## **Postgraduate Research Supervision:**

*Key Factors in Postgraduate Research Supervision A Guide for Supervisors* Dario Toncich, 2022-09-01 *Key Factors in Postgraduate Research Supervision A Guide for Supervisors* is designed to inform and support university academics and researchers who are taking on the responsibilities of postgraduate research student supervision. It is aimed at early career professionals who may be undertaking supervision for the first time and also experienced supervisors seeking to develop a more formal framework for their supervision in an increasingly complex academic environment. The objective of the book is to help supervisors create the complete postgraduate student. That is an individual who can develop the rigors and disciplines of research conduct and research writing as well as a broader understanding of the environment in which many postgraduate qualified professionals will work. The majority of postgraduate research students in the modern world ultimately use their acquired skills to work outside the university research environment so emphasis is given to preparing research students for these varied roles which can include management commercial research or start up company pathways. Any competent academic can be a good research supervisor when things are going well. Real supervisory skills only come into play when things have gone awry. That is when a professional and structured approach to problem solving and conflict resolution is required. This book seeks to provide the framework in which supervisors can develop such an approach. The topics covered in this text cover the spectrum of the supervisory process from understanding the university research environment through to recruiting students induction planning of the research program peer review and thesis dissertation preparation. Additionally important peripheral issues such as preparing graduates for various future roles managing collaborative research programs managing cases of misfeasance and developing long term relationships with students are also covered. *Enhancing the Doctoral Experience* Steve Hutchinson,Helen Lawrence,2017-03-02 One of the major intangible benefits associated with the postgraduate research experience is precisely that the experience And more specifically for an increasing number of international research students the British doctoral experience This experience is often largely defined and shaped by their relationship with and support from their supervisor Enhancing the Doctoral Experience brings together the authors experience and research frameworks and models as well as pragmatic feedback and understanding This synthesis of scholarly theory and pragmatic sampling has produced a book that provides a scaffold for students and supervisors to have conversations about their expectations to discuss what supervision is to articulate clearly what both parties need in order for a successful relationship to occur and to build a mutually beneficial endeavour In many cases these conversations can be complicated by cultural and linguistic

differences so the text explicitly addresses these and other sources of misunderstanding Against a challenging background of growing numbers of students but also increasing pressures on time and costs Enhancing the Doctoral Experience offers an approach to improve the effectiveness of the doctoral student and increase the professionalization of research supervision It does so by providing both with an awareness of and a toolkit to approach student diversity     *Understanding Supervision and the PhD* Moira Peelo,2011-01-20     *Key Factors in Postgraduate Research Supervision* Dario J. Toncich,2017-06-27 *Key Factors in Postgraduate Research Supervision* is a book designed to inform and support university academics and researchers engaged in the supervision of graduate research candidates at Doctoral or Master s degree levels It is aimed at early career academics who may be undertaking supervision for the first time and also experienced supervisors seeking to develop a more formal framework for their supervision in an increasingly complex university environment This book is also specifically designed for use in university training programs conducted to accredit research supervisors     **Postgraduate Supervision** Magda Fourie-Malherbe,Ruth Albertyn,Eli Bitzer,2016-11-21 The 24 chapters contained in this volume provide diverse but also congruent perspectives on future foci for research into postgraduate education and supervision in the knowledge society The chapters move from deliberations on challenges for postgraduate supervision at macro level such as the pressure to increase postgraduate output and the implications of increasingly managerialist institutions to meso level matters the form and function of postgraduate education in specific countries to the micro rich case studies of individual institutions programmes and supervisors     *Strengthening Postgraduate Supervision* Sioux McKenna,Jenny Clarence-Fincham,Chrissie Boughey,Harry Wels,Henk van der Heavel,2017-03-22 An excellent collection of diverse and deeply reflective perspectives All offer insights into the multiple challenges confronted in improving the quality and depth of postgraduate supervision increasing throughput and dealing with complexity What is also affirmed is the importance of individual capability in supervision that is developed and nurtured over time and through arduous effort The book will be of value to novice supervisors and to more experienced ones Policy makers planners and administrators looking to enlarge their understanding of the postgraduate terrain in all its complexities will find the mix of theoretical and practical lenses through which the topic is approached particularly illuminating Professor Narend Bajinath Chief Executive Officer Council on Higher Education     **Postgraduate Research Engagement in Low Resource Settings** Atibuni, Dennis Zami,2019-09-27 The general academic progression and particularly research engagement of postgraduate students is characterized by various problems such as high dropout rates longer completion times low graduation rates and high repetition or retake rates This means that there are far fewer students pursuing postgraduate studies at tertiary institutions and universities than there are at the lower levels of education Yet there is growing demand for postgraduate education given its strong projected association with socioeconomic transformation at national and international levels among developed and developing countries alike *Postgraduate Research Engagement in Low Resource Settings* sets out to garner strategies for fostering

efficiency of research conduct among the students and faculty so as to enhance high quality output for the envisaged personal societal national and international socioeconomic transformation Covering a range of topics such as intellectual property mental health and quality assurance this book is ideal for research supervisors higher education faculty librarians educators administrators researchers academicians and students **ECRM 2019 18th European Conference on**
