Post Traditional Societies:

Post-traditional Societies Shmuel Noah Eisenstadt, 1974 There is a constant effort in this volume to reveal the complexity of tradition to explore continuities between past and present and to recognize how these are often expressed in deep relationships between politics and politics The post traditional societies treated in this volume include India and Pakistan the Soviet Union China and Japan Burma Thailand Ceylon Cambodia and Laos Turkey Tunisia Algeria Morocco and Senegal These societies demonstrate the gargantuan dimensions of the task of transforming traditional societies Cover **Risk and**

Society David Denney, 2005-10-03 What does it mean to live in risk society How does the idea of risk change how we live with each other Risk currently dominates individual and collective consciousness Globally insecurity is related to terrorism pollution global epidemics and famine yet smoking sunlight and travel have also become major preoccupations This book provides a powerful and lucid account of risk in society today Denney critically examines the social construction of risk by considering a range of social theories addressing the literature and providing an authoritative guide to the key issues raised An analysis of the nature of risk to aspects of everyday life of the meanings which have been assigned to notions of risk is also considered Finally global themes such as terrorism global regulation governance and developments in international relations are examined This book will be required reading for students of risk within the fields of Sociology International Relations and Media Culture and Communications **Old Age and Agency** Emmanuelle Tulle, 2004 This book is about

rethinking the ways in which we make sense of social action or agency in later life The contributions in this collection challenge traditional academic approaches to the study of later life which arguably often deny older people agency Social gerontology and the wider society should be more reflexive and rather than contribute to the continued marginalisation of older people should draw attention to the extent to which the latter's actions may be understood within the set of normalising discourses which people have to manage and negotiate as they get old The purpose of this collection is to continue this process by providing philosophical theoretical conceptual and empirical direction for a reflexive social gerontology This book argues that the management of later life has become complex caught as it is within a broad discourse which continues to construct old age as a time of decline and dependency but has shifted the burden of responsibility for the avoidance of decline on individuals

Social Policy in a Changing Society Maurice Mullard, Paul Spicker, 2005-08-19 Social Policy in a Changing Society is a critical guide to theories about society exploring the links between social theory and social policy It considers a range of interpretations of changes in society politics and the economy and assesses their practical implications for social welfare Social Policy in a Changing Society will be essential reading for undergraduates studying social policy and sociology Beyond Left and Right Anthony Giddens, 1994 In the wake of the cataclysmic changes that have transformed

the Soviet Union and Eastern European countries since 1989 what can it mean to be politically radical today In this conceptually powerful work the author applies his well known and influential body of ideas about modernity to the present

state and future of radical politics *Post-traditional Societies* ,1972 *Popular Spiritualities* Lynne Hume,2018-05-08 In our contemporary post modern world popular forms of spirituality are increasingly engaging with notions of re enchantment of self and community Not only are narratives of re enchantment appearing in popular culture at the personal and spiritual level but also they are often accompanied by a pragmatic approach that calls for political activism and the desire to change the world to incorporate these new ideas Drawing on case studies of particular groups including pagans witches radical faeries post modern tourists and queer and goddess groups contributors from Australia the UK and North America discuss various forms of spirituality and how they contribute to self knowledge identity and community life The book documents an emerging engagement between new quasi religious groups and political action eco paganism post colonial youth culture and alternative health movements to explore how social change emerges *Self and Social Change* Matthew Adams,2007-05-21 This is a superb book beautifully written lucid and engaging with illuminating critical discussions of the concept of reflexivity psychoanalytic perspectives and Foucaultian analysis locating these theories in up to date research and discussions about class and gender This book will be indispensable as an aid to students looking for an introduction to concepts of the self set in contemporary everyday contexts that they can relate to But it will also be useful to teachers and researchers looking for orientation in a complex and burgeoning field of literature and research Ian Burkitt University of Bradford Matthew Adams provides a clearly written and concise summary of key theoretical accounts of the meaning of social change for psychic life and the experience of self *Self and Social Change* is a terrific book If looking for an accessible introductory text look no further *British Journal of Sociology* How does social change influence selfhood What are the fundamental positions in social theories of the self How are social changes interwoven with our ability to choose our identities and lifestyles This accessible and assured book gives readers a new take on the fundamental question of the relation between the individual and society By offering a thorough informed and critical guide to the field Adams demonstrates how global economic and employment structures neo liberal discourse the role of emotion irrationality and ambiguity are factors that impact upon the shape and resilience of the self Anyone interested in the question of identity and its relation to cultural social economic and political contexts will find this book a God send making it ideal for students and lecturers in cultural studies sociology social psychology and communications *Bringing Forth Prosperity* Benjamin Bobo,2022-09-01 *Path to Capacity Innovation* An Africa MNC Strategic Alliance a policy framework is advanced proposing a strategic alliance between African countries represented by NEPAD and the multinational corporation with input from the NGO and couched upon an NEPAD MNC NGO cross fertilizing integrative structure Capacity innovation is the key to Africa s transformation with the appropriate catalysts innovation and transformation are but a matter of time in gestation The first of two major catalysts necessary to prompting this change so long sought by Africans came at the adoption of the New Partnership for Africa s Development It is one of the most profound collaborations of African Heads of State The second catalyst is proposed in this work in the form of the

multinational corporation as change agent for the innovation process working in alliance with NEPAD as Africa's spokesperson for innovation. The policy framework for African capacity innovation is the material product along with discourse for redress of corruption and security policy narrative for protecting the assets of multinational corporations. Bringing Forth Prosperity: Capacity Innovation in Africa questions capital theory as a development construct and an appropriate platform upon which sustained capacity innovation in Africa may emerge. It explores Africa's road to modernity in the context of selected development constructs and assesses capacity innovation from a top-down/bottom-up perspective purposely to serve as backdrop to the Africa MNC strategic alliance framework. It constructs country capacity ID to identify internal resources available to African countries to support capacity innovation. It conceptualizes the Africa MNC strategic alliance to convey a capacity innovation philosophy. It articulates an African capacity innovation policy framework to guide the Alliance through a series of actions designed to prompt innovation activity and set the continent on a course to sustained transformation and articulates a scheme to protect assets human and physical derived through the Africa MNC strategic alliance.

Durga's Mosque Stephen C Headley, 2003-08-01 For two decades now Stephen C Headley has been one of the most original and systematic ethnographers of Javanese religion and cultural history. No one in contemporary Javanese ethnography has combed through the annals of nineteenth and twentieth century scholarship with as careful an eye for the variety of Javanese traditions. None combines this historical ethnography with as careful and unusual a body of contemporary ethnography. Headley's new book brings these long developed skills to bear on contemporary religious change in the Surakarta region of Central Java. In his analysis of the Durga ritual complex Headley sheds light on one of the most unusual court traditions to have survived in an era of deepening Islamization. Headley's analysis of this ritual complex and its implications for our understanding of popular Javanese religion deserves to be read by all serious students of Java as well as anyone interested in religion in Indonesia. However Headley moves well beyond this unusual ritual complex to take us through the twists and turns of religious culture and politics in what is one of the richest but also most troubled of cultural regions in Java. The result is a rich multi-layered and fascinating study one that changes forever our understanding of Javanese tradition in a Java becoming Islamic. Robert Hefner, Institute on Religion and World Affairs, Boston University.

Studies in Contemporary Jewry Eli Lederhendler, 2001-12-20 Bringing together contributions from established scholars as well as promising younger academics, the seventeenth volume of this established series offers a broad ranging view of why Judaism, a religion whose observance is more honored in the breach than in the observance in most western Jewish communities, has garnered attention, authority and controversy in the late twentieth century. The volume considers the ways in which theological writings, sweeping social change, individual or small group needs and intra-communal diversity have re-energized Judaism even amidst secular trends in America and Israel.

Who Owns Judaism? Eli Lederhendler, 2001 This collection of articles offers a broad ranging view of why Judaism has recently garnered so much attention, intellectual interest and

controversy **Tradition through Modernity** Pertti J. Anttonen, 2005-02-06 In their study of social practices deemed traditional scholars tend to use the concept and idea of tradition as an element of meaning in the practices under investigation But just whose meaning is it Is it a meaning generated by those who study tradition or those whose traditions are being studied In both cases particular criteria for traditionality are employed whether these are explicated or not Individuals and groups will no doubt continue to uphold their traditional practices or refer to their practices as traditional While they are in no way obliged to explicate in analytical terms their criteria for traditionality the same cannot be said for those who make the study of traditions their profession In scholarly analysis traditions need to be explained instead of used as explanations for apparent repetitions and replications or symbolic linking in social practice values history and heritage politics This book takes a closer look at tradition and folklore in order to conceptualize them within discourses on modernity and modernism The first section discusses modern and traditional as modern concepts and the study of folklore as a modern trajectory The underlying tenet here is that non modernity cannot be represented without modern mediation which therefore makes the representations of non modernity epistemologically modern The second section focuses on the nation state of Finland and the nationalistic use of folk traditions in the discursive production of Finnish modernity and its Others The insights are applicable worldwide in discussions on cultural representation Tradition in the Twenty-First Century Trevor J. Blank, Robert Glenn Howard, 2013-05-15 In *Tradition in the Twenty First Century* eight diverse contributors explore the role of tradition in contemporary folkloristics For more than a century folklorists have been interested in locating sources of tradition and accounting for the conceptual boundaries of tradition but in the modern era expanded means of communication research and travel along with globalized cultural and economic interdependence have complicated these pursuits Tradition is thoroughly embedded in both modern life and at the center of folklore studies and a modern understanding of tradition cannot be fully realized without a thoughtful consideration of the past's role in shaping the present Emphasizing how tradition adapts survives thrives and either mutates or remains stable in today's modern world the contributors pay specific attention to how traditions now resist or expedite dissemination and adoption by individuals and communities This complex and intimate portrayal of tradition in the twenty first century offers a comprehensive overview of the folkloristic and popular conceptualizations of tradition from the past to present and presents a thoughtful assessment and projection of how tradition will fare in years to come The book will be useful to advanced undergraduate or graduate courses in folklore and will contribute significantly to the scholarly literature on tradition within the folklore discipline Additional Contributors Simon Bronner Stephen Olbrys Gencarella Merrill Kaplan Lynne S McNeill Elliott Oring Casey R Schmitt and Tok Thompson

Understanding Globalization Kavous Ardalan, 2017-09-08 This book discusses eight dimensions of globalization world order culture the state information technology economics production development and Bretton Woods Institutions from the perspective of four diverse sociological paradigms functionalist interpretive radical humanist and radical structuralist This

multi perspective approach forces readers to abandon their preconceived assumptions and allows them the opportunity to view globalization through new eyes Kavous Ardalan argues that social theory can usefully be conceived in terms of these four key paradigms because each one is founded upon different assumptions about the nature of social science and each one generates useful theories concepts and analytical tools This method facilitates distancing from one's favored paradigm and appreciating other available approaches to better understand social phenomena The knowledge of paradigms increases awareness of the boundaries and limitations of each individual paradigm While most books on the topic focus on particular aspects of globalization from specific viewpoints this fair and unbiased volume provides readers with a balanced understanding of globalization

Development, Power, and the Environment Md Saidul Islam, 2013-06-07 Unmasking the neoliberal paradox this book provides a robust conceptual and theoretical synthesis of development power and the environment With seven case studies on global challenges such as under development food regime climate change dam building identity politics and security vulnerability the book offers a new framework of a double risk society for the Global South With apparent ecological and social limits to neoliberal globalization and development the current levels of consumption are unsustainable inequitable and inaccessible to the majority of humans Power has a great role to play in this global trajectory Though power is one of most pervasive phenomena of human society it is probably one of the least understood concepts The growth of transnational corporations the dominance of world wide financial and political institutions and the extensive influence of media that are nearly monopolized by corporate interests are key factors shaping our global society today In the growing concentration of power in few hands what is apparent is a non apparent nature of power Understanding the interplay of power in the discourse of development is a crucial matter at a time when our planet is in peril both environmentally and socially This book addresses this current crucial need

Octavio Paz Oliver Kozlarek, 2015-07-15 Octavio Paz is one of the most recognized Latin American writers His essays offer a sophisticated critique of global modernity Although his work has advanced many of the arguments that orient our contemporary debates in the social sciences and in philosophy it has hardly ever been seriously taken into consideration in these disciplines The volume suggests that this may have been a mistake Its authors indicate ways in which Paz essays can be read as substantial contributions to the contemporary debates in various fields The aim of this book is to present to a non Spanish speaking

audience some of the discussions about Paz offerings to the ongoing debates It also wants to make a clear statement a critique of our contemporary modernity must go hand in hand with a non exclusive intercultural understanding of Humanism

Overcoming America / America Overcoming Stephen C. Rowe, 2021-07-27 In this new edition of *Overcoming America* America Overcoming Stephen Rowe shows how the COVID 19 pandemic in tandem with Trumpism have brought basic dynamics of the American situation to high relief and hence provide opportunity to address them before it is too late The dynamics he identifies are those of moral disease and political paralysis as symptomatic of the fact that America herself has been overtaken by the modern values which she exported to the rest of the world He points to a way out of the current and potentially fatal malaise and violence join other societies which are also struggling to move beyond the modern and consciously reappropriate those elements of tradition which have to do with cultivation of the mature human being To avoid fundamentalism Rowe discusses how this reappropriation must be undertaken in dialogue with those who also have come to recognize the unsustainable quality of the modern life and who have been able to live beyond the nihilistic wish to tear it down This book supports the call for an emerging global ethic and spirituality providing resources of articulation and interpretation that allow for an ongoing dialogue between traditional and modern values both worthy and problematic in their own ways through which reliable policy and healthy living become possible Introduction to Eastern Thought Mariëtta Tigranovna Stepaniants, 2002 This text looks at the Eastern way of thinking How did philosophy arise What is the origin of order in the universe What is human nature What is truth These questions are answered from the viewpoint of Indian Chinese and Islamic traditions Essays look at how Eastern thought has dealt with Western contact in the 19th and 20th centuries Ancient and modern writings are placed in their cultural context to give access to specific arguments
