Possessing A Past Tense:

Possessing a Past Tense Harry Emerson Fosdick, 2005-12-01 **Building and Interpreting Possession Sentences** Neil Myler, 2024-02-06 A wide ranging generative analysis of the typology of possession sentences solving long standing puzzles in their syntax and semantics A major question for linguistic theory concerns how the structure of sentences relates to their meaning There is broad agreement in the field that there is some regularity in the way that lexical semantics and syntax are related so that thematic roles the different participant roles in an event agent theme goal etc are predictably associated with particular syntactic positions In this book Neil Myler examines the syntax and semantics of possession sentences which are infamous for appearing to diverge dramatically from this broadly regular pattern On the one hand Myler points out possession sentences have too many meanings in any given language the construction used to express archetypal possessive meanings such as personal ownership is also often used to express other apparently unrelated notions body parts kinship relations and many others On the other hand possession sentences have too many surface structures languages differ markedly in the argument structures used to convey the same possessive meanings Myler argues that recent work on the syntax semantics interface in the generative tradition has developed the tools needed to solve these puzzles Examining and synthesizing ideas from the literature and drawing on data from many languages including some understudied Quechua dialects Myler presents a novel way to understand the apparent irregularity of possession sentences while preserving explanations of general cross linguistic regularities offering a unified approach to the syntax and semantics of possession sentences that can also be integrated into a general theory of argument structure PONS Das große Buch der Verben Englisch , 2018-10-08 Alle Formen und alle Zeiten zum schnellen Nachschlagen Die 555 wichtigsten englischen Verben alphabetisch sortiert Alle Verbgruppen ber cksichtigt unregelm ige und regelm ige Verben Modalverben reflexive Verben Jedes Verb komplett konjugiert mit allen Formen und in allen Zeiten bersetzung aller Verben ins Deutsche Twelve Tests of Character Harry Emerson Fosdick, 1923 **Language Typology and Language Universals** Martin Haspelmath, 2001 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to

this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume

The Expression of Possession William B. McGregor, 2010-01-13 This collection of nine original articles deals with the expression of possession at various levels of grammar morphological phrasal and syntactic and from a typologically diverse range of languages including Germanic Oceanic Meso American and Australian Aboriginal There are two main aims The first is to reveal something of the range of constructions employed cross linguistically in the expression of possession and second to present an understanding of the possessive relation itself as a cognitive and linguistic phenomenon A guiding principle in the selection of contributors has been to invite linguists whose research while not necessarily directly dealing with possession touches on it and indicates that they are likely to provide fresh perspectives on this well trodden field Key features William McGregor is a well known expert in this field of research Possession is a paradigm for studies on typology ethnology etc because a multitude of linguistic and cultural varieties are reflected in this field new series textbook

Dimensions of Possession Irène Baron, Michael Herslund, Finn Sørensen, 2001-12-04 Few linguistic concepts are more elusive than possession The present collection of articles selected from an international workshop held in Copenhagen in May 1998 confronts the subject from several angles lexicon the semantics of possession and the verb HAVE the syntax of genitives and other possessive structures the interaction of verbal and nominal constructions the semantic and textual implications of the alienable inalienable distinction etc and approaches formal semantics functional semantics and syntax as diachronic and typological comparisons The

languages covered include both European languages such as Danish French Russian Spanish Portuguese and Latin and several American Australian African and Asian languages This volume in which the contributing scholars have sought to examine as many dimensions as possible is of interest to all linguists in particular those working in the field of typology and functional approaches to language

Payne, Immanuel Barshi, 1999

External Possession Constructions EPCs are found in nearly all parts of the world and across widely divergent language families The data rich papers in this first ever volume on EPCs document their typological variability explore diachronic reasons for variations and investigate their functions and theoretical ramifications EPCs code the possessor as a core grammatical relation of the verb and in a constituent separate from that which contains the possessed item Though EPCs express possession they do so without the necessary involvement of a possessive predicate such as have or own In many cases EPCs appear to break the rules about how many arguments a verb of a given valence can have They thus constitute an important limiting case for evaluating theories of the relationship between verbal argument structure and syntactic clause structure They also raise core questions about intersections among verbal valence cognitive event construal voice and language processing **BBEPX!
