** Shang-Tian Yang, 2011-08-11
Bioprocessing for Value Added Products from Renewable Resources provides a timely review of new and unconventional techniques for manufacturing high value products based on simple biological material. The book discusses the principles underpinning modern industrial biotechnology and describes a unique collection of novel bioprocesses for a sustainable future. This book begins in a very structured way. It first looks at the modern technologies that form the basis for creating a bio-based industry, before describing the various organisms that are suitable for bioprocessing, from bacteria to algae, as well as their unique characteristics. This is followed by a discussion of novel experimental bioprocesses, such as the production of medicinal chemicals, the production of chiral compounds, and the design of biofuel cells. The book concludes with examples where biological renewable resources become an important feedstock for large scale industrial production. This book is

suitable for researchers practitioners students and consultants in the bioprocess and biotechnology fields and for others who are interested in biotechnology engineering industrial microbiology and chemical engineering Reviews the principles underpinning modern industrial biotechnology Provides a unique collection of novel bioprocesses for a sustainable future Gives examples of economical use of renewable resources as feedstocks Suitable for both non experts and experts in the bioproduct industry Metabolic Engineering in the Post Genomic Era Boris N.
