Democracy and Its Alternatives Richard Rose, William Mishler, Christian Haerpfer, Christian W. Haerpfer, 1998-10-16 The collapse of Communism has created the opportunity for democracy to spread from Prague to the Baltic and Black Seas But the alternatives dictatorship or totalitarian rule are more in keeping with the traditions of Central Europe And for many post Communist societies democracy has come to be associated with inflation unemployment crime and corruption Is it still true then as Winston Churchill suggested a half century ago that people will accept democracy with all its faults because it is better than anything else To find out political scientists Richard Rose William Mishler and Christian Haerpfer examine evidence from post Communist societies in eastern Europe Drawing on data from public opinion and exit polls election results and interviews the authors present testable hypotheses regarding regime change consolidation and prospects for stabilization The authors point out that the abrupt transition to democracy in post Communist countries is normal gradual evolution in the Anglo American way is the exception to the rule While most recent books on democratization focus on Latin America and to some extent Asia the present volume offers a unique look at the process currently under way in nine eastern European countries the Czech Republic Hungary Slovakia Poland Slovenia Bulgaria Romania Belarus and Ukraine Despite the many problems these post Communist societies are experiencing in making the transition to a more open and democratic polity the authors conclude that a little democracy is better than no democracy at all

Building Business in Post-Communist Russia, Eastern Europe, and Eurasia Dinissa Duvanova, 2013-02-18 Prior to 1989 the communist countries of Eastern Europe and the USSR lacked genuine employer and industry associations After the collapse of communism industry associations mushroomed throughout the region Duvanova argues that abusive regulatory regimes discourage the formation of business associations and poor regulatory enforcement tends to encourage associational membership growth Academic research often treats special interest groups as vehicles of protectionism and non productive collusion This book challenges this perspective with evidence of market friendly activities by industry associations and their benign influence on patterns of public governance Careful analysis of cross national quantitative data spanning more than 25 countries and qualitative examination of business associations in Russia Ukraine Kazakhstan and Croatia shows that postcommunist business associations function as substitutes for state and private mechanisms of economic governance These arguments and empirical findings put the long standing issues of economic regulations public goods and collective action in a new theoretical perspective

Varieties of

Post-communist Capitalism Iván Szelényi, Péter Mihályi, 2019-11-26 This book intends to be a contribution to the varieties of capitalism paradigm. The theoretical background is Weber's theory of legitimacy. Was communism ever legitimate? What kind of legitimacy claims were made in the transition from communism to capitalism? Central Europe was closer to the Western liberal model. Russia built capitalism in a patrimonial way. China followed its own unique way, some called it socialism with Chinese characteristics. Putin experiments with an innovation for post-communist capitalism. He confronts the oligarchs and reallocates property from those who challenge his political authority to old and new loyal ones. In conclusion, the central question is to what extent is Putinism a generic model for post-communist capitalism.

Central and East European Politics Sharon L. Wolchik, Jane Leftwich Curry, 2008 This long needed text explores the other half of Europe: the new and future members of the European Union along with the problems and potential they bring to the region and to the world stage. Clear and comprehensive, it offers an authoritative and up-to-date analysis of the transformations and realities in Central and Eastern Europe, the Baltics, and Ukraine. Divided into two parts, the book presents a set of comparative country case studies as well as thematic chapters on key issues including EU and NATO expansion, the economic transition and its social ramifications, the role of women, persistent problems of ethnicity and nationalism, and political reform. Leading scholars provide the historical context for the current situation of each country in the region. They explain how communism ended and how democratic politics has emerged or is struggling to emerge in its wake; how individual countries have transformed their economies; how their populations have been affected by rapid and wrenching change; and how foreign policy making has evolved. For students and specialists alike, this book will be an invaluable resource on the newly democratizing states of Europe.

Institutional Design and Party Government in Post-Communist Europe Csaba Nikolenyi, 2014-10-30 This book examines the institutional foundations of coalition government in the ten post-communist democracies of Eastern and Central Europe for the 1990-2010 period: Bulgaria, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, and Slovenia. Its central argument is that differences in the arrangement of political institutions systematically explain variations in patterns of multi-party government across these states. The book starts with the premise that electoral systems and constitutional provisions about the powers, the structure, and the relationship between parliament and the presidency determine the degree to which political power is dispersed or concentrated in the political system. On the basis of these institutional features, three groups of states are distinguished with regard to their degree of power concentration. The substantive chapters of the book demonstrate how these institutional combinations and differences shape three specific facets of party government which capture the main stages of the lifecycle of coalitions: governments, the formation of electoral coalitions, government formation, and government duration. Specifically, three comparative chapters assess the

impact of institutional power concentration on the size of electoral coalitions the likelihood that political parties form a minority government and the number of days that a government lasts in office The main finding of the book is that power concentration matters political parties in those democracies where institutions are designed to concentrate political power tend to form large electoral coalitions they tend to form majority rather than undersized governments and they build more durable cabinets In addition the book contains a detailed case study of government formation in Hungary and a previously unstudied comparison of indirect presidential elections in four states the Czech Republic Estonia Hungary and Latvia Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu

Change Forces in Post-Communist Eastern Europe John P. Anchan, Michael Fullan, Eleoussa Polyzoi, 2003-12-16 The collapse of communism and the adoption of parliamentary democracy led to rapid and dramatic educational change in countries formerly under the control of the Soviet Union Leaders of the affected countries acknowledged the need to develop educational systems during the rebuilding process and embraced this transformation in a short period of time This has provided researchers with a unique opportunity to investigate educational change as a living laboratory In this book the authors explore the complex nature of change in five former communist countries Russia the Czech Republic Hungary Romania and East Germany The authors consider Educational change as a process rather than as a event A comparison of such changes against a model for educational change developed by Michael Fullan for understanding large scale educational reform Analysis of issues at the national level where the original impetus for change has occurred With contributors from countries affected by such changes this book provides an insight into the process of educational change as a result of revolution rather than evolution This book will be of great interest to academics and researchers of educational change and those involved with educational reform It will also interest those looking at comparative education models and postgraduate students focussing their studies on issues of educational change and reform
