## **Possible Universe:**

Optimism and the Best Possible World Justin J. Daeley, 2025-03-07 This volume presents original essays on the ideas of philosophical optimism and the best possible world. It highlights the historical and philosophical nuances of an idea that remains under-treated within the literature despite its long and influential history. Optimism broadly the thesis that God does the best or that this is the best possible world is often associated with the philosophy of Gottfried Wilhelm Leibniz. However, there exists a rich tradition of philosophical optimism not only after Leibniz but before him as well. The chapters in this volume address the philosophical nuances of optimism within the ancient, medieval, enlightenment, modern, and contemporary eras. They cover a variety of thinkers ranging from Plato, Aquinas, Rousseau, Voltaire, Jonathan Edwards, the new optimists of 19th-century France, and the non-theistic optimists of the 20th century. Optimism and the Best Possible World will be of interest to scholars and advanced students working in philosophy of religion, history of philosophy, religious history, and intellectual history.

**Purpose in the Universe** Tim Mulgan, 2015-10-22 Two familiar worldviews dominate Western philosophy: materialist atheism and the benevolent God of the Abrahamic faiths. Tim Mulgan explores a third way. Ananthropocentric Purposivism claims that there is a cosmic purpose but human beings are irrelevant to it. Purpose in the Universe develops a philosophical case for Ananthropocentric Purposivism that it is at least as strong as the case for either theism or atheism. The book borrows traditional theist arguments to defend a cosmic purpose. These include cosmological, teleological, ontological, meta-ethical, and mystical arguments. It then borrows traditional atheist arguments to reject a human-centred purpose. These include arguments based on evil, diversity, and the scale of the universe. Mulgan also highlights connections between morality and metaphysics, arguing that evaluative premises play a crucial and underappreciated role in metaphysical debates about the existence of God. Ananthropocentric Purposivism mutually supports an austere, consequentialist morality based on objective values. He concludes that by drawing on a range of secular and religious ethical traditions, a non-human-centred cosmic purpose can ground a distinctive human morality. Our moral practices, our view of the moral universe, and our moral theory are all transformed if we shift from the familiar choice between a universe without meaning and a universe where humans matter to the less self-aggrandising thought that while it is about something, the universe is not about us.

Roberts,2008-11-27 John T Roberts presents and defends a radically new theory of laws of nature the Measurability Account Though consistent with a Humean ontology Roberts s theory differs sharply from the most influential Humean theory of laws David Lewis s Best System Analysis Unlike other Humean theories the Measurability Account affirms that there is an important sense in which the laws govern the universe rather than simply describing it economically Yet unlike non Humean theories it requires only minimal metaphysical commitments In this way it combines the advantages of Humean and non Humean approaches to laws while avoiding the pitfalls of each At the heart of the Measurability Account are two new ideas that lawhood is not a property of facts but rather a role that a proposition can play within a scientific theory and that what is essential to laws is that they guarantee the reliability of methods of measuring natural quantities On the basis of these ideas Roberts argues that we can offer an informative and compelling explanation of why laws have the peculiar counterfactual resilience that sets them apart from accidental uniformities      *AQA A-level Philosophy Year 2* Jeremy Hayward,Gerald Jones,Dan Cardinal,2018-05-14 Exam board AQA Level A level Subject Philosophy First teaching September 2017 First exams Summer 2019 Enable students to critically engage with the new 2017 AQA specifications with this accessible Student Book that covers the key concepts and philosophical arguments offers stimulating activities provides a key text anthology and assessment guidance Cements understanding of complex philosophical concepts and encourages students to view ideas from different approaches through clear and detailed coverage of key topics Strengthens students analytical skills to develop their own philosophical interpretations using a variety of inventive and thought provoking practical activities and tasks Encourages students to engage with the anthology texts with references throughout and relevant extracts provided at the back of the book for ease of teaching and studying Stretches students conceptual analysis with extension material Helps AS and A level students to approach their exams with confidence with assessment guidance and support tailored to the AQA requirements

**Counterfactual Thought Experiments in World Politics** Philip E. Tetlock, Aaron Belkin, 2020-06-30 Political scientists often ask themselves what might have been if history had unfolded differently if Stalin had been ousted as General Party Secretary or if the United States had not dropped the bomb on Japan Although scholars sometimes scoff at applying hypothetical reasoning to world politics the contributors to this volume including James Fearon Richard Lebow Margaret Levi Bruce Russett and Barry Weingast find such counterfactual conjectures not only useful but necessary for drawing causal inferences from historical data Given the importance of counterfactuals it is perhaps surprising that we lack standards for evaluating them To fill this gap Philip Tetlock and Aaron Belkin propose a set of criteria for distinguishing plausible from implausible counterfactual conjectures across a wide range of applications The contributors to this volume make use of these and other criteria to evaluate counterfactuals that emerge in diverse methodological contexts including comparative case studies game theory and statistical analysis Taken together these essays go a long way toward establishing a more nuanced and rigorous framework

for assessing counterfactual arguments about world politics in particular and about the social sciences more broadly

**Propositions** Trenton Merricks, 2015-03-26

Propositions has two main goals The first is to show that there are propositions The second is to defend an account of their nature While pursuing these goals Trenton Merricks draws a variety of controversial conclusions about related issues including among others supervenience the nature of possible worlds truths about non existent entities and whether and how logical consequence depends on modal facts An argument is modally valid just in case necessarily if its premises are true then its conclusion is true Propositions begins with the assumption that some arguments are modally valid Merricks then argues that the premises and conclusions of modally valid arguments are not sentences Instead he argues they are propositions So because there are modally valid arguments there are propositions Merricks defends the claim that propositions are not structured and are not sets of possible worlds He thereby presents arguments against the two leading accounts of the nature of propositions Those arguments are intended not only to oppose those accounts but also to deliver conclusions about what a satisfactory account of the nature of propositions should say Of particular importance in this regard

are arguments concerning the alleged explanations of how a set of possible worlds or a structured proposition would manage to represent thing as being a certain way Merricks then defends his own account of the nature of propositions which says only that each proposition is a necessary existent that essentially represents things as being a certain way

**Letters to Doubting Thomas** C. Stephen Layman, 2006-10-16 When people encounter an argument for or against God's existence it often raises more questions than it answers In *Letters to Doubting Thomas* C Stephen Layman offers a fresh insightful approach to the issue of God's existence a way to organize what can seem like a blizzard of claims and concepts bringing clarity to a debate often mired in confusion Layman explores the evidence for the existence of God in a series of fictionalized letters between two characters Zachary a philosopher and Thomas an old college friend who appeals to Zach for help in sorting out his thoughts about God As their correspondence grows Zachary leads Thomas through an informal and highly readable comparison of Naturalism the belief that there is no God and that ultimate reality is physical reality and Theism the idea that there is an almighty perfectly good God In engaging letters that break down complex philosophical arguments into easily digestible bits the two friends delve into such weighty topics as the reliability of religious experience various arguments for God's existence such as the cosmological design and moral arguments the question of free will and the problem of evil A piece at a time they build an argument that shows that Theism on balance provides a better explanation of the world and human life than does Naturalism Here then is a highly accessible account of the major arguments for and against the existence of God capturing some of the best new insights of modern philosophy in a marvelously clear and engaging format

**A Philosophical Approach - Theoretical** Garrison Clifford Gibson, 2017-04-07 A philosophical approach to analyzing human experience inclusive of theology might be regarded as a process of discovery Finding the experience of existing a given and good fact thinking individuals may inquire regarding the nature and way of being and its process of changing in a continuum of form and reform In writing these informal essays and comments on contemporary interests I wanted to put some philosophical intention on it The essays are of a more theoretical nature in comparison to those of my other volumes of *A Philosophical Approach*
