This comprehensive presentation of Axel H gerstr m 1868 1939 fills a void in nearly a century of literature providing both the legal and political scholar and the non expert reader with a proper introduction to the father of Scandinavian realism Based on his complete work including unpublished material and personal correspondence selected exclusively from the Uppsala archives A Real Mind follows the chronological evolution of H gerstr m s intellectual enterprise and offers a full account of his thought The book summarizes H gerstr m s main arguments while enabling further critical assessment and tries to answer such questions as If norms are neither true nor false how can they be adequately understood on the basis of H gerstr m s theory of knowledge Did the founder of the Uppsala school uphold emotivism in moral philosophy What consequences does such a standpoint have in practical philosophy Is he really the inspiration behind Scandinavian state absolutism A Real Mind places the complex web of issues addressed by H gerstr m within the broader context of 20th century philosophy stretching from epistemology to ethics His philosophy of law is examined in the core chapters of the book with emphasis on the will theory and the relation between law and power The narrative is peppered with vignettes from H gerstr m s life giving an insightful and highly readable portrayal of a thinker who put his imprint on legal theory The appendix provides a selected bibliography and a brief synopsis of the major events in his life both private and intellectual **Gender, Culture and**

Human Rights Siobhán Mullally, 2006-05-26 In recent years feminist theory has increasingly defined itself in opposition to universalism and to discourses of human rights Rejecting the troubled legacies of Enlightenment thinking feminists have questioned the very premises upon which the international human rights movement is based Rather than abandoning human

rights discourse however this book argues that feminism should reclaim the universal and reconstruct the theory and practice of human rights Discourse ethics and its post metaphysical defence of universalism is offered as a key to this process of reconstruction The implications of discourse ethics and the possibility of reclaiming universalism are explored in the context of the reservations debate in international human rights law and further examined in debates on women s human rights arising in Ireland India and Pakistan Each of these states shares a common constitutional heritage and in each religious cultural claims intertwined with processes of nation building have constrained the pursuit of gender equality Ultimately this book argues in favour of a dual track approach to cultural conflicts combining legal regulation with an ongoing moral political dialogue on the scope and content of human rights

Global Justice, Human Rights and the Modernization of International Law Riccardo Pisillo Mazzeschi, Pasquale De Sena, 2018-07-27 This book is based on the observation that international law is undergoing a process of change and modernization driven by many factors among which the affirmation and consolidation of the role of the individual and of the theory of human rights stand out In the contemporary world international law has demonstrated an ability to evolve rapidly But it is still unclear whether its modernization process is also producing structural changes which affect the subjects the sources and even the very purpose of this law Is it truly possible to speak of a paradigmatic and ideological change in the international legal system one that also involves a transition from a state centred international order to a human centred one and from inter state justice to global justice The book addresses three fundamental aspects of the modernization process of international law the possible widening of the concept of international community and of the classic assumptions of statehood the possible diversification of the sources of general international law and the ability of international law to adapt to new challenges and to achieve the main goals for humanity set by the United Nations The overall objective of the book is to provide the tools for a deeper understanding of the transition phase of contemporary international law by examining the major problems that characterize this phase The book will also stimulate critical reflection on the future prospects of international law

Complex Equality and the Court of Justice of the European Union Richard Lang, 2018-07-17 The equality jurisprudence of the Court of Justice of the European Union has long drawn criticism for its almost total reliance on Aristotle s doctrine that likes should be treated like and unlikes unlike As has often been shown this is a blunt tool entrenching assumptions and promoting difference blindness the symptoms of simplicity In this book Richard Lang proposes that the EU s judges complement the Aristotelian test with a new one based on Michael Walzer s theory of Complex Equality and illustrates how analysing allegedly discriminatory acts not in terms of comparisons of the actors involved but rather in terms of distributions and meanings of goods would enable them to reach decisions with new dexterity and to resolve conflicts without sacrificing diversity

Boycott in America Gary Minda, 1999 Gary Minda s critical study of boycotts in American law and culture focuses on how the word boycott has developed as a metaphoric rather than as a rational or logical form of reasoning Minda first discusses the history interpretation and understanding of boycotts He then turns to the role of metaphor in the interpretation of boycotts and of boycott law Drawing on cognitive psychology and linguistic theory Minda argues that the metaphors judges choose in describing boycotts determine how they view boycotts One of Minda s major contributions is to show how cognitive theory and the analysis of conceptual metaphors can help to explain the development of the law of boycott Equally important Minda provides a unique history of the boycotts in three separate legal fields labor antitrust and constitutional law

Human Dignity and the Autonomy of Law José Manuel Aroso Linhares, Manuel Atienza, 2022-12-06 This book intertwines two major themes in contemporary legal theory the concepts of human dignity and the problem of the autonomy

and limits of the law while also addressing two other key aspects the first one concerned with human rights practices and foundations in their direct connections with the issue of dignity the second one considering the role that the law's aspirations attribute to the experience of an autonomous subject person and the demands that identify his/her position in the dialectical counterpoint with the rethinking of a community The diversity of perspectives that each of these themes allows is explored in various contexts and with unmistakable implications concerning juridical validity rule of law practices pluralism political and practical cultural challenges and divisive bio ethical issues This means considering the separation or separability theses between law and morality and the juridically relevant experience of personhood as a dialectic between autonomy and responsibility the orthodox and heterodox images of comparable concreteness and incomparable singularity the challenges of external points of view and interdisciplinary approaches *The boundaries of international law* Hilary

Charlesworth, Christine Chinkin, 2022-04-19 In the first book length treatment of the application of feminist theories of international law Charlesworth and Chinkin argue that the absence of women in the development of international law has produced a narrow and inadequate jurisprudence that has legitimated the unequal position of women worldwide rather than confronting it *The boundaries of international law* provides a feminist perspective on the structure processes and substance of international law shedding new light on treaty law the concept of statehood and the right of self determination the role of international institutions and the law of human rights Concluding with a consideration of whether the inclusion of women in the jurisdiction of international war crimes tribunals represents a significant shift in the boundaries of international law the book encourages a dramatic rethinking of the discipline of international law With a new introduction that reflects on the profound changes in international law since the book's first publication in 2000 this provocative volume is essential reading for scholars practitioners and students alike
