Postal And Delivery Services Delivering On Competition:

Postal and Delivery Services Michael A. Crew, Paul R. Kleindorfer, 2002-12-31 *Postal and Delivery Services Delivering on Competition* is an indispensable source of information and analysis on the current state of the postal and delivery sector. It offers current insight into strategy regulation as well as the economics of this sector. Issues addressed include international postal policy, the universal service obligation, regulation, competition, entry, the role of scale and scope economies, the nature and role of cost and demand analysis in postal service, productivity, interaction of law and economics, human resources, transition and reform issues. Obtaining the best from Regulation and Competition Michael A. Crew, Menahem Spiegel, 2006-02-20 Deregulation has introduced competition into traditionally monopolistic markets, particularly telecommunications and electric utilities. This book brings together ten essays that were presented at the Center for Research in Regulated Industries at Rutgers University and funded by several regulated companies. The authors, who include young scholars as well as established and highly regarded consultants and researchers, address some of the major issues now facing network industries and regulators: deregulation, competition, stranded assets, diversification, pricing, and mergers and acquisitions. **Services of General**

Economic Interest in EU Competition Law Lei Zhu, 2020-05-08 This book provides a comprehensive examination of the interaction between Services of General Economic Interest (SGEI) and EU competition law, covering in particular Article 106 of the Treaty on the Functioning of the European Union (TFEU) and state aid rules. It also takes the telecommunications, postal service, and transport sectors as case studies, taking into account the technological, economic, and political backgrounds to these sectors. The area of SGEI has undergone fundamental developments over the past three decades, and the most recent changes in the Lisbon Treaty recognizing SGEI as a shared value and granting explicit competence to the EU mark its constitutional significance. The key issue is how to balance economic values underlying competitive markets and non-economic public service values such as universal access to essential services. The essence of the question is the relationship between the market and the state. This controversial issue is addressed through a critical analysis of a number of landmark EU Court judgments and Commission decisions over the decades. Offering a clear appreciation of the evolution of the EU regulatory framework on SGEI that lays out the limits and boundaries within which the Member States define, organize, and fund SGEI, the book is particularly aimed at academics with a research interest in the interaction between public services and EU competition law, but as it also demonstrates clearly how the application of EU competition law has transformed the public utilities sectors, it will be of interest to law makers, legal professionals, and policy makers as well. Dr. Lei Zhu is a Research Associate at the Institute of International Law at Wuhan University in Wuhan, China. He studied at the Institute for Competition and Procurement Studies of the Bangor University Law School in Wales, United Kingdom, where he obtained his PhD.
