

Geographic Patterns in Global Terrorism

Yourfee Kennedy, Biosphere Reserves Management, Eberswalde University

Abstract

The presence of global terrorism presents a significant peril to the security of nations across the globe, thereby requiring a thorough comprehension of its intricate dynamics. This investigation employs the utilization of tools within the Geographic Information System (GIS) discipline to explore the spatial dispersion of acts of terrorism on a global scale, thereby revealing the existence of concentrated areas, prevailing tendencies, and potential factors that exert influence. While existing scholarly investigations have tackled various facets of terrorism, it is imperative to undertake comprehensive scrutiny of its spatial patterns to develop and implement effective strategies aimed at countering such acts of violence and terror. The literature review underscores the importance of spatial analysis in comprehending the geographical patterns of terrorism. Geographical elements such as proximity to borders or urban centers are identified as potential factors influencing variations in terrorist acts. The research methodology employs a GIS polygon shapefile that encompasses global terrorism data, encompassing attributes such as year, month, day, country, region, attack type, target type, and weapon type. Techniques in spatial analysis, such as hotspot analysis and thematic mapping, are utilized to discern clusters and visually depict the dispersion of terrorist incidents. The amalgamation of spatial and temporal analyses through the utilization of Geographic Information System (GIS) tools furnishes comprehensive insights for policymakers, security agencies, and researchers. The highlighted areas of intensified activity, exceptional occurrences at borders, as well as the prevailing modes of attack and weaponry, establish a solid groundwork for policymaking that is grounded in empirical evidence, as well as for continuous research endeavors within the realm of countering terrorism. Recommendations for prospective research encompass the exploration of socio-political and economic factors that exert influence over terrorism in the aforementioned regions, as well as a more comprehensive examination of the role played by international borders in instances of terrorism. This investigation contributes to the development of efficacious strategies in counterterrorism and enriches our comprehension of the intricate dynamics that underlie global terrorism.

Keywords: Geographic patterns, global terrorism, counterterrorism, spatial analysis, terrorism incidents, GIS tools, international borders, temporal trends, armed attacks, explosive weapons
