Pollard, Doctor Cheryl McEwan, Doctor Alex Hughes, 2011-05-12 Postcolonial approaches to understanding economies are of increasing academic and political significance as questions about the nature of globalisation transnational flows of capital and workers and the making and re making of territorial borders assume centre stage in debates about contemporary economies and policy Despite the growing academic and political urgency in understanding how other cultures encounter the west economics oriented approaches within social sciences have been slow to engage with the ideas and challenges posed by postcolonial critiques In turn postcolonial approaches have been criticised for their simplistic treatment of the economic and for not engaging with existing economic analyses of poverty and wealth creation Utilising examples drawn from India to Latin America and bringing together scholars from a range of disciplines including Geography Economics Development Studies History and Women s Studies Postcolonial Economies breaks new ground in providing a space for nascent debates about postcolonialism and its treatment of the economic *Handbook of Alternative Theories of Political Economy* Stilwell,

Robinson Crusoe's Economic Man Ulla Grapard, Gillian Hewitson, 2012-04-27 In this book economists and literary scholars examine the uses to which the Robinson Crusoe figure has been put by the economics

discipline since the publication of Defoe's novel in 1719. The authors' critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency and that he like other economic agents can be understood independently of historical and cultural specificity. The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts in which for example we find Crusoe is portrayed as a schizophrenic consumer-producer trying to maximize his personal well-being. Using poststructuralist, feminist, postcolonial, Marxist, and literary criticism approaches, the authors of the fourteen chapters in this volume examine and critique some of the deepest fundamental assumptions neoclassical economics hold about human nature, the political economy of colonization, international trade, and the pervasive gendered organization of social relations. The contributors to this volume can be seen as engaging in the emerging conversation between economists and literary scholars known as the New Economic Criticism. They offer unique perspectives on how the economy and economic thought can be read through different disciplinary lenses. Economists pay attention to rhetoric and metaphor deployed in economics, and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts. **The**

Postcolonial Politics of Development Ilan Kapoor, 2008-02-08. This book uses a postcolonial lens to question development's dominant cultural representations and institutional practices, investigating the possibilities for a transformatory postcolonial politics. Ilan Kapoor examines recent development policy initiatives in such areas as governance, human rights, and participation to better understand and contest the production of knowledge in development, its cultural assumptions, power implications, and hegemonic politics. The volume shows how development practitioners and westernized elites/intellectuals are often complicit in this neo-colonial knowledge production. Noble gestures such as giving foreign aid or promoting participation and democracy frequently mask their institutional biases and economic and geopolitical interests while silencing the subaltern/marginalized groups on whose behalf they purportedly work. In response, the book argues for a radical ethical and political self-reflexivity that is vigilant to our reproduction of neo-colonialisms and amenable to public contestation of development priorities. It also underlines subaltern political strategies that can and do lead to greater democratic dialogue. **Routledge Handbook of Marxian Economics** David M. Brennan, David

Kristjanson-Gural, Catherine P. Mulder, Erik K. Olsen, 2017-03-16. Most developed economies are characterized by high levels of inequality and an inability to provide stability or opportunity for many of their citizens. Mainstream economics has proven to be of little assistance in addressing these systemic failures, and this has led both scholars and students to seek alternatives. One such alternative is provided by Marxian economics. In recent decades, the field has seen tremendous theoretical development, and Marxian perspectives have begun to appear in public discourse in unprecedented ways. This handbook contains thirty-seven original essays from a wide range of leading international scholars recognized for their expertise in

Understanding Development Economics Adam Fforde,2014-01-03 Important parts of development practice especially in key institutions such as the World Bank are dominated by economists In contrast Development Studies is largely based upon multidisciplinary work in which anthropologists human geographers sociologists and others play important roles Hence a

tension has arisen between the claims made by Development Economics to be a scientific measurable discipline prone to wide usage of mathematical modelling and the more discursive practice based approach favoured by Development Studies. The aim of this book is to show how the two disciplines have interacted as well as how they differ. This is crucial in forming an understanding of development work and to thinking about why policy recommendations can often lead to severe and continuing problems in developing countries. This book introduces Development Economics to those coming from two different but linked perspectives: economists and students of development who are not economists. In both explaining and critiquing Development Economics, the book is able to suggest the implications of these findings for Development Studies and more broadly for development policy and its outcomes.
