Blind Spot Salmaan Keshavjee, 2014-08-16 Neoliberalism has been the defining paradigm in global health since the latter part of the twentieth century What started as an untested and unproven theory that the creation of unfettered markets would give rise to political democracy led to policies that promoted the belief that private markets were the optimal agents for the distribution of social goods including health care A vivid illustration of the infiltration of neoliberal ideology into the design and implementation of development programs this case study set in post Soviet Tajikistan s remote eastern province of Badakhshan draws on extensive ethnographic and historical material to examine a revolving drug fund program used by numerous nongovernmental organizations globally to address shortages of high quality pharmaceuticals in poor communities Provocative rigorous and accessible *Blind Spot* offers a cautionary tale about the forces driving decision making in health and development policy today illustrating how the privatization of health care can have catastrophic outcomes for some of the world s most vulnerable populations

Capitalist Restructuring and the Pacific Rim Ravi Palat, 2004-07-31 This book situates the evolution of capitalist economies along Asia s Pacific Rim after the Second World War within broader global political and economic changes Specifically it charts their growth at the interface of periodic crises and successive waves of restructuring and links changes in the world economy to shifts in regional dynamics in east and southeast Asia It suggests that while the expansion of Japanese corporate networks was crucial to the emergence of the region as a low cost exporter to the world the reintegration of China into the world market will free the region from its dependence on the US as a market of last resort

Global Geopolitical Power and African Political and Economic Institutions John James Quinn, 2015-12-30 *Global Geopolitical Power and African Political and Economic Institutions When Elephants Fight* describes the emergence and nature of the prevailing African political and economic institutions in two periods In the first most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites usually through one or no party military political systems inward oriented development policies and or state led and often state owned industrialization In the second period most countries adopted institutions that diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral systems more outward oriented trade policies and the privatization of many state owned or controlled sectors though significant political and economic power remains in their hands The choices made in each period were consistent with prevailing ideas on governance and development the self interests of political elites and the perceived availability of support or autonomy vis vis domestic regional and international sources of power at the time This book illustrates how these two region wide shifts in prevailing political and economic institutions and practices of Africa can be

linked to two prior global geopolitical realignments the end of WWII with the ensuing American and Soviet led bipolar system and the end of the Cold War with American primacy Each period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic regional and international forces material and intellectual all which were themselves greatly transformed in the wake of these two global geopolitical realignments

Economic Relations and Statehood in Europe, 1860s-1970s Gerold Krozewski,2023-04-06 Drawing on official archival and published sources this book explores how the formative history of the European nation state was embedded within economic globalization and associated with conceptions of the world overseas With a particular focus on France Germany Italy and Britain this research investigates how overseas relationships shaped state governance The argument departs from conventional histories by linking together the analysis of economic relationships and political cultures examining the ways in which state agency formed in different areas such as national economy building the organization of overseas raw material and food supplies labour migration and national identity Spanning over a century the book discusses the changing role of overseas colonies in European national development Once a means to complete economic liberalization colonies were then envisaged as tools of crisis management before in the mid twentieth century complementarities in imperial colonial economies shifted away from empire This volume covers neglected aspects of the transnational history of European nation states and is an ideal resource for students and researchers interested in the ties between Europe Africa and Asia as well as connections between political economic and social relations and their conceptualizations *New Models In Geography* Richard Peet,Nigel Thrift,2013-10-11 First published in 1989 It seems such a long time ago another age yet it is a mere twenty odd years since the original *Models in Geography* was published It is an even shorter time since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences What came to be called the political economy perspective has progressed with remarkable speed and energy to

generate its own framework of conceptualization and analysis its own questions and debates The papers in these two volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach Moreover from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally it has now flowered into a consistent part of enquiries that span the entire realm of social studies
