Developing the Leaders Around You John C. Maxwell, 1995-02-22 Why do some people achieve great personal success yet never succeed in building a business or making an impact in their organization John C Maxwell knows the answer According to Maxwell the greatest leadership principle that he has ever learned in over thirty five years of leadership is that those closest to the leader will determine the success level of that leader It's not enough for a leader to have vision energy drive and conviction If you want to see your dream come to fruition you must learn how to develop the leaders around you Whether you're the leader of a non-profit organization small business or Fortune 500 company Developing the Leaders Around You can help you to take others to the limits of their potential and your organization to a whole new level Learn how to Create an environment for potential leaders Identify and nurture future leaders Equip and develop leaders Form a dream team of leaders

Leadership Agility Ron Meyer, Ronald Meijers, 2017-09-27 Leadership is about influencing others to move in a certain direction and there are many ways of achieving this influence Each of these leadership styles has its inherent qualities and pitfalls and will be more suited to specific people and different circumstances The more leaders understand their preferred leadership styles and are able to flexibly switch to the most suitable style given the situation the more effective they will be This book maps out ten sets of opposite leadership styles giving readers the possibility to understand the strengths and weaknesses of both sides and to identify their own current preference The ten leadership style dimensions cover the full range of leadership roles from the leader as coach interpersonal leadership to the leader as organizer organizational leadership as strategist strategic leadership as sense maker leadership and mission and as role model leadership and self Readers are invited to draw up their own leadership development plans which is supported by an interactive App Readers are also challenged to reflect on how they would approach a number of cases after which they can go to an interactive web forum to read how others have responded and engage in a discussion with them Leadership Agility is a useful tool for practitioners in the corporate world as well as business students and emerging leaders

Developing the Leaders Around You, *Leadership in Higher Education from a Transrelational Perspective* Christopher M. Branson, Maureen Marra, Margaret Franken, Dawn Penney, 2018-04-05 There is an abundance of research saying that not only is leadership in higher education ineffective but also that it actually undermines the essential work that should be

happening in universities Christopher M Branson Maureen Marra Margaret Franken and Dawn Penney provide a new insight into leadership that has proven to be far more effective for all involved the transrelational approach to leadership This new way of leading places an emphasis on the importance of the relationships that the leader develops with each and every person they are leading However in order to apply this new way of leading higher education institutions must change some of the key ways they work This book provides direction in how this can happen what benefits would result and offers a view on what the future for higher education might be if such changes to leadership are not made Leadership in Higher Education from a Transrelational Perspective both critiques the likely implications of adopting this transrelational form of leadership into a higher educational institution and discusses the implications of not doing so Although a transrelational approach to leadership might seem daunting for higher education institutions to adopt is there any other choice The authors argue that it is inconceivable for institutions founded upon promoting human development as a consequence of research to ignore such research that not only questions the suitability of current leadership practices but also offers a more effective alternative
