Post-Work Stanley Aronowitz, Jonathan Cutler, 2013-10-18 In *Post Work* Stanley Aronowitz and Jonathan Cutler have collected essays from a variety of scholars to discuss the dreary future of work The introduction *The Post Work Manifesto* provides the framework for a radical reappraisal of work and suggests an alternative organization of labor The provocative essays that follow focus on specific issues that are key to our reconceptualization of the notion and practice of work with coverage of the fight for shorter hours the relationship between school and work and the role of welfare among others Armed with an interdisciplinary approach *Post Work* looks beyond the rancorous debates around welfare politics and lays out the real sources of anxiety in the modern workplace The result is an offering of hope for the future an alternative path for a cybernation where the possibility of less work for a better standard of living is possible *The Knowledge Contract* David B. Downing, 2005-01-01 *The Knowledge Contract* intervenes in the ongoing debates about the changing conditions of higher education in America with a special focus on English studies and the humanities This highly original study integrates three crucial concerns the economic restructuring of higher education the transformation of disciplinary models of teaching and research and the rise of the academic labor movement Whereas most contemporary critiques of higher education have focused on the impact of global economic forces *The Knowledge Contract* adds a new dimension to the discussion by addressing the tensions between disciplinary and nondisciplinary forms of academic work David B Downing draws on several traditions of scholarship histories of the university sociological studies of education critiques of disciplinary and interdisciplinary forms of work histories of academic capitalism and the labor movement and field specific analyses of the history of English studies Building on his analysis Downing develops alternative possibilities to the dominance of disciplinary forms of labor and offers scenarios for creating more equitable working and learning conditions for faculty and students

Community in the Digital Age Andrew Feenberg,Darin Barney,2004-07-26 Is the Internet the key to a reinvigorated public life Or will it fragment society by enabling citizens to associate only with like minded others Online community has provided social researchers with insights into our evolving social life As suburbanization and the breakdown of the extended family and neighborhood isolate individuals more and more the Internet appears as a possible source for reconnection Are virtual communities real enough to support the kind of personal commitment and growth we associate with community life or are they fragile and ultimately unsatisfying substitutes for human interaction Community in the Digital Age features the latest most challenging work in an important and fast changing field providing a forum for some of the leading North American social scientists and philosophers concerned with the social and political implications of this new technology Their provocative arguments touch on all sides of the debate surrounding the Internet community and democracy

Toward an Anti-Capitalist Composition James Rushing Daniel,2022-08-15 In Toward an Anti Capitalist Composition James Rushing Daniel argues that capitalism is eminently responsible for the entangled catastrophes of the twenty first century precarity economic and racial inequality the decline of democratic culture and climate change and that it must accordingly become a central focus in the teaching of writing Delving into pedagogy research and institutional work he calls for an ambitious reimagining of composition as a discipline opposed to capitalism s excesses Drawing on an array of philosophers political theorists and activists Daniel outlines an anti capitalist approach informed by the common a concept theorized by Pierre Dardot and Christian Laval as a solidaristic response to capitalism rooted in inventive political action Rather than relying upon claims of membership or ownership the common supports radical collective acts of remaking that comprehensively reject capitalist logics Applying this approach to collaborative writing student debt working culture and digital writing Daniel

demonstrates how the writing classroom may be oriented toward capitalist harms and prepare students to critique and resist them He likewise employs the common to theorize how anti capitalist interventions beyond the classroom could challenge institutional privatization and oppose the adjunctification of the professoriate Arguing that composition scholars have long neglected marketization and corporate power *Toward an Anti Capitalist Composition* extends a case for adopting a resolute anti capitalist stance in the field and for remaking the university as a site of common work **Never Good Enough** Ariel Ducey,2009 A thoughtful and provocative critique of job training in the health care sector *Poverty and Schooling* Sue Books,Valerie Polakow,2001-10-01 This is a special issue of Educational Studies Volume 32 No 3 from 2001 It s main focus is poverty and schooling with two guest editors that have been deeply involved in research and teaching on the problem of children in poverty for many years and bring their considerable expertise to this excellent collection of scholarship and reviews **The Creative Underground** Paul Clements,2016-09-13 Paul Clements champions the creative underground and expressions of difference through visionary avant garde and resistant ideas This is represented by an admixture of utopian literature manifestos and lifestyles which challenge normality and attempt to reinvent society as practiced for example by radicals in bohemian enclaves or youth subcultures He showcases a range of art and participatory cultural practices that are examined sociopolitically and historically employing key theoretical ideas which highlight their contribution to aesthetic thinking political ideology and public discourse A reevaluation of the arts and progressive modernism can reinvigorate culture through active leisure and post work possibilities beyond materialism and its constraints thereby presenting alternatives to established understandings and everyday cultural processes The book teases out the difficult relationship between the individual culture and society especially in relation to autonomy and marginality while arguing that the creative underground is crucial for a better world as it offers enchantment vitality and hope *Seeing White* Jean Halley,Amy Eshleman,Ramya Mahadevan Vijaya,2022-01-14 *Seeing White* An Introduction to White Privilege and Race Second Edition is an interdisciplinary supplemental textbook that challenges undergraduate students to see race as everyone s issue The book s early chapters establish a solid understanding of privilege and power leading to a critical exploration of discrimination The authors also draw upon key theoretical perspectives such as cultural materialism critical race theory and the social construction of race to provide students with the tools to discuss racial privilege The book s interdisciplinary approach including perspectives from sociology psychology history and economics provides a holistic and accessible introduction to the challenging issue of race Throughout the book compelling concrete examples and detailed definitions of terminology help students to understand theoretical perspectives and research evidence Discussion questions at the end of each chapter encourage students to think critically about the theories and evidence often prompting students to relate the material in the text to their own experiences New to this Edition New Chapter 4 White Supremacy and Other Forms of Everyday Racism provides a history of white supremacy and its links to racism today New research on racial disparities in health equity helps

debunk the idea of race as a biological category Chapter 2 Revised Chapter 6 Socioeconomic Class and White Privilege offers new material on the economic privilege of whiteness and the uneven distribution of American wealth Expanded history and discussion of Immigration laws including Chinese Exclusion Act Immigration Act of 1924 and 1965 Hart Celler Act present immigration in a global context and challenge anti immigration rhetoric New as well as updated stories on exclusion from white spaces and the normativity of white culture engage students in critical reflection **Comparative Education** Robert F. Generations of Social Movements Hélène Le Dantec Lowry,Ambre Ivol,2015-11-17 French political culture has long been seen as a model of leftist militancy while the left in the United States is often perceived in terms of organizational discontinuity Yet the crisis of social democracy today suggests that at a time when the archetypal European welfare state is in danger critics and citizens interested in understanding or reviving progressive politics are invited to consider the United States where modes of creative activism recurrently demonstrate potentialities for a renewed leftist culture Using a transatlantic perspective this volume identifies activist influence through the designation or rejection of specific intellectual and militant figures across generations and it examines various narrative modes used by militants to write their own history
