*Ethics and Positive Accounting Theory* Gordon Douglas Richardson, 1995 Positive Accounting Theory and Science Humayun Kabir, 2012 This paper examines the development of positive accounting theory PAT and compares it with three standard accounts of science Popper 1959 Kuhn 1996 and Lakatos 1970 PAT has been one of the most influential accounting research programs during the last four decades One important reason which Watts Zimmerman 1986 have used to popularize and legitimize their approach is that their view of accounting theory is the same as that used in science Thus it is important to examine how far accounting has been successful in imitating natural science and how the development of PAT compares with the three standard accounts of science This paper shows that accounting could not emulate the success of natural

science Further the methodological positions of PAT conform to none of the standard accounts of science Rather PAT contains elements of all three Finally this paper identifies some methodological gaps in PAT
