Positive Classroom Instruction:

Positive Classroom Instruction Fredric H. Jones, 1987 *Positive Classroom Discipline* Fredric H. Jones, 1987

Toward Positive Classroom Discipline Harvey F. Clarizio, 1976 Better Than Carrots or Sticks Dominique

Smith, Douglas Fisher, Nancy Frey, 2015-08-17 ASCD Bestseller Classroom management is traditionally a matter of encouraging good behavior and discouraging bad by doling out rewards and punishments. But studies show that when educators empower students to address and correct misbehavior among themselves, positive results are longer lasting and more wide reaching. In *Better Than Carrots or Sticks*, longtime educators and best-selling authors Dominique Smith, Douglas Fisher, and Nancy Frey provide a practical blueprint for creating a cooperative and respectful classroom climate in which students and teachers work through behavioral issues together. After a comprehensive overview of the roots of the restorative practices movement in schools, the authors explain how to establish procedures and expectations for student behavior that encourage the development of positive interpersonal skills. Develop a nonconfrontational rapport with even the most challenging students and implement conflict resolution strategies that prioritize relationship building and mutual understanding over finger pointing and retribution. Rewards and punishments may help to maintain order in the short term, but they're at best superficially effective and at worst counterproductive. This book will prepare teachers at all levels to ensure that their classrooms are welcoming, enriching, and constructive environments built on collective respect and focused on student achievement.

Creating Responsible Learners Dale Scott Ridley, 1995 In this book, the authors share practical, research-based ideas on how to create a more positive and meaningful environment for learning, as well as ideas for teaching students to be more responsible. There are two broad and related themes that serve as the foundation for the suggestions in this book. First, teachers can create meaningful and positive classroom learning environments by using teaching strategies that meet students' basic affective motivation needs. Second, teachers can create more responsible students by using student-directed forms of discipline that teach them how to make better choices. PsycINFO Database Record. © 2009 APA.
