## **Post Cold War Identity Politics Northern:**

Post-Cold War Identity Politics Marko Lehti, David J Smith, 2004-11-23 During the past decade northern Europe has started to assume an identity of its own Categories of East and West have become blurred challenging as well the idea of what it means to be Nordic Post Cold War Identity Politics maps this process in Scandinavia Looking at projects designed to help regional development in the Nordic countries it assesses whether a new way of defining Northernness is emerging The book highlights the existence of co existing and to some extent competing region building projects in northern Europe It demonstrates how they are all efforts by existing nations to redefine their role in Europe at a time of change and points to how they might develop in the future *The Baltic Question During the Cold War* John Hiden, Vahur Made, David J. Smith, 2008-03-07 This edited volume presents a comprehensive analysis of the Baltic question which arose within the context of the Cold War and which has previously received little attention This volume brings together a group of international specialists on the international history of northern Europe It combines country based chapters with more thematic approaches highlighting above all the political dimension of the Baltic question locating it firmly in the context of international politics It explores the policy decision making mechanisms which sustained the Western non recognition of Soviet sovereignty over the Baltic States after 1940 and which eventually led to the legal restoration of the three countries statehood in 1991 The wider international ramifications of this doctrine of legal continuity are also examined within the context both of the Cold War and of relations between post soviet Russia and the enlarging Euro Atlantic area The book ends with an examination of how this Cold War legacy continues to shape relations between Russia and the West **Identity and Foreign Policy** Eiki Berg, Piret Ehin, 2016-05-13 Baltic Russian relations have been complicated and tense since the collapse of the USSR and the restoration of Estonian Latvian and Lithuanian independence Although Baltic accession to the European Union EU has created a new international context for interstate relations in the region enlargement did not bring about the much hoped for improvement in Baltic Russian relations This case study rich volume examines links between identity memory politics and foreign policy It analyzes and explains developments in Baltic Russian relations after both NATO and EU enlargement focusing on the incompatibility of Baltic and Russian post Soviet national identity constructions and the manifestations of this underlying antagonism in bilateral relations and on the broader European and international arena Built on the constructivist perspective in international relations this volume provides a coherent and illuminating account of the dynamics of Baltic Russian relations after NATO and EU enlargement Combining policy relevant analysis with theoretical insights it will meet the needs of academics and students of foreign policy EU external relations and international relations more generally **From Socialist to Post-Socialist Cities** Alexander C. Diener, Joshua Hagen, 2016-04-14 The development of post socialist cities has become a major field of study among critical theorists from across the social sciences and humanities Originally constructed under the dictates of central planners and designed to serve the demands of command

economies post socialist urban centers currently develop at the nexus of varied and often competing economic cultural and political forces Among these nationalist aspirations previously simmering beneath the official rhetoric of communist fraternity and veneer of architectural conformity have emerged as dominant factors shaping the urban landscape This book explores this burgeoning field of research through detailed cases studies relating to the cultural politics of architecture urban planning and identity in the post socialist cities of Eurasia This book was published as a special issue of Nationalities Papers

History in the World Kalle Pihlainen, 2019-03-04 Questions about the relationship between historical research and contemporary social and practical problems have posed a challenge to generations of historians as well as to philosophers and theorists of history In recent years views regarding the isolation of academic history from real world issues and affairs have come under increasing criticism The contributions to this volume all focus on history's role in the world today and on the possibilities for and limits to engagement resulting from disciplinary practices and conventions The authors undertake their assessment of history's relevance in different ways combining case studies of political clashes public debates and practices of commemoration with sophisticated theoretical discussions of identity construction the material manifestations of power and the relationship between historicizing and expectations concerning future actions These studies highlight the difficulty of distinguishing between history and politics and between disciplinary accounts and activism and contribute significantly towards an improved understanding of our relationship with the past This book was originally published as a special issue of Rethinking History

The Baltic as a Multicultural World Marko Lehti, 2005 The end of the Cold War brought the Baltic Sea area into the limelight of political and cultural cooperation Since then the Baltic Sea area has gained a powerful position as a dynamic European sub region Still like other similar kinds of areas defined by a sea or a river the Mediterranean world the Black Sea or the Danube the Baltic Sea area is hard to define and it has as many definitions as there are map makers The sea itself plays a central role but its influence is vague and always contingent This book has sought to introduce multiple insights for focusing on the Baltic All the contributions examine the question of the essence of the Baltic and the source of its unity and in particular concentrate on multi culturality and multi nationality in the Baltic context Some of the contributions survey the whole Baltic Sea area while others concentrate on the Baltic countries and some of them have found the Baltic in the limited environment of parish and town The Baltic is comprehended as a label that opens stimulating possibilities for replacing nation centrism with narratives of another kind extending beyond the current nation states This understanding provides opportunities for defining a multi ethnic multi lingual and multi cultural region and the diversity of identities that has existed

**Unravelling the Baltic Sea Conundrum** Carmen Gebhard, 2009 In the course of the 1990s a variety of regional initiatives and associations emerged in the Baltic Sea Region As a result today

the region features an extremely high concentration of regionalist structures which add up to a tight network of cooperative arrangements that all label themselves as Baltic. The present study looks closely at this specific regional phenomenon, the Baltic Sea Conundrum, by employing a comparative approach. Looking at the cases of Sweden and Finland, their political performance as both regional stakeholders and members of the EU, it is sought to show how in recent years regional agendas have intersected with European issues and vice versa.

Dovile Budryte, 2005

Revisiting the process of political community building in Estonia, Latvia and Lithuania, this book analyzes the roles that international actors have played in these processes and assesses the unintended consequences of this involvement. The study differs from other works on ethnic minorities and nationalism in the former Soviet Union by exploring the use of minority rights discourse and the salience of historical memory. Case studies examine the transformation of nationalism in Estonia, Latvia and Lithuania, all former Soviet republics which have experienced Soviet nationalities policy first hand. Primarily intended for an academic audience and practitioners interested in promoting tolerance in multi-ethnic societies, the book's historical narrative will also appeal to readers with a general interest in the former Soviet Union and post-Communism.
