Bray, Ramsey Koo, 2006-06-28 Hong Kong and Macao have much in common The dominant populations in both territories are Cantonese speaking Chinese both are small in area both are urban societies both have been colonies of European powers and both have undergone political transition to reunification with China Yet in education for reasons that are analysed in this book they are very different The patters of similarities and differences in the two territories make a fascinating basis for comparative study The overarching theme of the book on continuity and change is particularly pertinent following the transition of the two societies of the postcolonial era This thoroughly revised and expanded second edition builds on the widely acclaimed first edition The work has been recognised as a significant contribution to the broad field of comparative education as well as to study of the specific societies which are its main focus **Disentangling Consciencism** Martin Odei Ajei, 2016-12-06 Kwame Nkrumah is globally recognized as a foremost pan Africanist strategist and statesman He is less widely acknowledged as a philosopher in spite of his considerable philosophical training seminal contribution to African political theory and incisive critique of the ethics of international relations Consciencism has the distinctive status of being the only published book that Nkrumah consciously meant to be a work of his philosophy yet it has failed to attract the focused attention of philosophers The chapters in Disentangling Consciencism Essays on Kwame Nkrumah s Philosophy critically explore the metaphysical ethical and political thought expressed in Consciencism In doing so they broaden our understanding of his philosophical ideas and

their relevance for effective African contribution to thought in a contemporary world in which Africa increasingly totters on the margins of international affairs In much of current moral and political thinking there is a tendency to universalize liberal values and neglect non Western philosophical perspectives At the same time global normative thinking is overwhelmingly applied in non Western contexts Writing from across three continents the contributors to this volume establish greater intellectual connection among African Asian and Western academics and their chapters offer explicit perspectives on the value of Nkrumah s philosophy and on the conceptual basis of early post colonial public policy options in Africa A valuable appendix provides the text of speeches delivered at the 1964 launch of Consciencism With insights into numerous dimensions of Nkrumah s philosophy this volume will be of particular interest to students and scholars of philosophy especially of non Western metaphysical moral and political thought and to anyone working in the history of African political theory
