Pathways To Madness:

Pathways to Madness Jules Henry, 1973 Focuses on the everyday life in five families examining the complexity of family behavior and its relation to mental breakdown and disturbance **Pathways to Madness** Simon Ottenberg, 1972

Pathways to Madness Marc Diamond, Vincent Murphy, Tim McDonough, 1982 **Coming to Narrative** Arthur P Bochner, 2016-06-16 Reflecting on a 50 year university career Distinguished Professor Arthur Bochner former President of the National Communication Association discloses a lived history both academic and personal that has paralleled many of the paradigm shifts in the human sciences inspired by the turn toward narrative He shows how the human sciences especially in his own areas of interpersonal family and communication theory have evolved from sciences directed toward prediction and control to interpretive ones focused on the search for meaning through qualitative narrative and ethnographic modes of inquiry He outlines the theoretical contributions of such luminaries as Bateson Laing Goffman Henry Gergen and Richardson in this transformation Using diverse forms of narration Bochner seamlessly layers theory and story interweaving his professional and personal life with the social and historical contexts in which they developed Ethnic Leadership in a New England Community Alex Huxley Westfried, **The Pathological Family** Deborah Weinstein, 2013-02-15 While iconic popular images celebrated family life during the 1950s and 1960s American families were simultaneously regarded as potentially menacing sources of social disruption The history of family therapy makes the complicated power of the family at midcentury vividly apparent Clinicians developed a new approach to psychotherapy that claimed to locate the cause and treatment of mental illness in observable patterns of family interaction and communication rather than in individual psyches Drawing on cybernetics systems theory and the social and behavioral sciences they ambitiously aimed to cure schizophrenia and stop juvenile delinquency With particular sensitivity to the importance of scientific observation and visual technologies such as one way mirrors and training films in shaping the young field *The Pathological Family* examines how family therapy developed against the intellectual and cultural landscape of postwar America As Deborah Weinstein shows the midcentury expansion of America's therapeutic culture and the postwar fixation on family life profoundly affected one another Family therapists and other postwar commentators alike framed the promotion of democracy in the language of personality formation and psychological health forged in the crucible of the family As therapists in this era shifted their clinical gaze to whole families they nevertheless grappled in particular with the role played by mothers in the onset of their children's aberrant behavior Although attitudes toward family therapy have shifted during intervening generations the relations between family and therapeutic culture remain salient today **Schizophrenia** J. Michael Mahoney, 2011-11 Man has long searched for the cause and meaning of mental illness This book which is a combination of the author's earlier books Volumes One and Two continues in his attempt to answer those questions The author compiler has spent 47 years investigating these problems and his conclusion is that severe unconscious bisexual conflict and confusion lie at the root of all mental illness as

difficult to comprehend as this idea may be The book itself consists of 790 quotations from a variety of sources all of which point to the unshakable truth of this hypothesis This is a fixed law of nature unassailable and constantly operative in every case No other species but man is afflicted with mental illness because no other species has either the intellectual power to repress their sexual feelings nor the motivation to do so The disease we call schizophrenia is but an arbitrary name which is used to designate the end stage of a process beginning with a slight neurosis The more severe the bisexual conflict and confusion in the individual the more severe the degree of the mental illness which is experienced Several other investigators in the past have reached this same conclusion but unfortunately their wisdom went largely unheeded Hopefully this book will remedy that ill advised neglect

Family Life and School Achievement Reginald M. Clark, 2015-07-31 Working mothers broken homes poverty racial or ethnic background poorly educated parents these are the usual reasons given for the academic problems of poor urban children Reginald M Clark contends however that such structural characteristics of families neither predict nor explain the wide variation in academic achievement among children He emphasizes instead the total family life stating that the most important indicators of academic potential are embedded in family culture To support his contentions Clark offers ten intimate portraits of Black families in Chicago Visiting the homes of poor one and two parent

families of high and low achievers Clark made detailed observations on the quality of home life noting how family habits and interactions affect school success and what characteristics of family life provide children with school survival skills a complex of behaviors attitudes and knowledge that are the essential elements in academic success Clark s conclusions lead to exciting implications for educational policy If school achievement is not dependent on family structure or income parents can learn to inculcate school survival skills in their children Clark offers specific suggestions and strategies for use by teachers parents school administrators and social service policy makers but his work will also find an audience in urban anthropology family studies and Black studies
