Roberson,2025-05-01 Travel writing was the most popular genre of writing in the nineteenth century Initially published in newspapers and journals as dispatches from the road these works allowed readers to join in on fabulous adventures by becoming armchair tourists second hand voyeurs of the peoples and places the writer visited In order to take readers along on their journeys travel writers typically recorded miles covered and dates of travel in a log or diary They also documented key details of the experience itself describing the conditions of the road the people they met and their accommodations food and clothing The nineteenth century specifically offered a form of travel writing that commented on the ruined environment that ran afoul of the century s ethos of progress with voices such as Henry David Thoreau John Muir and John James Audubon exploring a newfound environmental consciousness *Geographies of Travel* is organized geographically by region with essays examining local journeys in the Northeast Midwest Far West and the South This regional arrangement allows readers to consider the geographic imagination of each region and the kinds of travel it invited as well as providing valuable insight on the ways in which Americans reacted to both natural and social regional landscapes Each region is treated chronologically so as to interrogate not only individual narratives but also the ways that travel tourism and modes of transportation evolved over time The work concludes with an examination of Henry James s *The American Scene* in a coda that brings together his astute observations of the Northeast and the South at the turn of the century Occasional interludes point to the ways that travel reverberates in the artistic work of some of the authors making connections between travel and the imagination Mediating the Tourist Experience Jo-Anne Lester,Caroline Scarles,2016-04-29 Traditionally tourism media has referred to the image of destinations constructed through media texts such as brochures and postcards with increasing attention towards other mediascapes such as films and television Yet with prolific advancements in technologies of media communication such traditional formats have experienced a shift in the productive and consumptive practices through which they come into being The possibilities of production and subsequent consumption are unequivocally changing the ways in which tourists imagine understand and engage with destinations This

book therefore explores the role of tourism media and mediating practices in the development of non linear processes of communication and understanding as both producers and consumers come together to negotiate the tourist experience In varying ways it examines the emergent relationships and connections between media practices and tourism practices everyday experiences and encounters of place Collectively the authors in this book address a range of media and technologies from brochures television video and film to mediated virtual spaces such as e brochures Internet cultures social networks and Google Earth In doing so the book highlights the continued significance of media in tourism contexts recognising both traditional and newer technologies and the non linear continuous cycle of mediated representations and experiences

Postcards in the Library Norman D Stevens,2014-01-09 Postcards individually and collectively contain a great deal of information that can be of real value to students and researchers Postcards in the Library gives compelling reasons why libraries should take a far more active and serious interest in establishing and maintaining postcard collections and in encouraging the use of these collections It explains the nature and accessibility of existing postcard collections techniques for acquiring arranging preserving and handling collections and ways to make researchers and patrons aware of these collections Postcards in the Library asserts that in most cases existing postcard collections are a vastly underutilized scholarly resource Editor Norman D Stevens urges librarians to help change this since postcards as items for mass consumption and often with no apparent conscious literary or social purpose are a true reflection of the society in which they were produced Stevens claims that messages written on postcards may also reveal a great deal about individual and or societal attitudes and ideas Chapters in Postcards in the Library are written by librarians who manage postcard collections postcard collectors and researchers Some of the authors have undertaken major research projects that demonstrate the ways in which postcards can be used in research and that have begun to establish a standard methodology for the analysis of postcards They write about major postcard collections including the Institute of Deltiology and the Curt Teich Postcard Archives the use of postcards for scholarly research postcard conservation and preservation arrangement and organization and importance and value Postcards in the Library describes the postcard collections in a variety of libraries of different kinds and sizes and indicates very real ways in which the effective use of postcard collections can result in and contribute to substantive scholarly publications It also offers advice and suggestions on the myriad issues that libraries face in handling these ephemeral fragments of popular culture Special collections librarians postcard collectors postcard dealers and historical societies will find the information in Postcards in the Library refreshing and practical Libraries with established postcard collections or those thinking about developing postcard collections will use it as a valuable planning tool and start to finish guide
