Pathways to Teaching Linda Peacock, Willa Johnson, 1999-07-01 **Subject Guide to Books in Print**, 1991

Resources in Education, 1986 *Teaching Science and Technology in the Early Years (3-7)* Dan Davies, Alan

Howe, Christopher Collier, Rebecca Digby, Sarah Earle, Kendra McMahon, 2019-04-30 *Teaching Science and Technology in the Early Years 3-7* celebrates young children's amazing capabilities as scientists, designers and technologists. Research based yet practical and accessible, it demonstrates how scientific designing and making activities are natural to young children and have the potential for contributing to all aspects of their learning. By identifying the scientific and technological concepts, skills and activities being developed, the book enables the reader to make more focused diagnostic observations of young children and plan for how they can help move them forward in their learning. This third edition has been thoroughly updated and features fresh insights into young children's learning from neuroscience and new materialist perspectives, a UK wide perspective on Early Years curricula and how they support the inclusion of science and technology as an entitlement for young children, new case studies of successful evidence based Early Years practice alongside new examples of practical planning for learning and advice on documenting children's learning stories, an updated chapter on assessing and documenting children's learning drawing upon findings from the Teacher Assessment in Primary Science TAPS project at Bath Spa University. Based on the latest research and first hand experience, this practical and accessible book is essential reading for Early Years and Primary students on undergraduate PGCE and Masters level courses.

Eventful Learning, 2018-08-14 A rich array of social and cultural theories constitutes a solid foundation that affords unique insights into teaching and learning science and learning to teach science. The approach moves beyond studies in which emotion, cognition and context are often regarded as independent. Collaborative studies advance theory and resolve practical problems such as enhancing learning by managing excess emotions and successfully regulating negative emotions. Multilevel studies address a range of timely issues including emotional energy, discrete emotions, emotion regulation and a host of issues that arose such as managing negative emotions like frustration and anxiety, dealing with disruptive students and regulating negative emotions such as frustration, embarrassment, disgust, shame and anger. A significant outcome is that teachers can play an important role in supporting students to successfully regulate negative emotions and support learning. The book contains a wealth of cutting edge methodologies and methods that will be useful to researchers and the issues addressed are central to teaching and learning in a global context. A unifying methodology is the use of classroom events as the unit for analysis in research that connects to the interests of teacher educators, teachers and researchers who can adapt what we have done and learned and apply it in their local contexts. Event oriented inquiry highlights the transformative potential of research and provides catchy narratives and contextually rich events that have salience to the everyday practices of teachers, teacher educators and researchers. Methods used in the research include emotion diaries in which students keep a log of their

emotions clickers to measure in the moment emotional climate and uses of cogenerative dialogue which caters to diverse voices of students and teachers *Subject Guide to Children's Books in Print 1997* Bowker Editorial Staff, R R Bowker Publishing, 1996-09 Forthcoming Books Rose Arny, 1997-12 **Paperbound Books in Print** , 1992 **Canadian Books in Print.
