Postmodern Urban Condition:

The Postmodern Urban Condition Michael J. Dear, 2000 **The Urban Condition** Ghent Urban Studies Team, 1999

What does the Western city at the end of the twentieth century look like How did the modern metropolis of congestion and density turn into a posturban or even postsuburban cityscape What are edge cities and technoburbs How has the social composition of cities changed in the postwar era What do gated communities tell us about social fragmentation Is public space in the contemporary city being privatized and militarized How can the urban self still be defined What role does consumer aestheticism have to play in this These and many more questions are addressed by this uniquely conceived multidisciplinary study The Urban Condition seeks to interfere in current debates over the future and interpretation of our urban landscapes by reuniting studies of the city as a physical and material phenomenon and as a cultural and mental artefact The Ghent Urban Studies Team responsible for the writing and editing of this volume is directed by Kristiaan Versluys and Dirk De Meyer at the University of Ghent Belgium It is an interdisciplinary research team of young academics that further consists of Kristiaan Borret Bart Eeckhout Steven Jacobs and Bart Keunen The collective expertise of GUST ranges from architectural theory urban planning and art history to philosophy literary criticism and cultural theory *The Virtual City* Anthony McIndoe, 2003 Urban Geography David Kaplan, Steven Holloway, 2024-07-18 Provides a comprehensive and up to date treatment of Urban Geography The leading undergraduate textbook on the subject Urban Geography covers the origins historical development and contemporary challenges of cities and metropolitan areas around the world Incorporating the most recent research in urban studies authors David H Kaplan and Steven R Holloway provide an overview of the dynamic field introduce key elements of urban theory and methodology analyze issues of immigration ethnicity and urbanism and more Exploring the urban experience in a global context 16 student friendly chapters address urbanization processes industrial urbanization discrimination in the housing market gentrification metropolitan governance urban planning geographical and political fragmentation urban immigration urban economic restructuring and more Each chapter includes an introductory road map learning objectives definitions of key terms discussion questions and suggestions for research topics and activities The fourth edition of Urban Geography contains two entirely new chapters on urban transportation and the relationship between cities and the environment including climate change and natural disasters New discussion of the impact of COVID 19 and other health aspects of cities is accompanied by new data new figures new themes and new pedagogical tools In this edition the authors present traditional models of urban social space and new factors that organize intra urban space such as globalization and postmodernism Examining cities in the developed world and in less developed regions Urban Geography Fourth Edition is the ideal textbook for Urban Geography classes and related courses in Urban Studies Sociology and Political Science programs **The Form of Cities** Alexander R. Cuthbert, 2008-04-15 The Form of Cities offers readers a considered theoretical introduction to the art of designing cities Demonstrates that cities are replete

with symbolic values collective memory association and conflict Proposes a new theoretical understanding of urban design based in political economy Demonstrates different ways of conceptualising the city whether through aesthetics or the prism of gender for example Written in an engaging and jargon free style but retains a sophisticated interpretative edge Complements *Designing Cities* by the same author Blackwell 2003 Critical Urban Theory, Common Property, and "the Political" Dan Webb, 2017-05-18 Dan Webb explores an undervalued topic in the formal discipline of Political Theory and political science more broadly the urban as a level of political analysis and political struggles in urban space Because the city and urban space is so prominent in other critical disciplines most notably geography and sociology a driving question of the book is what kind of distinct contribution can political theory make to the already existing critical urban literature The answer is to be found in what Webb calls the properly political approach to understanding political conflict as developed in the work of thinkers like Chantal Mouffe Jodi Dean and Slavoj Žižek This properly political analysis is contrasted with and a curative to the predominant ethical or post political understanding of the urban found in so much of the geographical and sociological critical urban theory literature In order to illustrate this primary theoretical argument of the book Webb suggests that common property is the most useful category for conceiving the city as a site of the properly political When the city and urban space are framed within this theoretical framework critical urbanists are provided a powerful tool for understanding urban political struggles in particular anti gentrification movements in the inner city Urban Geography in America, 1950-2000 Brian J.L. Berry, James Wheeler, 2014-05-01 *Urban Geography in America* offers a comprehensive historiography of this major field Compiling the best essays from the flagship journal *Urban Geography* it shows the evolution of the field from the 1950s to 2000 as it shifted from data driven social science modeling in the 1960s to the more critical perspectives of the 1970s to postmodernism in the 1980s to feminism and globalization in the 1990s It covers all the major trends and figures and features some of the most important names in the field Ultimately this will be a necessary reference for all scholars in the field and all graduate students taking introductory courses and preparing for their comprehensive exams *Urban Geography* Tim Hall, Heather Barrett, 2018-01-03 This revised fifth edition not only examines the new geographical patterns forming within and between cities but also investigates the way geographers have sought to make sense of this urban transformation It is structured into three sections contexts themes and issues that move students from a foundation in urban geography through its major themes to contemporary and pressing issues The text critically synthesizes key literatures in the following areas the urban world changing approaches to urban geography urban form and structure economy and the city urban politics planning regeneration and urban policy cities and culture architecture and urban landscapes images of the city experiencing the city housing and residential segregation transport and mobility in cities sustainability and the city This edition builds on the success of the comprehensively revised fourth edition and provides revised chapters on transport mobility and urban futures with additional updating of readings and some case studies The

book synthesises a wide range of literature on each subject and presents the material in a lively engaging way supported by an expanded range of student friendly features including exercises and suggestions for further study

Urban Geography Michael Pacione, 2009 This is the most comprehensive and readable book on urban geography in the array of contemporary literature on the subject

Henri Lefebvre and the Theory of the Production of Space Christian Schmid, 2022-11-29 Henri Lefebvres was the major theorist of space and of the urban This is the definitive book on Lefebvres Shortlisted for the Deutscher Memorial Prize 2023 This book presents an encompassing detailed and thorough overview and reconstruction of Lefebvres theory of space and of the urban Henri Lefebvre belongs to the generation of the great French intellectuals and philosophers together with his contemporaries Michel Foucault and Jean Paul Sartre His theory has experienced a remarkable revival over the last two decades and is discussed and applied today in many disciplines in humanities and social sciences particularly in urban studies geography urban sociology urban anthropology architecture and planning Lefebvre together with David Harvey is one of the leading and most read theoreticians in these fields This book explains in an accessible way the theoretical and epistemological context of this work in French philosophy and in the German dialectic Hegel Marx and Nietzsche and reconstructs in detail the historical development of its different elements It also gives an overview on the receptions of Lefebvre and discusses a wide range of applications of this theory in many research fields such as urban and regional development urbanization urbanity social space and everyday life

Urban Social Geography Paul Knox, Steven Pinch, 2014-09-15 The 6th edition of this highly

respected text builds upon the successful structure engaging writing style and clear presentation of previous editions Examining urban social geography from a theoretical and historical perspective it also explores how it has developed into the modern day Taking account of recent critical work whilst simultaneously presenting well established approaches to the subject it ensures students are well informed about all the issues The result is a topical book that is clear and accessible for students

Experience and Conflict: The Production of Urban Space Panu Lehtovuori, 2016-12-05 When designing planning and building urban spaces many contradictory and conflicting actors practices and agendas coexist This book propounds that at present this process is conducted in an artificial reality Concept City characterized by a simplified and outdated conception of space It provides a constructive critique of the concepts underlying the practices of planning and architecture and in order to facilitate more dynamic inclusive and subtle practices it formulates a new theory about space in general and public urban space in particular The central notions in this theory are temporality experiment and conflict which are grounded on empirical observations in Helsinki Manchester and Berlin While the book contextualizes Lefebvre's ideas on urban planning and architecture it is in no way limited to Lefebvorean discourse but allows insights to new theoretical work including that of Finnish and Swedish authors In doing so it suggests and develops exciting new approaches and tools leading to experiential urbanism

Urban Development Serafeim Polyzos, 2012-03-30 Cities are growing as never before and nowadays it is estimated that at least 50% of the world's population lives in urban areas This trend is expected to continue and simultaneously the problems in urban areas are anticipated to have an increase Urbanization constitutes a complex process involving problems with social economic environmental and spatial dimensions that need appropriate solutions This book highlights some of these problems and discusses possible solutions in terms of organisation planning and management The purpose of the book is to present selected chapters of great importance for understanding the urban development issues written by renowned authors in this scientific field All the chapters have been thoroughly reviewed and they cover some basic aspects concerning urban sustainability urban sprawl urban planning urban environment housing and land uses The editor gratefully acknowledges the assistance of Dr Marius Minea in reviewing two chapters

Urban Environmentalism Peter Brand, Michael Thomas, 2013-02 Looks at how environmental issues have shaped the development of cities examining the political social and economic factors at play on both an international and a local scale

Unsettled Urban Space Tihomir Viderman, Sabine Knierbein, Elina Kränzle, Sybille Frank, Nikolai Roskamm, Ed Wall, 2022-10-31 While urban life can be characterized by endeavors to settle stable and safe environments for many people urban space is rarely stable or safe it is uncertain troubled imbued with challenges and perpetually under pressure As the concept of unsettled appears to define the contemporary urban experience this multidisciplinary book investigates the conflicts and possibilities of settling and unsettling through open and speculative analysis The analytical prism of unsettled renders urban space an indeterminate ground unfolding through routines temporalities and contestations in constant tension between settling and

unsettling Such contrasting experiences are contingent on how urban societies confront undergo and overcome turbulence and difficulties in time and space Contributions drawing on theoretical reflections and empirical accounts from Argentina Austria Germany Greece Italy the Netherlands the UAE the UK the USA and Vietnam give insights into plural occurrences of the unsettled which might tie down or unleash transformative liberatory and emancipatory potentials This book is for students professionals and researchers interested in the uncertainties foundations disturbances inconsistencies residuals and blind fields which constitute the urban both as lived space and as social cultural and political ideal The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution 4.0

International license **The Urban Geography Reader** NICK FYFE, JUDITH KENNY, 2020-04-15 Drawing on a rich diversity of theoretical approaches and analytical strategies urban geographers have been at the forefront of understanding the global and local processes shaping cities and of making sense of the urban experiences of a wide variety of social groups Through their links with those working in the fields of urban policy design urban geographers have also played an important role in the analysis of the economic and social problems confronting cities Capturing the diversity of scholarship in the field of urban geography this reader presents a stimulating selection of articles and excerpts by leading figures Organized around seven themes it addresses the changing economic social cultural and technological conditions of contemporary urbanization and the range of personal and public responses It reflects the academic importance of urban geography in terms of both its theoretical and empirical analysis as well as its applied policy relevance and features extensive editorial input in the form of general section and individual extract introductions Bringing together in one volume classic and contemporary pieces of urban geography studies undertaken in the developed and developing worlds and examples of theoretical and applied research it provides in a convenient student friendly format an unparalleled resource for those studying the complex geographies of urban areas [International Handbook of Urban Policy: Contentious global issues](#) H. S. Geyer, 2007-01-01

This first Handbook in a series of three original reference works looks at globally contentious urban policy issues from a wide variety of different angles and perspectives Matters related to urban densification population mobility urban inequality and sustainability are analysed in a manner that will not only interest the advanced student but also the novice Urban policy covers a vast field This first volume combines chapters covering three broad themes policy issues pertaining to the spatial aspects of the city social and mobility issues and issues of urban governance The spotlight initially falls on urban structure urban densification the disappearing urban rural divide the urban economic landscape and the transformation of socialist economies The Handbook then goes on to focus on migration social mobility crime terrorism and social inequality Finally urban sustainability and urban governance come under the spotlight Integration of the planning process flexibilities in infrastructure and areas of neglect in environmental management feature strongly in this section of the Handbook Books of this nature are often slanted in one particular direction however this Handbook's approach is different Not only has the

editor avoided shying away from politically sensitive issues but contributions have also been included that reflect distinct differences of opinion on politically sensitive issues hence the volume's subtitle of contentious global issues As a Handbook the chapters have been written not only for the advanced student and academics but also with undergraduate students in mind The Handbook will appeal to scholars and researchers of geography and urban and development planning demography and social science and environmental scientists for the focus on urban sustainability issues

The City in American Cinema Johan Andersson, Lawrence Webb, 2019-06-27 How has American cinema engaged with the rapid transformation of cities and urban culture since the 1960s And what role have films and film industries played in shaping and mediating the postindustrial city This collection argues that cinema and cities have become increasingly intertwined in the era of neoliberalism urban branding and accelerated gentrification Examining a wide range of films from Hollywood blockbusters to indie cinema it considers the complex evolving relationship between moving image cultures and the spaces policies and politics of US cities from New York Los Angeles and Boston to Detroit Oakland and Baltimore The contributors address questions of narrative genre and style alongside the urban contexts of production exhibition and reception discussing films including *The Friends of Eddie Coyle* 1973 *Cruising* 1980 *Desperately Seeking Susan* 1985 *King of New York* 1990 *Inception* 2010 *Frances Ha* 2012 *Fruitvale Station* 2013 *Only Lovers Left Alive* 2013 and *Doctor Strange* 2016

Values in Cities James Lesh, 2022-09-23 Examining urban heritage in twentieth century Australia James Lesh reveals how evolving ideas of value and significance shaped cities and places Over decades a growing number of sites and areas were found to be valuable by communities and professionals Places perceived to have value were often conserved Places perceived to lack value became subject to modernisation redevelopment and renewal From the 1970s alongside strengthened activism and legislation with the innovative Burra Charter 1979 the values based model emerged for managing the aesthetic historic scientific and social significance of historic environments Values thus transitioned from an implicit to an overt component of urban architectural and planning conservation The field of conservation became a noted profession and discipline Conservation also had a broader role in celebrating the Australian nation and in reconciling settler colonialism for the twentieth century Integrating urban history and heritage studies this book provides the first longitudinal study of the twentieth century Australian heritage movement It advocates for innovative and reflexive modes of heritage practice responsive to urban social and environmental imperatives As the values based model continues to shape conservation worldwide this book is an essential reference for researchers students and practitioners concerned with the past and future of cities and heritage The Foreword and Chapter 1 Introduction of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
