unfolding phase It then demonstrates the model in actual analyses of 10 texts transcribed from 10 class hours audio recorded EFL classroom discourse which in turn leads to the establishment of a dynamic system network that can be applied to future analyses of the process of EFL classroom discourse The book also uncovers interesting details about EFL classroom teaching and learning in the Chinese context including variations in the classroom environment features of the interaction process and discourse strategies of the teachers and students It will be essential reading for academics and postgraduates working in the fields of discourse analysis second language acquisition and systemic functional linguistics
