Postcommunist Presidents:

Postcommunist Presidents Ray Taras, 1997-09-11 This book first published in 1997 offers a comparative analysis of the role of presidents in postcommunist states Postcommunist Belarus Stephen White, Elena A. Korosteleva, John Löwenhardt, 2005 Belarus is one of the least studied European states to emerge from the collapse of the Soviet Union in 1991 In fact few Western specialists paid much attention to its affairs during the Soviet era Nevertheless Belarus constitutes an important and sensitive border region between Russia and the western part of the continent In Postcommunist Belarus a stellar group of contributors examines the issues and the search for identity that Belarus has confronted in the period leading up to and following independence The country is run in an authoritarian fashion by President Alexander Lukashenko and many observers both inside and outside Belarus would use the term dictatorship to describe his rule Belarusian authorities prefer to emphasize the strong support of the people for the president and his cautious approach to economic reform It seems unlikely that the country can hold out permanently against the wider pressures of democratization and economic reform that are transforming its neighbors The country's situation offers political scientists many facets for comparison with established models Belarus is grappling with challenges that are conceptual and psychological as much as they are political economic and social Through new research the contributors to Postcommunist Belarus offer an important coherent and comparative perspective on this little known country **Post-Communist and Post-Soviet Parliaments** Philip

Norton, David M. Olson, 2013-09-13 The sudden collapse of communism stimulated both the rapid emergence of fledgling democracies and scholarly attention to the post communist transition These newly democratized parliaments have been described as parliaments in adolescence This book identifies six parliaments which exemplify the wide range of developments in the new post communist political systems from the stable consolidated democracies to the less stable and more authoritarian states within which their respective parliaments function Finally the post communist parliaments are compared with the presumptively more established west European parliaments This book bridges the usual gap in research between the post communist parliaments and more normal democratic parliaments to develop a common legislative research perspective on both new and established parliaments This book was previously published as a special issue of the Journal of Legislative Studies Party Systems in Post-Soviet Countries A. Meleshevich, 2007-01-22 This book conducts a comparative analysis of political institutions and develops rigorous methods suitable for cross national longitudinal analysis An

examination of political party systems in Estonia Latvia Lithuania Russia and Ukraine shows striking differences of degrees and dynamics of political institutionalization in the five nations Political Parties of Eastern Europe: A Guide to Politics in the Post-communist Era Janusz Bugajski, 2020-09-10 This comprehensive one volume guide to politics in Eastern Europe provides a wealth of information on the region The author outlines the emergent political spectrum of parties and coalitions which are described in the 20 country chapters that make up the heart of the book Parties are classified across the political

spectrum and discussed individually in terms of programs leadership and political activity Tables at the end of each country chapter present basic political data and electoral results A concluding essay evaluates democratic development in the region

How Politics and Institutions Affect Pension Reform in Three Postcommunist Countries Mitchell Alexander

Orenstein,2000 During reform s three phases commitment building coalition building and implementation there are tradeoffs among inclusiveness of process radicalism of reform and participation in and compliance with the new system Including more and more various veto and proposal actors early in the deliberative process may increase buy in and compliance when pension reform is implemented but at the expense of faster and greater change

Postcommunism and the Theory of Democracy Richard D. Anderson,M. Steven Fish,Stephen E. Hanson,Philip G. Roeder,2021-05-11 Why did the wave of democracy that swept the former Soviet Union and Eastern Europe starting more than a decade ago develop in ways unexpected by observers who relied on existing theories of democracy In *Postcommunism and the Theory of Democracy* four distinguished scholars conduct the first major assessment of democratization theory in light of the experience of postcommunist states Richard Anderson Steven Fish Stephen Hanson and Philip Roeder not only apply theory to practice but using a wealth of empirical evidence draw together the elements of existing theory into new syntheses The authors each highlight a development in postcommunist societies that reveals an anomaly or lacuna in existing theory They explain why authoritarian leaders abandon authoritarianism why democratization sometimes reverses course how subjects become citizens by beginning to take sides in politics how rulers become politicians by beginning to seek popular support and not least how democracy becomes consolidated Rather than converging on a single approach each author shows how either a rationalist institutionalist discursive or Weberian approach sheds light on this transformation They conclude that the experience of postcommunist democracy demands a rethinking of existing theory To that end they offer rich new insights to scholars advanced students policymakers and anyone interested in postcommunist states or in comparative democratization

Elections and Democracy after Communism? E. Herron,2009-05-25 This book uses elections as a vehicle to explain the unanticipated outcomes of post Soviet politics It assesses how the behavior of voters candidates and government officials is influenced by the Soviet legacy and rational calculations of self interest and is the first to address elections across post Soviet space

Crime, Criminal Justice and Criminology in Post-Soviet Ukraine Todd S. Foglesong,2001 *Presidential Activism and Veto Power in Central and Eastern Europe* Philipp Köker,2017-06-20 This book examines the use of presidential powers in Central and East Europe between 1990 and 2010 Focussing on presidential vetoes and the formation of governments it maps patterns of presidential activism and its determinants across nine democracies Thereby it combines the analysis of original quantitative data on the use of presidential powers with in depth case studies in an innovative mixed methods framework Based on regression analyses and unique insights from numerous elite interviews the study shows strong support for the hitherto insufficiently tested assumption that popularly elected presidents are more active than their indirectly

elected counterparts As one of the first comprehensive comparative studies of presidential activism and veto power in Europe this book will be a key resource not only for area specialists but also for scholars of presidential studies comparative government and executives

Presidents with Prime Ministers Margit Tavits, 2009 This book is about presidents in parliamentary systems One commonly recurring political debate within parliamentary systems is over whether or not the public should directly elect the head of state Despite the importance of this topic in practical politics political scientists have offered little empirical evidence yet made bold assumptions about the consequences of popular elections for heads of state A common argument is that direct elections enhance presidents legitimacy thereby increasing their activism and encouraging authoritarian tendencies Another popular assumption is that direct presidential elections are more heavily contested and partisan polarizing and dividing political elites and the electorate Proponents of direct elections argue that such elections will help decrease voter alienation and apathy This book challenges the conventional wisdom Using both quantitative and qualitative empirical evidence from democratic systems across the world this book demonstrates that compared to indirect selection methods direct elections do not yield more active and contentious presidents do not polarize political elites or society and do not remedy political apathy Rather presidential activism in both semi presidential and pure parliamentary systems is shaped by political opportunity framework the institutional strength and partisan composition of both parliament and government Further because holding the presidency provides parties with an electoral asset direct and indirect presidential elections can be equally contentious and polarizing Last but not least rather than decreasing apathy direct election is associated with increased voter fatigue and decreased turnout in parliamentary elections by about seven percentage points

Post-Communist Democratization John S. Dryzek, Leslie Holmes, 2002-06-13 Democracy is not just a matter of constitutions parliaments elections parties and the rule of law In order to see if or how democracy works we must attend to what people make of it and what they think they are doing as they engage with politics or as politics engages them This book examines the way democracy and democratization are thought about and lived by people in China Russia and eleven other countries in the post communist world It shows how democratic politics and sometimes authoritarian politics work in these countries and generates insights into the prospects for different kinds of political development The authors explore the implications for what is probable and possible in terms of trajectories of political reform and examine four roads to democratization liberal republican participatory and statist The book will be of interest to students and scholars of comparative politics political theory and post communist studies

Institutional Design and Party Government in Post-Communist Europe Csaba Nikolenyi, 2014-10-30 This book examines the institutional foundations of coalition government in the ten post communist democracies of Eastern and Central Europe for the 1990-2010 period Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania Slovakia and Slovenia Its central argument is that differences in the arrangement of political institutions systematically explain variations in patterns of multi party government

across these states The book starts with the premise that electoral systems and constitutional provisions about the powers the structure and the relationship between parliament and the presidency determine the degree to which political power is dispersed or concentrated in the political system On the basis of these institutional features three groups of states are distinguished with regard to their degree of power concentration the substantive chapters of the book demonstrate how these institutional combinations and differences shape three specific facets of party government which capture the main stages of the lifecycle of coalitions governments the formation of electoral coalitions government formation and government duration Specifically three comparative chapters assess the impact of institutional power concentration on the size of electoral coalitions the likelihood that political parties form a minority government and the number of days that a government lasts in office The main finding of the book is that power concentration matters political parties in those democracies where institutions are designed to concentrate political power tend to form large electoral coalitions they tend to form majority rather than undersized governments and they build more durable cabinets In addition the book contains a detailed case study of government formation in Hungary and a previously unstudied comparison of indirect presidential elections in four states the Czech Republic Estonia Hungary and Latvia Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu

Power and Change in Central Asia Sally Cummings, 2004-01-14 This volume offers the first systematic comparison of political change leadership style and stability in Central Asia The contributors all leading international specialists on the region offer focused case studies of Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan comparing how the regimes have further consolidated their power and resisted change

Politics and Society in Poland Frances Millard, 2002-09-11 An examination of political social and economic development in Poland since the summer of 1989 with the main focus on democratization

Post-Communist Parliaments David M. Olson, Gabriella Ilonszki, 2013-10-18 At the end of the founding or initial decade the new parliaments of post Communist Europe had developed two distinct types democratic and presidentially dominated Whilst in the early years they had been characterised as parliaments in adolescence they have through the second decade continued to improvise but also elaborate their working relationships with both their chief executives and electorates This book examines these adaptations in seven parliaments comparing both among them and with parliaments of west Europe Their changes are traced through four distinct sets in context members internal structure and working relationship with the executive This research develops a common perspective for our understanding of both new and developed legislatures by tracing the steps through which new parliaments begin adapt and become established This book was published as a special issue of Journal of Legislative Studies

Politics and Legitimacy in Post-Soviet Eurasia

Martin Brusis, Joachim Ahrens, Martin Schulze Wessel, 2016-01-26 Political legitimacy has become a scarce resource in Russia and other post Soviet states Their capacity to deliver prosperity has suffered from economic crisis war in Ukraine and confrontation with the West Will nationalism and repression enable political regimes to survive This book studies the politics of legitimation in Post Soviet Eurasia Prospects for Constitutionalism in Post-Communist Countries Levent Gönenç, 2002-06-01 The last decade of the 20th century saw radical changes in Eastern Europe and the former USSR Most of these countries made a transition from totalitarianism or authoritarianism to democracy and from central planning to a market economy Adding to the latter a number of national entities gained their independence after the disintegration of the federative states of the USSR Yugoslavia and Czechoslovakia Many recent studies have focused on these double in some cases triple transitions and scholars from different fields analyzed the so called 1989 Revolution from different perspectives Rather less scholarly attention has been paid to the future of post communist constitutions and prospects for constitutionalism in these countries The main questions dealt with throughout this study can be formulated as follows Will liberal democratic constitutionalism take root in these countries Will new constitutions in Eastern Europe and the former USSR perish or survive This study also aims at contributing to the construction of a general constitutional theory by studying the causes and dynamics of constitutional change in general Such constitutional change is not only on the East European but also on the West European agenda The purpose of this study is not to introduce a general theory about constitutional in stability but studying post communist constitutions will help us to understand the causes and dynamics of constitutional change from a broader perspective **Post-Soviet Chaos** Joma Nazpary, 2001-11-20 In the 1990s the former states of the Soviet Union underwent dramatic and revolutionary changes As a result of enforced neoliberal reforms the fledgling republics were exposed to the familiar effects of globalised capital Focusing on Kazakhstan where violence and corruption are now facts of everyday life Joma Nazpary examines the impact of the new capitalism on the people of Central Asia Nazpary explores the responses of the dispossessed to their dispossession He uncovers the construction of imagined communities grounded in Soviet nostalgia which serve to resist the economic order as well as the more practical survival strategies especially of women often forced into prostitution where they are subject to violence and stigma By revealing the extent to which Kazakh society has disintegrated and the cultural responses to it Nazpary argues that dispossession has been a stronger unifying force than even ethnicity or religion Comparing the effects of neoliberal reforms in Kazakhstan with those in other regions he concludes that causes forms and consequences of dispossession in Kazakhstan are particular instances of a much wider global trend *The Informal Powers of Western European Presidents* Selena Grimaldi, 2023-08-14 The book explores how weak presidents directly or indirectly elected can still play a crucial role in the political arena Weak presidents have been distinguished from strong ones by relying on the evaluation of the powers they display according to the constitution Six Western European countries are analysed Germany and Italy which present a consistent constitutional

design as weak presidents are elected indirectly and Austria Ireland Finland and Portugal that present inconsistent constitutional design as weak presidents are elected directly In contrast to much of the existing comparative works on presidential powers and activism the book emphasises the role and the use of informal powers beyond that of formal ones In particular a definition and a typology of informal powers are provided as well as an empirical investigation on informal presidential activism The positive outcome of presidential informal interventions are studied by relying on an interactionist approach which combines presidency centred as well as president centred explanations The book argues that when dealing with informal presidential activism the opportunity structure matters but presidential public support matters even more
