Intertextuality and the Reading of Roman Poetry Lowell Edmunds, 2003-05-01 How can we explain the process by which a literary text refers to another text For the past decade and a half intertextuality has been a central concern of scholars and readers of Roman poetry In *Intertextuality and the Reading of Roman Poetry* Lowell Edmunds proceeds from such fundamental concepts as author text and reader which he then applies to passages from Vergil Horace Ovid and Catullus Edmunds combines close readings of poems with analysis of recent theoretical models to argue that allusion has no linguistic or semiotic basis there is nothing in addition to the alluding words that causes the allusion or the reference to be made Intertextuality is a matter of reading *The Cambridge Companion to the Poem* Sean Pryor, 2024-06-06 This Companion offers an engaging and accessible introduction to key concepts in the study of poetry and poetics

Shakespeare's Wordplay and Possible Worlds Georgi Niagolov, *Shakespeare's Wordplay and Possible Worlds* proposes a novel possible world approach to the complex interpretative potential of Shakespeare's wordplay The approach is based on the observation that in Shakespeare multiple significations of ambiguous words or syntactic structures often cohere with other apparently unambiguous words or syntactic structures and thus project parallel cognitive scenarios Therefore the use of possible worlds as cognitive tools allows the exploration of such scenarios in their broadest context and at the same time provides insight into the conceptual blending that occurs between and among them The book demonstrates the utility of the proposed theoretical construct for textual and cultural analysis in three illustrative case studies *Studies in*

Eighteenth-Century British Art and Aesthetics Ralph Cohen, 2023-04-28 **Futures of Enlightenment Poetry** Dustin D. Stewart, 2020-10-30 This book offers a revisionist account of poetry and embodiment from Milton to Romanticism Scholars have made much of the period's theories of matter with some studies equating the eighteenth century's modernity with its materialism Yet the Enlightenment in Britain also brought bold new arguments for the immateriality of spirit and evocative claims about an imminent spirit realm Protestant religious writing was of two minds about futurity swinging back and forth between patience for the resurrected body and desire for the released soul This ancient pattern carried over the book argues into understandings of poetry as a modern devotional practice A range of authors agreed that poems can provide a foretaste of the afterlife but they disagreed about what kind of future state the imagination should seek The mortalist impulse

exemplified by John Milton and by Romantic poets Anna Letitia Barbauld and William Wordsworth is to overcome the temptation of disembodiment and to restore spirit to its rightful home in matter The spiritualist impulse driving eighteenth century verse by Mark Akenside Elizabeth Singer Rowe and Edward Young is to break out of bodily repetition and enjoy the detached soul's freedom in advance Although the study isolates these two tendencies each needed the other as a source in the Enlightenment and their productive opposition didn't end with Romanticism The final chapter identifies an alternative Romantic vision that keeps open the possibility of a disembodied poetics and the introduction considers present day Anglophone writers who put it into practice

Between the Lines: Yang Lian's Poetry through Translation Cosima Bruno, 2012-06-08 In *Between the Lines* Cosima Bruno illustrates how the study of translation can enhance our experience of reading poetry By inquiring into the mutual dependence of the source text and its translation the study offers both theoretical insights and methodological tools that bring in depth stylistic analysis to bear on the translations as against the originals Through such a process of discovery Cosima Bruno elaborates a textual exegesis of the work by Yang Lian one of the most translated and critically acclaimed contemporary Chinese poets This book thus reconciles the theory practice divide in translation studies as well as helps to dismantle the lingering Eurocentrism still present in the discipline

The Play of Light Ann Smock, 2021-02-01 Drawing from five contemporary French poets Jacques Roubaud Emmanuel Hocquard Danielle Collobert Anne Portugal and Jacques Jouet Ann Smock juxtaposes them and provides a milieu suitable for philosophical reflection on identity on not being and being on communication and on secrets Smock also includes thinkers such as Ludwig Wittgenstein and Giorgio Agamben who contribute to the conversation as do Jean Luc Nancy and Maurice Blanchot Though the poems considered here are often thought difficult Smock maintains a light touch throughout She writes in an accessible even pleasurable style while contributing to the scholarly study of literature at the border shared by poetry and philosophy

Psalmody and Poetry in Old Testament Ethics Dirk J. Human, 2012-10-25 Questions arise from scholarly debate in Hebrew Bible ethics such as what is Old Testament ethics what is the object of study what are the methods involved and how

normative are Old Testament ethics for modern contexts These questions advance crucial issues in the quest for understanding ethics of the ancient Hebrew mind and the problem of how to contextualize them in modern contexts This book begins by exploring the relationship between the Old Testament and Ethics as well as a philosophical discussion on meta ethical presuppositions on divinity and morality in the Psalter The main part of the book reflects analyses of specific psalms Pss 16 34 50 72 104 and 133 The core of this section reflects an illustration of psalm texts with the thematic focus on Hebrew ethical thinking Included are a few contextual contributions discussing relevant ethical issues in Africa from an African perspective In the final section two exemplary poetic texts from the Pentateuch Deut 32 and the Prophets Jer 5 reverberate ethical thinking from other parts of the Hebrew canon Polyrhythmicity in Language, Music and Society Richard Andrews, 2021-06-14 This book addresses the complex time relations that occur in some types of jazz and classical music as well as in the novel plays and poetry It discusses these multiple levels of rhythm from a social science as well as an arts and humanities perspective Building on his ground breaking work in *Re framing Literacy A Prosody of Free Verse and Multimodality Poetry and Poetics* the author explores the world of multiple or poly rhythms in music literature and the social sciences He reveals that multi layered rhythms are uncommon and little researched Nevertheless they are important to the experience of art and social situations not least because they link physicality to feeling and to decision making timing as well as to aesthetic experience Whereas most poly rhythmic relations are felt unconsciously this book reveals the complex patterning that underpins the structures of feeling and of experience Poetry of the Possible Joel Nickels, 2012 The abstractions of modernism reimagined as figurations of collective self organization The Etymological Poetry of W.H. Auden, J.H. Prynne, and Paul Muldoon Mia Gaudern, 2020 This volume explores the poetry of W H Auden J H Prynne and Paul Muldoon with specific attention to the ways in which their work has engaged with etymology and the history of language

Problems of Reason: Kant in Context Antonino Falduto, 2024-09-03 This volume aims to make a significant contribution to the debate surrounding the renaissance of Kant studies in the last few decades with a particular emphasis upon some problems of reason Like no other Kant covered the entire breadth of the modern debate concerning the concept of reason and its forms Accordingly despite the range of topics this volume inevitably deals with Immanuel Kant remains the common point of reference for all contributions The volume is divided into two sections The first section is dedicated to Kant's philosophy in particular and its relationship with the philosophies of Kant's predecessors From the perspective of the history of philosophy interpretations of the significance of different philosophical traditions concerning Kant's thought will be given and of the relationship of Kant's thought to the problems of reason with which Kant and his predecessors dealt The second section is dedicated to the legacy of Kant's philosophy The relevance of the concept of rationality for the genesis and systematics of post Kantian ideas of rationality will be discussed and the potential of Kant's critical philosophy for contemporary thought as well will be examined *Multimodality, Poetry and Poetics* Richard Andrews, 2018-04-27 This

groundbreaking work takes multimodality studies in a new direction by applying multimodal approaches to the study of poetry and poetics The book examines poetry's visual and formal dimensions applying framing theory to such case studies as Aristotle's Poetics and Robert Lowell's The Heavenly Rain to demonstrate both the implied due to the form's unique relationship with structure imagery and rhythm and explicit forms of multimodality at work an otherwise little explored research strand of multimodality studies The volume explores the theoretical implications of a multimodal approach to poetry and poetics to other art forms and fields of study making this essential reading for students and scholars working at the intersection of language and communication including multimodality discourse analysis and interdisciplinary literary studies

Possible Worlds, Artificial Intelligence, and Narrative Theory Marie-Laure Ryan, 1991 In this important contribution to narrative theory Marie Laure Ryan applies insights from artificial intelligence and the theory of possible worlds to the study of narrative and fiction For Ryan the theory of possible worlds provides a more nuanced way of discussing the commonplace notion of a fictional world while artificial intelligence contributes to narratology and the theory of fiction directly via its researches into the cognitive processes of texts and automatic story generation Although Ryan applies exotic theories to the study of narrative and to fiction her book maintains a solid basis in literary theory and makes the formal models developed by AI researchers accessible to the student of literature By combining the philosophical background of possible world theory with models inspired by AI the book fulfills a pressing need in narratology for new paradigms and an interdisciplinary perspective
