Postcommunist Transformation And The Social Sciences Cross Disciplinary Approaches:

Postcommunist Transformation and the Social Sciences Frank Bönker, Klaus Müller, Andreas Pickel, 2003-08 The work s major substantive themes revolve around problems of post communist socio economic transformations Specifically it explores post communist systemic change the role of religion and collective identity the significance of trust and economic culture patterns of state economy interactions in enterprise restructuring the context of EU expansion the strengths and weaknesses of economic theory and neo liberal doctrine and the history of ideas in the post communist transformation debate *Global Geographies of Post-Socialist Transition* Tassilo Herrschel, 2006-09-27 Since the formal raising of the Iron Curtain there has been much interest in post socialism and the process of post socialist transition This timely book provides a systematic review and analysis of the process of transition Herrschel explores recent theories concepts and debates on post socialism and the notion of transition provides a systematic topical account of post socialist transitions around the world as evidence by social economic and political processes examines case studies of post socialist transition in east and Central Europe the former Soviet Union Asia and South East Asia and Africa and Latin America brings together theoretical and practical aspects by examining what lessons can be learned from recent experiences *Global Geographies of Post Socialist Transition* provides a truly global comparative account of the meaning and processes of post socialist transition and will be an invaluable resource for all those interested in this area *Understanding Central Europe* Marcin Moskalewicz, Wojciech Przybylski, 2017-11-20 Central Europe is a vague and ambiguous term more to do with outlook and a state of mind than with a firmly defined geographical region In the immediate aftermath of the collapse of the Iron Curtain Central Europeans considered themselves to be culturally part of the West which had been politically handicapped by the Eastern Soviet bloc More recently and with European Union membership Central Europeans are increasingly thinking of themselves as politically part of the West but culturally part of the East This book with contributions from a large number of scholars from the region explores the concept of Central Europe and a number of other political concepts from an openly Central European perspective It considers a wide range of issues including politics nationalism democracy and the impact of culture art and history Overall the book casts a great deal of light on the complex nature of Central Europe **Global Trends in Eastern Europe** Nikolai Genov, 2016-04-22 Eastern Europe was once clearly defined by the centralized political and economic organization of the societies in the region They shared the same official ideology and were members of the same alliances After 1989 the region collapsed in an economic political and cultural implosion What were the moving forces of this profound change What are its consequences Could we try to reasonably foresee any future developments In this thought provoking book Nikolai Genov presents a systematic description and explanation of Eastern European societal transformations after 1989 They are interpreted as adaptations to four global trends upgrading the rationality of organizations individualization spreading of instrumental activism and universalization of value normative systems Adaptations to these trends have generally been

successful However Genov notes that the process is marked by many failures as well They are mostly caused by path dependency in the societal development and by the varying quality of relevant decisions other destructive developments are due to contradictions in the global trends themselves Guided by the assumption that the societal and supranational integration mechanisms in Eastern Europe before 1989 could not resist the overwhelming power of global trends Genov's controversial findings question visions about the end of history and simultaneously strengthen the confidence that most complex macro social processes can be rationally managed A timely book allowing for a much needed engagement in contemporary debates on the controversial processes in Eastern European transitions *The Problem of Order in the Global Age* A. Pickel, 2006-08-06 This important contribution to the study of the problem of order which figures prominently in today's globalization debate focuses on the role of sovereignty It advances arguments based on psychocultural perspectives and looks at postcommunist transformations and changes in political economic and cultural orders at all levels of social life

The Paradigm of Social Interaction Nikolai Genov, 2021-11-25 The monograph *The Paradigm of Social Interaction* presents a paradigmatic synthesis in sociology This is a reaction to the growing paradigmatic divisions in the discipline and an attempt at fostering the cumulative development of sociological knowledge The suggested conceptual fusion includes micro sociological interaction theories recent theories of organizational interactions and the experience from the study on global trends The intention is to support the building and explanatory application of middle range theories in all action spheres and at all micro mezzo and macro social structural levels The paradigmatic synthesis is developed around five analytical concepts of the determinants of social interactions environmental technological economic political and cultural complexes Another conceptual framework fostering explanations consists of social actors relations and processes as key parameters of the social interaction paradigm The book also examines the COVID pandemic as a multidimensional crisis applying the synthetic paradigm as a heuristic tool and knowledge organizing framework It is used in the studies on social innovations societal transformations and global social trends as well The book will be of interest to researchers university teachers and doctoral and master's students in the fields of sociology social theory critical sociology philosophy of social sciences innovation and societal transformation studies **The European Union and the Social Dimension of**

Globalization Jan Orbie, Lisa Tortell, 2009-01-13 Examines the nature of the EU and its external role in relation to social issues raised by globalization It explores how the EU influences both directly and indirectly the rest of the world in relation to the social component of globalization

Unwrapping the European social model Serrano Pascual, Amparo, Jepsen, Maria, 2006-07-12 The notion of the European Social Model ESM has been one of the fastest growing in European political and academic discourse in recent years It is conventionally used to describe the European experience of simultaneously promoting sustainable economic growth and social cohesion However the concept has suffered from a lack of clear definition And where definitions have been found in the literature they do not necessarily converge This book presents the outcome of a

project coordinated by the European Trade Union Institute in which experts from different countries and social scientific disciplines sociology political science and economics were invited to reflect on both the meaning and political status of the concept of the ESM In addition to analysing the ambiguities and multiple meanings attributed to the concept the authors unpick the underlying assumptions and make use of a new approach the ESM as political project with which European countries can build consensus and share a common understanding Offering a new analytical framework and with new empirical evidence Unwrapping the European Social Model is essential reading for all those involved in European social policy research education policy and practice

The Capitalist Personality Christopher Swader, 2013 Modern capitalism favors values that undermine our face to face bonds with friends and family members Focusing on the post communist world and comparing it to more developed societies this book reveals the mixed effects of capitalist culture on interpersonal relationships While most observers blame the egoism and asocial behavior found in new free market societies on their communist pasts this work shows how relationships are also threatened by the profit orientations and personal ambition unleashed by economic development Successful people in societies as diverse as China Russia and Eastern Germany adjust to the market economy at a social cost relaxing their morals in order to obtain success and succumbing to increased material temptations to exploit relationships for their own financial and professional gain The capitalist personality is internally troubled as a result of this sellout but these qualms subside as it devalues intimate qualitative bonds with others This book also shows that post communists are similarly individualized as people living in Western societies Capitalism may indeed favor values of independence creativity and self expressiveness but it also rewards self centeredness consumerism and the stripping down of morality As is the case in the West capitalist culture fosters an internally conflicted and self centered personality in post communist societies

Europeanization P. Graziano, M. Vink, 2006-11-28 This cutting edge handbook written by foremost authoritative scholars presents the main theoretical and empirical issues involved in current Europeanization research It evaluates the achievements and shortcomings of the growing literature As an advanced reference book it also sets the parameters for Europeanization research in the coming years

Fast Policy Jamie Peck, Nik Theodore, 2015-04-15 We inhabit a perpetually accelerating and increasingly interconnected world with new ideas fads and fashions moving at social media speed New policy ideas especially ideas that work are now able to find not only a worldwide audience but also transnational salience in remarkably short order Fast Policy is the first systematic treatment of this phenomenon one that compares processes of policy development across two rapidly moving fields that emerged in the Global South and have quickly been adopted worldwide conditional cash transfers a social policy program that conditions payments on behavioral compliance and participatory budgeting a form of citizen centric urban governance Jamie Peck and Nik Theodore critically analyze the growing transnational connectivity between policymaking arenas and modes of policy development assessing the implications of these developments for contemporary policymaking Emphasizing that policy

models do not simply travel intact from sites of invention to sites of emulation they problematize fast policy as a phenomenon that is real and consequential yet prone to misrepresentation Based on fieldwork conducted across six continents and in fifteen countries Fast Policy is an essential resource in providing an extended theoretical discussion of policy mobility and in presenting a methodology for ethnographic research on global social policy Transnational Social Policy Luann Good Gingrich, Stefan Köngeter, 2017-04-28 Transnational Social Policy highlights the changing face of social policy and social work against the background of accelerating transnationalization of economies labour markets education social services and care The contributions of this book provide unique case examples on the interplay of social policies mobile populations and travelling knowledge about welfare within an increasingly asymmetrical global context This innovative volume also includes historical studies on the transformations of social policies during the last century and reflects the developments of social welfare across the Global North and the Global South With its emphasis on theoretical assumptions of policy translation the case studies show the importance of adjustments negotiations and participation of various actors in the transnational social field of welfare production Thus within ever shifting contexts of new political agendas promoting the free play of the market and a neoliberal agenda of competition and austerity this insightful book reveals new transnational forms of social exclusion that function within across and in between nation states Presenting a major and much needed addition to current discussions on globalization and the increasing complexity of worldwide social relations this volume will be of interest to scholars and graduate students interested in fields such as Social Policy Social Work Public Administration Development Studies Political Science and Sociology as well as many interdisciplinary fields including Global Studies International Development Studies and Immigration and Settlement Studies **Transition Economics** Peter Luke, 2012-07-26 Celebrating twenty years of transition from socialism to capitalism this book is designed to be the core textbook for undergraduate courses in transition economics and comparative economic systems Given the passage of time Transition Economics Two Decades On reviews and accounts for the outcomes in the so called transition economies and from an academic perspective takes the reader through developments and issues in the twenty years of transition from plan to market Treating its subject matter thematically the book incorporates much of the transition economics literature and evidence that have evolved over the past two decades In particular the authors focus on the most important aspects of economic transition including The initial conditions at the outset of transition Paradigms and patterns of transition The main transition policies and economic reforms The performance of transition countries and firms The lessons from transition The textbook covers a wide range of both contemporary microeconomic and macroeconomic issues in over thirty ex socialist European and Asian countries including Russia and China Transition Economics Two Decades On is more than just a book about a particular part of the world or the transformation that was experienced at a particular time in history The authors believe that the study of the economics of transition gives the reader an insight into theories policies reforms legacies institutions processes and lessons that have

application and relevance beyond the specific transition from plan to market to other parts of the world and to other times in history

The Rebirth of Area Studies Zoran Milutinovic, 2019-12-12 Area Studies became increasingly common after World War II as a means of responding to perceived external threats from the Soviet Union and China After the Cold War and in the face of increasingly rapid globalisation it seemed inevitable that Area Studies institutionally and intellectually would slowly degenerate But this has not been the case and there has recently been a resurgence of interest in it as an effective and positive research paradigm Responding to this renewed interest this book brings together an esteemed group of contributors at the cutting edge of the field to consider the state of Area Studies today and its prospects for the future The Rebirth of Area Studies demonstrates that numerous aspects of the research paradigm in fact recommend it as well suited for the present moment and the challenges posed by globalisation both as a means to overcome disciplinary limitations and to increase self reflexivity Area Studies research is grounded in place specific knowledge yet by definition it transcends nation as the basic unit of analysis and thus empowers comparative and trans national approaches This book outlines a new critical Area Studies for the 21st century self reflexive aware of its limitations and conscious of its origins in geopolitical strategic or ideological considerations and is essential reading for historians geographers and political scientists

The Europeanization of Central and Eastern Europe Frank Schimmelfennig, Ulrich Sedelmeier, 2005 This book demonstrates the importance of the credibility and the costs of accession conditionality for the adoption of EU rules in Central and Eastern Europe

Global Forces and Local Life-Worlds Ulrike Schuerkens, 2010-09-17 How are global forces impacting on local lifestyles Where does the personal stand in relation to globalization Global Forces and Local Life Worlds explores these questions using a mixture of sociological and anthropological analysis and case study methods Demonstrating the tensions between retaining cultural integrity in the face of the levelling processes associated with modernity this book locates the problems of globalization and localization in the appropriate anthropological and sociological dimensions examines the relationship between culture and identity and explores the varieties of modernity

The EU and its Relations with Eastern Europe de Deugd, Nienke, Hoen, Herman W., 2022-02-15 The politico economic relations between the European Union EU and Eastern Europe are currently entering a new phase which some scholars qualify as a revival of the Cold War This insightful book seeks to explain whether and why a Cold War Europe has returned and discusses underlying factors that clarify the relations between East and West since the Second World War

Protest in Putin's Russia Mischa Gabowitsch, 2016-12-27 The Russian protests sparked by the 2011 Duma election have been widely portrayed as a colourful but inconsequential middle class rebellion confined to Moscow and organized by an unpopular opposition In this sweeping new account of the protests Mischa Gabowitsch challenges these journalistic clichés showing that they stem from wishful thinking and media bias rather than from accurate empirical analysis Drawing on a rich body of material he analyses the biggest wave of demonstrations since the end of the Soviet Union situating them in the context of protest and social movements across Russia as a whole He

also explores the legacy of the protests in the new era after Ukraines much larger Maidan protests the crises in Crimea and the Donbass and Putins ultra conservative turn As the first full length study of the Russian protests this book will be of great value to students and scholars of Russia and to anyone interested in contemporary social movements and political protest

Enlarging the Euro Area Kenneth Dyson,2006-11-02 This book seeks to offer the first in depth and systematic analysis of the challenges of the Euro Area and the eastward enlargement of the European Union It focuses in particular on how the prolonged process of accession to the Euro Area is affecting domestic economic policies in the accession states of east central Europe It contributes to Europeanization studies comparative political economy and to studies of Economic and Monetary Union It also provides a picture of processes of domestic transformation in such countries as the three Baltic States Bulgaria the Czech Republic Hungary Poland and Romania The book brings together a range of recognized experts from across Europe and combines country and sectoral case studies with a thematic treatment It begins by offering an outside in perspective which situates the effects of EMU on the accession states in the wider context of the development of global economic norms The second part focuses on an inside out analysis of how Euro Area accession affects the states of east central Europe their policies politics and public institutions The final part assesses how Euro Area accession is affecting key policy sectors in east central Europe financial market regulation fiscal policies and welfare states and labour markets

The Liquefaction of Publicness Slavko Splichal,2020-04-28 The successful Brexit referendum campaign Donald Trump s election and the rise of right wing nationalist populist political parties and movements all of these events have incited renewed interest in public communication and the internetised media deliberative democracy and public spheres challenged by an informational abundance that generates a communicative liquefaction of publicness and politics This book celebrates the 25th anniversary of the journal Javnost The Public bringing together internationally renowned scholars from 20 countries to discuss topical issues in contemporary media and communication research It focuses on challenging issues of the changing nature of publicness and the public sphere in the internet age issues of democracy and the crisis of public communication and the tasks of media and communication research as a social practice It critically reflects on the democratisation crisis and the demise of popular and scholarly optimism which the emerging internet inspired in early 1990s when Javnost The Public was founded
