Theatre Ecology Baz Kershaw, 2007-12-13 A study into the relationships between performance theatre and environmental ecology

From Virgin Land to Disney World, 2016-08-22 With the publication in English in 1930 of *Civilization and its Discontents* and its thesis that instinct and ultimately nature had been and must be forever subordinated in order that civilization might thrive and endure Freud contributed what some contemporaries saw to the central debate of his era a debate which had long preoccupied both official American pundits and the American populace at large At the beginning of the new Millennium evidence abounds that an American debate still rages over the meaning of nature the rightful weight of instinct and the status of civilization The Millennium itself has appeared in popular and official discourses as an appropriate marker of an age in which nature is close to the edge of radical extinction and has also become more and more unreliable as a paradigm for representation and debate At the same time the contemporary tailoring of nature to postmodern needs and expectations inevitably reveals the conceptual difficulty of any possible simple opposition between nature and culture as if they were clearly distinguishable domains If nature then can clearly be seen as a discursive concept it may also be a timeless concept insofar that it has been shaped created and used at all times Every epoch age and era had its own nature with myth history and ideology as its dominant shaping forces From the Frontier to Cyberia nature has been suffering the agony of the real resurfacing in

discursive strategies and demonstrating a powerful impact on American society culture and self definition The essays in this collection speak critically of the natural and examine the American debate in the many guises it has assumed over the last century within the context of major critical approaches psychoanalytical concepts and postmodern theorizing **Writing Nature in Cold War American Literature** Sarah Daw,2018-05-31 Explores the neglected subject of Gothic B movies in the Americas Europe Asia and Africa *The Future of Ecocriticism* Serpil Oppermann,Ufuk Özdağ,Nevin Özkan,2011-05-25 As we enter the second decade of the twenty first century environmental concerns dominate the media headlines from rampant poverty in the developing world to nuclear accidents in industrialized nations How did human civilization arrive at its current predicaments and what can we do to temper our habits of mind and mitigate society s environmentally and socially destructive behaviors The field of ecocriticism also sometimes called environmental criticism attempts to grapple with such issues A branch of literary and cultural studies that essentially began in North America in the 1970s ecocriticism is currently one of the most quickly developing areas of environmental research and teaching The Future of Ecocriticism New Horizons brings together thirty two of the latest articles in the field including work by some of the leading scholars from around the world Although ecocriticism has been particularly active in North America Western Europe and East Asia important studies of traditional environmental thought environmental communication strategies and environmental aesthetics have begun to emerge in every region of this world This new book co edited by three prominent Turkish scholars and a leading American ecocritic offers a special cluster of Turkish ecocriticism with a focus on environmental stories and ideas in this culture that bridges Europe and Asia Another unique feature of The Future of Ecocriticism New Horizons is the concluding dialogue among the four editors about the current state of the field **Environmental Thought in Contemporary Pakistani Fiction** Sonia Irum,2025-03-11 This book looks at Pakistani fiction from an environmental perspective focusing on the novels of the internationally renowned author Uzma Aslam Khan It explores the rich environmental landscapes of Khan s works and their distinctive contribution to developing Pakistani ecocriticism The book examines the discourse on the environment in contemporary Pakistani fiction in English and the contribution of Khan s fiction such as The Story of Noble Rot Trespassing Thinner than Skin and others towards developing ecological thinking in Pakistani literature and literary criticism In her novels Khan gives voice to the nonhuman or the Other highlights the harmonious connections between humans and nature and reflects on the far reaching ecological social and health effects of climate change The author showcases literary activism and analyses how the state engages with the ecopolitical discourses in Pakistani society by studying the intersections of Western imperialism militarism state policies capitalism consumerism and global climate change The book will be of interest to students and researchers of English literature environmental studies ecocriticism literary and critical studies postcolonial studies and indigenous studies **Film in the Anthropocene** Daniel White,2018-07-28 This book provides an interdisciplinary analysis of film in the context of the Anthropocene the new geological era in which human beings have

collectively become a force of nature Daniel White draws on perspectives in philosophy ecology and cybernetics the science of communication and control in animals and machines to explore human self understanding through film in the new era The classical figure of Janus looking both to the future and the past serves as a guide throughout the study Both feature and documentary films are considered *Capitalism, Democracy, and Ecology* Timothy W. Luke, 1999 The world that was revolutionized by industrialization is being remade by the information revolution But this is mostly a revolution from above increasingly shaped by a new class of technocrats experts and professionals in the service of corporate capitalism Using Marx as a touchstone Timothy W Luke warns that if communities are not to be overwhelmed by new class economic and political agendas then the practice of democracy must be reconstituted on a more populist basis However the galvanizing force for this new more community centered populism will not be the proletariat as Marx predicted nor contemporary militant patriotic groups Rather Luke argues that many groups unified by a concern for ecological justice present the strongest potential opposition to capitalism Wide ranging and lucid *Capitalism Democracy and Ecology* is essential reading in the age of information Challenging and provocative Robert Holsworth coauthor of *Affirmative Action and the Stalled Quest for Black Progress* **Natural Discourse** Sidney I. Dobrin, Christian R. Weisser, 2012-02-01 The first full length book to address the relationships between environment and discourse *Natural Discourse* explains why and how ecocomposition has become such a critical part of composition studies Beginning by exploring the roots of ecocomposition including a history of the use of the term ecocomposition the book then examines ecological aspects of composition studies and looks at how ecocomposition is informed by ecocriticism cultural studies ecofeminism environmental rhetoric and composition studies The authors draw on their own experiences as teachers of writing and outdoor enthusiasts to describe how ecocomposition can address issues of language and nature public intellectualism and pedagogy *Nature in Literary and Cultural Studies* Catrin Gersdorf, Sylvia Mayer, 2006 *Nature in Literary and Cultural Studies* is a collection of essays written by European and North American scholars who argue that nature and culture can no longer be thought of in oppositional mutually exclusive terms They are united in an effort to push the theoretical limits of ecocriticism towards a more rigorous investigation of nature s critical potential as a concept that challenges modern culture s philosophical assumptions epistemological convictions aesthetic principles and ethical imperatives This volume offers scholars and students of literature culture history philosophy and linguistics new insights into the ongoing transformation of ecocriticism into an innovative force in international and interdisciplinary literary and cultural studies **Divided Natures** Kerry H Whiteside, 2002-02-01 In this book Kerry Whiteside introduces the work of a range of French ecological theorists to an English speaking audience He shows how thinkers in France and in English speaking countries have produced different strains of ecological thought and suggests that the work of French ecological theorists could lessen pervasive tensions in Anglophone ecology Much of the theory written in English is shaped by the debate between anthropocentric ecologists who contend that the value of our nonhuman

surroundings derives from their role in fulfilling human interests and ecocentric ecologists who contend that the nonhuman world holds ultimate value in and of itself This debate is almost nonexistent among French theorists who tend to focus on the processes linking nature and human identity Whiteside suggests that the insights of French theorists could help English language theorists to extricate themselves from endless debates over the real center of nature's value Among the French theorists discussed are Denis de Rougemont Denis Duclos Ren Dumont Luc Ferry Andr Gorz Félix Guattari Bruno Latour Alain Lipietz Edgar Morin Serge Moscovici and Michel Serres The English language theorists discussed include John Barry Robyn Eckersley Robert Goodin Tim Hayward Holmes Rolston III and Paul Taylor

The New Pynchon Studies Joanna Freer, 2019-05-09 The essays in this collection are at the forefront of Pynchon studies representing distinctively twenty first century approaches to his work

Being Alongside Alf Coles, 2013-06-13 How do you establish a classroom culture in which students routinely conjecture and think mathematically How do you establish a way of working with teachers using video in which discussion supports professional development The present book offers answers to these questions through an in depth enactivist study of one exceptional teacher in one innovative mathematics department in the UK The book reveals some striking parallels between working to support students mathematical thinking and working to support teacher learning A case is made for the importance of metacommunication in both contexts communication about the communications that are occurring For example there is compelling evidence from a classroom that metacommunication linked to the words conjecture and becoming a mathematician supports student metacognition and mathematical thinking In working with teachers or students offering

these powerful metacommunications seems to require a heightened listening With a heightened listening attention is placed not just in what is said but in what kind of a thing is said with the teacher or facilitator being alongside the individuals in the wider group Read this book if you re a teacher for insights into how one teacher establishes a classroom culture where her children are doing mathematics being mathematicians and reflect on what you want in your own classroom Read this book if you re a teacher educator to reflect on parallels between teaching and running professional development sessions particularly using video If you do not fit in either of these categories read this book and use stories in your life Laurinda Brown University of Bristol

Beyond Nature Writing Karla Armbruster, Kathleen R. Wallace, 2001 Ecocriticism a field of study that has expanded dramatically over the past decade has nevertheless remained until recently closely focused on critical analyses of nature writing and literature of wilderness The authors push well beyond that established framework with this collection of essays by respected ecocritics and scholars from the literary and environmental arenas

Thomas Pynchon in Context Inger H. Dalsgaard, 2019-06-20 Thomas Pynchon in Context guides students scholars and other readers through the global scope and prolific imagination of Pynchon s challenging canonical work providing the most up to date and authoritative scholarly analyses of his writing This book is divided into three parts The first Times and Places sets out the history and geographical contexts both for the setting of Pynchon s novels and his own life The second Culture Politics and Society examines twenty important and recurring themes which most clearly define Pynchon s writing ranging from ideas in philosophy and the sciences to humor and pop culture The final part Approaches and Readings outlines and assesses ways to read and understand Pynchon Consisting of Forty four essays written by some of the world s leading scholars this volume outlines the most important contexts for understanding Pynchon s writing and helps readers interpret and reference his literary work

Breaking the Disciplines Martin L. Davies, Marsha Meskimmon, 2003-08-22 International scholars explore the ways in which knowledge actually operates showing the limitations of now outmoded disciplines Coming from fields as diverse as anthropology philosophy literature aesthetics and art practice together they break down the boundaries between entrenched domains of knowledge Studies of objects which confound traditional definitions including a mechanical cow invented by an Irish farmer and the curious case of a mechanical monk show how a close look at an individual object can paradoxically open up dynamic new reconceptions of traditional systems of knowledge With social uses of knowledge currently a matter of public debate this should be a timely text
