Postmodern War New Politics Of Conflict:

Postmodern War Chris Hables Gray, 2013-11-12 Postmodern War poses an urgent challenge to the ways we conceptualize and actually wage war in our high technology age Computerization and artificial intelligence have brought about a revolution in warfare spawning both increasingly powerful weapons and a rhetoric which disguises their apocalyptic potential in catch phrases like smart weapons and bloodless combat Postmodern War examines contemporary practices of war defining and critiquing trendy military doctrines hidden behind phrases like Infowar and Cyberwar the roles of those who manipulate high technology those who are manipulated by it and those who are increasingly merging with it the role of peace activists and socially responsible scientists in countering dangerous assumptions made by a postmodern military Far from opposing technological change however Gray finds new hopes for peace in the twenty first century Provocative and far reaching in its scope the book argues that postmodern war has left us poised between the most dreadful and most utopian of alternatives we may eradicate either the human race or war itself The Future of War Gwyn Prins, Hylke

Tromp, 2021-10-18 Bodies of Violence Lauren B. Wilcox, 2015 According to conventional international relations theory states or groups make war and in doing so kill and injure people that other states are charged with protecting While it sees the perpetrators of violence as rational actors it views those who are either protected or killed by this violence as mere bodies ahistorical humans who breathe suffer and die but have no particular political agency In its rationalist variants IR theory only sees bodies as inert objects Constructivist theory argues that subjects are formed through social relations but leaves the bodies of subjects outside of politics as brute facts According to Wilcox such limited thinking about bodies and violence is not just wrong but also limits the capacity of IR to theorize the meaning of political violence By contrast to rationalist and constructivist theory feminist theory sees subjectivity and the body as inextricably linked This book argues that IR needs to rethink its approach to bodies as having particular political meaning in their own right For example bodies both direct violent acts violence in drone warfare for example and are constituted by practices that manage violence for example scrutiny of persons as bodies through biometric technologies and body scanners The book also argues that violence is more than a strategic action of rational actors as in rationalist theories or a destructive violation of community laws and norms as in liberal and constructivist theories Because IR theorizes bodies as outside of politics it cannot see how violence can be understood as a creative force for shaping the limits of how we understand ourselves as political subjects as well as forming the boundaries of our political communities By engaging with feminist theories of embodiment and violence Bodies of Violence provides a more nuanced treatment of the nexus of bodies subjects and violence than currently exists in the field of international relations **Beginning Postmodernism** Tim Woods, 1999-08-20 Postmodernism has become the buzzword of contemporary society Yet it remains baffling in its variety of definitions contexts and associations Beginning Postmodernism aims to offer clear accessible and step by step introductions to postmodernism across a wide range of

subjects It encourages readers to explore how the debates about postmodernism have emerged from basic philosophical and cultural ideas With its emphasis firmly on postmodernism in practice the book contains exercises and questions designed to help readers understand and reflect upon a variety of positions in the following areas of contemporary culture philosophy and cultural theory architecture and concepts of space visual art sculpture and the design arts popular culture and music film video and television culture and the social sciences WLA ,2005 *War in the Age of Technology* Geoffrey Jensen,Andrew Wiest,2001-04-01 Technology of one kind or another has always been a central ingredient in war The Spartan king Archidamus for instance reacted with alarm when first witnessing a weapon that could shoot darts through the air And yet during the past two centuries technology has played an unprecedented role in military affairs and thinking and in the overall conduct of war In addition the impact of new technology on warfare has brought major social and cultural changes This volume explores the relationship between war technology and modern society over the course of the last several centuries The two world wars total conflicts in which industrial technology took a terrible human toll brought great changes to the practice of organized violence among nations even so many aspect of military life and values remained largely unaffected In the latter half of the twentieth century technology in the form of nuclear deterrence appears to have prevented the global conflagration of world war while complicating and fueling ferocious regional contests A stimulating fusion of military and social history extending back to the eighteenth century and with contributions from such leading historians as Brian Bond Paddy Griffith and Neil McMillen *War in the Age of Technology* will interest lay readers and specialists alike **Britain, NATO and the Lessons of the Balkan Conflicts, 1991 -1999** Stephen Badsey,Paul Latawski,2004-05-13 This book considers the lessons for Britain the British armed forces and for NATO from the Yugoslav wars of dissolution 1991 1999 with particular emphasis on Kosovo It represents a significant advance in this emerging debate **A Century of Media, a Century of War** Robin Andersen,2006 Topics include the arms supply scandal involving Lieutenant Colonel Oliver North in 1987 the Gulf War and TV channel CNN the films *Black hawk down* *Courage under fire* *Three kings* *Saving Private Ryan*

Small Navies Michael Mulqueen, Deborah Sanders, Ian Speller, 2016-04-01 Whilst maritime studies tend to reflect the dominance of large navies history shows how relatively small naval forces can have a disproportionately large impact on global events From Confederate commerce raiders in the nineteenth century to Somali pirates today even the most minor of maritime forces can become a key player on a global stage Examining a broad range of examples this volume addresses the roles and activities of small navies in the past and the present at the national regional and international level In particular it focusses on the different ways in which such forces have identified and addressed national and international security challenges and the way in which they interact with other navies and security agencies In addition the collection also investigates the relationship of such navies with non governmental organisations institutions and bodies in pursuit of broader maritime goals be they political financial or environmental Adopting an interdisciplinary approach drawing on the best new research from the fields of international relations security studies strategic studies and maritime history the book examines the diversity of experience amongst different smaller navies and also establishes areas of similarity Divided into two sections part one begins with a number of chapters that are theoretical in nature whilst part two provides case studies that offer a more regional focus including analysis of the challenges facing contemporary navies and historical case studies designed to reveal the experience of small navies over time By adopting an approach that combines historical considerations with analysis of current events the collection offers a unique perspective on the role that small navies have played in wider nautical affairs and their continued impact upon global maritime strategies International Relations - Volume I Jarrod Wiener, Robert A . Asymmetric Killing Neil C. Renic, 2020-04-30 This book offers an engaging and historically informed account of the moral challenge of radically asymmetric violence warfare conducted by one party in the near complete absence of physical risk across the full scope of a conflict zone What role does physical risk and material threat play in the justifications for killing in war And crucially is there a point at which battlefield violence becomes so one directional as to undermine the moral basis for its use In order to answers these questions *Asymmetric Killing* delves into the morally contested terrain of the warrior ethos and Just War Tradition locating the historical and contemporary role of reciprocal risk within both This book also engages two historical episodes of battlefield asymmetry military sniping and manned aerial bombing Both modes of violence generated an imbalance of risk between opponents so profound as to call into question their permissibility These now resolved controversies will then be contrasted with the UAV exclusive violence of the United States robotic killing conducted in the absence of a significant military ground presence in conflict theatres such as Pakistan Yemen and Somalia As will be revealed the radical asymmetry of this latter case is distinct undermining reciprocal risk at the structural level of war Beyond its more resolvable tension with the warrior ethos UAV exclusive violence represents a fundamental challenge to the very coherence of the moral justifications for killing in war

generation of twentieth century America World War I with Hemingway World War II and Korea with Salter and Vietnam with O'Brien Each author also represents a different literary voice of the twentieth century from modern to mid century to postmodern and each presents a different battlefield experience Hemingway as noncombatant Salter as air force fighter pilot and O'Brien as army grunt War's pervasive influence on the individual means that for veterans turned writers like Hemingway Salter and O'Brien the war experience infiltrates their entire body of writing their works can be seen not only as war literature but also as veterans literature As such their entire postwar oeuvre regardless of whether an individual work explicitly addresses the war or the military is open to Vernon's exploration of war society gender and literary history Vernon's own experiences as a soldier a veteran a writer and a critic inform this enlightening critique of American literature offering students and scholars of American literature and war studies an invaluable tool for understanding war's effects on the veteran writer and his society

Rethinking the Nature of War Isabelle Duyvesteyn, Jan Angstrom, 2005 Have globalization virulent ethnic differences and globally operating insurgents fundamentally changed the nature of war in the last decade Interpretations of war as driven by politics and state rationale formulated most importantly by the 19th century practitioner Carl von Clausewitz have received strong criticism Political explanations have been said to fall short in explaining conflicts in the Balkans Africa Asia and the attacks of 11 September 2001 in the United States This book re evaluates these criticisms not only by scrutinising Clausewitz's arguments and their applicability but also by a careful reading of the criticism itself In doing so it presents empirical evidence on the basis of several case studies addressing various aspects of modern war such as the actors conduct and purposes of war
