The Changing Dimensions of Security Dr. Suresh R,2015-10-01 The end of cold war and the on going globalization process along with the proliferation of non traditional threat to security of the nations led to multilateralism in international relations Though the great powers are not ready to accept the new developments the post cold war events such as threat from non state actors to the security of nation the global economic slowdown and global climate change compelled even the most militarily powerful nation to seek multilateral approach to address these trans border menaces The global movements towards democratization and protection and promotion of human rights supported by ICT once again brought individuals

rights and security into focal point It appears that even if nations are secure people living there may not be secure The civil wars taken place in some nation states to protect the rights of multi ethnic groups or the demand for right to self determinations of people are examples of such a situation In this context security means people s security and international efforts are required to ensure people s security from any threat emanates from within or outside the nation states Thus human security assumes great significance in the post cold war era of profoundly interdependent global system There is a blurred boundary between national security and international security on the one hand and the national security and human security on the other hand The initiative taken by the new government at the federal level towards good neighbourhood and better relation with great powers along with focusing more on human security issues appears to be policy in the right direction Again the shift from a land centric security paradigm to maritime security and coastal security are also visible in recent times The book deals with the changing dimensions of security at the theoretical level and a wide spectrum of security issues that India is confronted with and also certain policy options In the theoretical section the strategic doctrine of India is well reviewed and policy options are also explored It covers areas such as biological perspective of security human security perspective energy security and maritime security In addition it also examines some of the bilateral security issues and concerns with neighbouring countries

The Indian Parliament B.L. Shankar,Valerian Rodrigues,2014-12-15 The Parliament is the visible face of democracy in India It is the epicentre of political life public institutions of great verve and a regime of Rights In a first of its kind study this book delves into the lived experience of the Indian Parliament by focusing on three distinct phases the 1950s the 1970s and the 1990s and beyond The authors argue against the widely held notion of its ongoing decline and demonstrate how it has repeatedly and successfully responded to India s changing needs in six decades of existence This comprehensive and authoritative study examines the changing social composition and differing modes of representation that make up the Lok Sabha and critically explores its relation with the Rajya Sabha Developments in the institutional complex of the Parliament including the functioning of the Opposition and the Speaker are traced over time along with the processes of legislation and accountability Major debates in the House are scrutinized and much of the analysis is based on empirical data gathered from surveys circulated among prominent politicians and public intellectuals It also addresses the intricate issue of relations between the Judiciary and the Parliament In its in depth focus on the Lok Sabha the volume highlights the way the Parliament has come to encompass India s proverbial diversity It especially demonstrates the route this institution has taken to engage with fractious issues of diverging linguistic and regional demands

The Harvard-Yenching Institute and Cultural Engineering Shuhua Fan,2014-08-21 Through an empirical multi archival study of a transnational foundation the Harvard Yenching Institute HYI from the 1920s to the early 1950s this book presents the story of transplanting Western American humanities scholarship into Asia China and addresses central questions in U S China relations This book focuses on the HYI s programs in teaching research and publication of Chinese humanities within China

to the early 1950s and to a lesser extent its activities at Harvard that had close ties with its China side Through the HYI story the author examines in depth the cooperation tensions adaptation and integration in the operation management and governance of the HYI s programs on both sides of the Pacific and the complex multi layered interactions between American educators and their Chinese partners treating each side sympathetically but without losing sight of the big picture As the first comprehensive study on the subject the book adopts a concept of cultural engineering which is defined as a conscious design to use cultural heritage to recreate culture in order to promote a society s development to look at key issues in a way which accounts for interactions and initiatives on both sides and shows the difficult path toward developing common interests without neglecting tensions and conflicts thus going beyond the various one sided historiographies which pit Chinese against Americans or nativist rejection of modernity against cultural imperialism The HYI experience in China from the 1920s to the early 1950s resonates down to the present day in American relations with the world The United States faces many similar challenges in the Middle East Asia Africa and Latin America today as in revolutionary China of the 1920s to 1950s Therefore this study offers a window onto many issues relating to cross cultural interactions today especially between the United States and non Western nations
