Chorin, Ole H Hald, 2014-01-21 *Stochastic Tools in Mathematics and Science* covers basic stochastic tools used in physics chemistry engineering and the life sciences The topics covered include conditional expectations stochastic processes Brownian motion and its relation to partial differential equations Langevin equations the Liouville and Fokker Planck equations as well as Markov chain Monte Carlo algorithms renormalization basic statistical mechanics and generalized Langevin equations and the Mori Zwanzig formalism The applications include sampling algorithms data assimilation prediction from partial data spectral analysis and turbulence The book is based on lecture notes from a class that has attracted graduate and advanced undergraduate students from mathematics and from many other science departments at the University of California Berkeley Each chapter is followed by exercises The book will be useful for scientists and engineers working in a wide range of fields and applications For this new edition the material has been thoroughly reorganized and updated and new sections on scaling sampling filtering and data assimilation based on recent research have been added There are additional figures and exercises Review of earlier edition This is an excellent concise textbook which can be used for self study by graduate and advanced undergraduate students and as a recommended textbook for an introductory course on probabilistic tools in science Mathematical Reviews 2006 [Digital Fabrication in Interior Design](#) Jonathon Anderson, Lois Weinthal, 2021-11-04 *Digital Fabrication in Interior Design* Body Object Enclosure draws together emerging topics of making that span primary forms of craftsmanship to digital fabrication in order to theoretically and practically analyze the innovative and interdisciplinary relationship between digital fabrication technology and interior design The history of making in interior design is aligned with traditional crafts but a parallel discourse with digital fabrication has yet to be made evident This book repositions the praxis of experimental prototyping and integrated technology to show how the use of digital fabrication is inherent to the interior scales of body objects and enclosure These three scales act as a central theme to frame contributions that reinforce the interdisciplinary nature of interior design and reinterpret traditional crafts by integrating new methods of making into conventional workflows Featuring significant international practitioners and researchers the selected contributions represent the ever increasing interdisciplinary nature of design demonstrating a breadth of disciplines A foundational text for interiors students and practitioners *Digital Fabrication in Interior Design* expands the necessary dialogue about digital fabrication at the scale of interiors to inform design theory and practice [Race Becomes Tomorrow](#) Gerald M. Sider, 2015-11-12 *In Race Becomes Tomorrow* Gerald M Sider weaves together stories from his civil rights activism his youth and his experiences as an anthropologist to investigate the dynamic ways race has been constructed and lived in America since the 1960s Tacking between past and present Sider describes how political power economic control and racism inject chaos into the lives of ordinary people especially African

Americans with surprising consequences In addition to recounting his years working on voter registration in rural North Carolina Sider makes connections between numerous issues from sharecropping and deindustrialization to the recessions of the 1970s and 2008 the rise of migrant farm labor and contemporary living wage campaigns Sider s stories whether about cockroach races in immigrant homes degrading labor conditions or the claims and failures of police violence provide numerous entry points into gaining a deeper understanding of how race and power both are and cannot be lived They demonstrate that race is produced and exists in unpredictability and that the transition from yesterday to tomorrow is anything but certain
