Sarmiento, 2019-01-24 The 2008 economic and financial crisis marked the beginning of a period of social transformation and uncertainty that continues to characterise present and future social development in unplanned and unexpected ways with frequently harmful effects It has highlighted the need for a deeper understanding of crises phenomena and how these affect the overall course of human development On the one hand the social sciences constitute a means for acquiring a better understanding of the character of the rapid and complex social transformations associated with crises On the other hand they can orientate people and social practices on how a greater degree of collective and democratic control can be acquired over the manner and direction of social processes in crises contexts This book brings together a team of international scholars to address the notion of crises Two main strains of inquiry orientate this study First it questions how different sociological and theoretical approaches might contribute to explain crises phenomena analyse their effects and identify their potential future paths of development Secondly it considers how crises processes and their effects on human social existence demand a re

thinking of the role of the social sciences in society and what such a role might be This volume not only opens up future lines of research by providing a comprehensive approach to crises phenomena but also fills an important gap in the literature about crises which is frequently focused on only one of these dimensions and on particular historical contexts rather than producing more comprehensive frameworks regarding the study of crises processes as a whole

On the Future of History Ernst Breisach,2007-11-01 What does postmodernism mean for the future of history Can one still write history in postmodernity To answer questions such as these Ernst Breisach provides the first comprehensive overview of postmodernism and its complex relationship to history and historiography Placing postmodern theories in their intellectual and historical contexts he shows how they are part of broad developments in Western culture Breisach sees postmodernism as neither just a fad nor a universal remedy In clear and concise language he presents and critically evaluates the major views on history held by influential postmodernists such as Derrida Foucault Lyotard and the new narrativists Along the way he introduces to the reader major debates among historians over postmodern theories of evidence objectivity meaning and order truth and the usefulness of history He also discusses new types of history that have emerged as a consequence of postmodernism including cultural history microhistory and new historicism For anyone concerned with the postmodern challenge to history both advocates and critics alike *On the Future of History* will be a welcome guide

Icke,2012 The contemporary Dutch historical theorist and philosopher Frank Ankersmit an erstwhile advocate and promulgator of what has become known as the linguistic turn in historical theory is very well known within the discipline His early position with regard to the historical text is frequently discussed and evaluated today and his writings on the subject are often cited However this former narrativist position so robustly defended by Ankersmit in the past has been progressively marginalized by Ankersmit himself as his current and radically different theoretical position most fully expressed in his recent publication Sublime Historical Experience now takes precedence Frank Ankersmit's Lost Historical Cause is a polemical account of and a suggested explanation for this Ankersmitean trajectory of thought which transported Ankersmit from the sustainable logic of his early work on the narrative form to the arguably unsustainable concept of sublime historical experience At the Limits of History Keith Jenkins,2013-02-01 Why bother with history Keith Jenkins has an answer He helps us re think the end of history as signalled by postmodernity Readers may disagree with him but he never fails to provoke debate about the future of the past Joanna Bourke Professor of History Birkbeck College Keith Jenkins work on historical theory is renowned this collection presents the essential elements of his work over the last fifteen years Here we see Jenkins address the difficult and complex question of defining the limits of history The collection draws together the key pieces of his work in one handy volume encompassing the ever controversial issue of postmodernism and history questions on the end of history and radical history into the future Exchanges with Perez Zagorin and Michael Coleman further illuminate the level of debate that has surrounded postmodernism and which continues to do so An extended introduction and abstracts which contextualize each piece together with a foreword by Hayden White and an afterword by Alun Munslow make this collection essential reading for all those interested in the theory and practice of history and its development over the last few decades
