Patty's Toxicology Mini Set Organics:

Patty's Toxicology Mini Set Volumes Four, Five, Six, and Seven - Organics Eula Bingham, Barbara Cohrssen, 2001-12-26

These volumes are arranged according to the complexity of the organic compound. In Volume 4 the chapters begin with simple organic compounds; the aliphatic hydrocarbons proceed to alicyclic hydrocarbons and then go on to the aromatic hydrocarbons. Many of the contributors to Volume 4 are well recognized for their research in the area of organic compounds. Volume 5 continues the complexity of the organic compounds with chapters on halogenated hydrocarbons, aliphatic carboxylic acids, ethers, and aldehydes. These chapters have been updated from previous Patty's editions. Volume 6 contains chapters on ketones, alcohols, esters, epoxy compounds, and organic peroxides. Volume 7 continues the coverage of the toxicology of organic compounds including polymers, polyurethanes, glycols, organic sulfur compounds, and organophosphate compounds, pesticides. All chapters are significantly revised and updated from previous Patty's editions. *Patty's*

Toxicology, 6 Volume Set Eula Bingham, Barbara Cohrssen, 2012-07-31. Featuring the improved format used in the 5th edition, this updated set presents in logical groupings comprehensive toxicological data for industrial compounds including CAS numbers, physical and chemical properties, exposure limits, and biological tolerance values for occupational exposures, making it essential for toxicologists and industrial hygienists. This edition has about 40% new authors who have brought a new and international perspective to interpreting industrial toxicology and discusses new subjects such as nanotechnology, flavorings, and the food industry, reactive chemical control, comprehensive chemical policy, metalworking fluids, and pharmaceuticals.

Encyclopedia of Cancer and Society Graham A. Colditz, 2007-09-12. This encyclopedia will define the issues that surround cancer and its effects on society. Patty's Toxicology, Ketones/Alcohols/Esters/Epoxy Compounds/Organic Peroxides Eula Bingham, Barbara Cohrssen, Charles H. Powell, 2001-01-16. PATTY'S has become one of Wiley's flagship publications in occupational health and safety, and the toxicology volumes give proof to the growth and development of the field of toxicology. What began as a single volume devoted to the field with the first edition in 1948, Patty's has now mushroomed into eight. This Fifth Edition will permit us to bring about many badly needed changes to the format and organization of the toxicology volumes. In addition to standardizing the format and sequence in which toxicologic data is presented for all of the compounds, the compounds will be organized according to logical groupings; e.g., the metals will be covered in 23 separate chapters making up Volumes II and III. Vol IV will contain four chapters on aromatic hydrocarbons and 7 chapters on organic nitrogen compounds. Vol V will contain eight chapters on organic halogenated hydrocarbons and four on aliphatic carboxylic acids. Vol VI will feature three chapters on ketones, two on alcohols, and five on esters, and Vol VII will include four chapters on epoxy compounds, two on glycol ethers, and eight on synthetic polymers. The reorganization of chapters in Volumes II through VI by itself will vastly facilitate information searching and retrieval. Volume VIII, like Volume I, does not cover compounds but rather other major issues in toxicology, assessment, or other forms of toxic agents. *Kirk-Othmer Concise Encyclopedia of*
