Postsocial History An Introduction:

Postsocial History Miguel A. Cabrera, 2004-01-01 In *Postsocial History An Introduction* historian Miguel A. Cabrera points to the crisis of modernity as a locus for the collapse of social historical models. Previously established theories of social change and social relations are proving insufficient, calling for the emergence of a new social historical theory. By arguing convincingly for the inclusion of language in that model, Cabrera awakens a revolutionary new approach to historiography. The book will prove indispensable to historians and to social scientists in general who are dissatisfied with the old paradigms and seek new ways of addressing the challenges of social research.

A Genealogical History of Society Miguel A. Cabrera, 2017-10-27 This book provides a detailed reconstruction of the process of formation of the modern concept of society as an objective entity from the 1820s onwards, thus helping to better understand the shaping of the modern world and the nature of the current crisis of modernity. The concept has exerted considerable influence over the last two centuries during which time many people have conceived themselves and behave as members of a society and social scientists have explained human subjectivities and conducts as social effects. For both groups, society exists as a very real phenomenon. Historical inquiry shows, however, that the modern concept of society is no more than a historically contingent way of imagining and making sense of the human world.

The Oxford History of Historical Writing Daniel R. Woolf, Andrew Feldherr, Grant Hardy, 2011-05-05 A chronological scholarly survey of the history of historical writing in five volumes. Each volume covers a particular period of time from the beginning of writing to the present day and from all over the world.

The French Nobility in the Eighteenth Century Jay M. Smith, 2006-10-03 Historians have long been fascinated by the nobility in pre-Revolutionary France. What difference did nobles make in French society? What role did they play in the coming of the Revolution? In this book, a group of prominent French historians shows why the nobility remains a vital topic for understanding France's past. *The French Nobility in the Eighteenth Century* appears some thirty years after the publication of the most sweeping and influential revisionist assessment of the French nobility, Guy Chaussinand Nogaret's *La noblesse au dix-huitième siècle*. The contributors to this volume incorporate the important lessons of Chaussinand Nogaret's revisionism but also reexamine the assumptions on which that revisionism was based. At the same time, they consider what has been gained or lost through the adoption of new methods of inquiry in the intervening years. Where, in other words, should the nobility fit into the twenty-first century's narrative about eighteenth-century France? *The French Nobility in the Eighteenth Century* will interest not only specialists of the eighteenth century, the French Revolution, and modern European history but also those concerned with the differences in and the developing tensions between the methods of social and cultural history. In addition to the editor, the contributors are Rafe Blaufarb, Gail Bossenga, Mita Choudhury, Jonathan Dewald, Doina Pasca Harsanyi, Thomas E. Kaiser, Michael Kwass, Robert M. Schwartz, John Shovlin, and Johnson Kent Wright.

Brian Simon and the Struggle for Education Gary McCulloch,Antonio Fco Canales,Hsiao-Yuh Ku,2023-09-21 This is the first full length study of the life and career of Brian Simon 1915 2002 leading Marxist intellectual and historian of education in twentieth century Britain Using documentary sources that have only recently become publicly available it reveals the remarkably broad range of Simon s life as student soldier and school teacher Communist Party activist and educational academic campaigner and reformer In a sympathetic biography that yet retains critical distance the authors analyse Simon s contribution to Marxism and the CP explore the influence of both on his work as a historian of education and trace the significance of his Marxist beliefs political associations and historical approach to the cause of educational reform In so doing they consider the full nature and limitations of Simon s achievements in his struggle for education Unlike many Marxist scholars he remained loyal to the CP in the 1950s which damaged his reputation as a public intellectual Nevertheless his support for comprehensive education helped to promote egalitarian educational reforms in Britain although he was later unable to provide sufficient resistance to the 1988 Education Reform Act and to a decline in the position of the comprehensive schools In all this the significance of Simon s family and especially his relationship with his wife Joan is to the fore Joan and Brian forged a formidable 60 year partnership in politics and the CP as well as in life that lasted until Brian s death in January 2002

The End of Conceit Patrick Chabal,2012-08-23 In this radical new book Patrick Chabal reveals how the future of the West is now inextricably linked to that of the non West The rise of the economic power of China and other Asian countries as well as urgent environmental issues now force the West to think in new ways about how to best face the future This is an issue which runs far deeper than present debates on the decline of the West might suggest The book argues that the postcolonial challenge from regions such as Asia Africa Latin America and the Middle East as well as the influence of citizens of non Western origins now living in the West have combined to expose the limits of

Western rationality that is the theories and concepts we currently use to understand and act upon the world Discussing such provocative questions as Is it a good idea to build mosques in Europe and Is Beckham the new black icon Chabal explores the growing failure of Western social thought to explain many of our most pressing domestic social and economic issues He also discusses contentious issues in international relations such as the spread of democracy and the protection of human rights He concludes that ultimately what the West needs is not more and better theory but an entirely new way of thinking one that will put an end to its current deep seated conceit *New Directions in Social and Cultural History* Sasha Handley, Rohan McWilliam, Lucy Noakes, 2018-02-22 What does it mean to be a social and cultural historian today In the wake of the cultural turn and in an age of digital and public history what challenges and opportunities await historians in the early 21st century In this exciting new text leading historians reflect on key developments in their fields and argue for a range of new directions in social and cultural history Focusing on emerging areas of historical research such as the history of the emotions and environmental history *New Directions in Social and Cultural History* is an invaluable guide to the current and future state of the field The book is divided into three clear sections each with an editorial introduction and covering key thematic areas histories of the human the material world and challenges and provocations Each chapter in the collection provides an introduction to the key and recent developments in its specialist field with their authors then moving on to argue for what they see as particularly important shifts and interventions in the theory and methodology and suggest future developments *New Directions in Social and Cultural History* provides a comprehensive and insightful overview of this burgeoning field which will be important reading for all students and scholars of social and cultural history and historiography **Writing History** Stefan Berger, Heiko Feldner, Kevin Passmore, 2020-02-20 The third edition of *Writing History* provides students and teachers with a comprehensive overview of how the study of history is informed by a broader intellectual and analytical framework exploring the emergence and development of history as a discipline and the major theoretical developments that have informed historical writing Instead of focusing on theory this book offers succinct explanations of key concepts that illuminate the study of history and practical writing and demonstrates the ways they have informed practical work This fully revised new edition comprehensively rewrites and updates original chapters but also includes new features such as new chapters on postcolonial environmental and transnational history chapter introductions setting them within the context of historiography a new substantive introduction from the editors providing a useful road map for students an expanded glossary In its new incarnation *Writing History* is more than ever an invaluable introduction to the central debates that have shaped history **A Divided Republic** Emile Chabal, 2015-04-02 A bold interpretation of contemporary French political culture that uses current political debates to understand how the French engage with politics **Post-Western Sociology - From China to Europe** Laurence Roulleau-Berger, Li Peilin, 2018-05-15 This book is rooted in an epistemological approach to sociology in which the boundaries between Western and non Western sociologies are acknowledged and built on It argues

that knowledge is organised in conceptual spaces linked to paradigms and programmes which in turn are linked to ethnocentred knowledge processes that until recently Western approaches including Post Colonial French Social Science and American approaches have dominated non Western theories and that Western theories have sometimes seemed incapable of explaining phenomena produced in other societies It goes on to argue that the blurring of boundaries between Western and non Western sociologies is very important and that such a Post Western approach will mean co production and co construction of common knowledge the recognition of ignored or forgotten scientific cultures and a global change in sociology which imposes theoretical and methodological detours displacements reversals and conversions The book brings together a wide range of Western and Chinese sociologists who explore the consequences of this new approach in relation to many different issues and aspects of sociology

Mastery and Lost Illusions Wlodzimierz Borodziej, Stanislav Holubec, Joachim Puttkamer, 2014-10-15 This volume highlights the specific experiences and challenges of modernity in twentieth century Eastern and Central Europe Contributors ask how spatial and temporal conditions shaped the region s transformation from a rural to an urban industrialized society in this period and investigate the state s role in the mastery of space particularly in the context of state socialism The volume also sheds light on the ruralization of cities and mutual perceptions of the rural and urban populations in this region

Minor Knowledge and Microhistory Sigurdur Gylfi Magnússon, David Olafsson, 2016-10-04 This book studies everyday writing practices among ordinary people in a poor rural society in the 19th and early 20th centuries Using the abundance of handwritten material produced disseminated and consumed some centuries after the advent of print as its research material the book s focus is on its day to day usage and on

minor knowledge i.e. text matter originating and rooted primarily in the everyday life of the peasantry The focus is on the history of education and communication in a global perspective Rather than engaging in comparing different countries or regions the authors seek to view and study early modern and modern manuscript culture as a transnational or transregional practice giving agency to its ordinary participants and attention to hitherto overlooked source material Through a microhistorical lens the authors examine the strength of this aspect of popular culture and try to show it in a wider perspective as well as asking questions about the importance of this development for the continuity of the literary tradition The book is an attempt to explain the nature of the literary culture in general how new ideas were transported from one person to another from community to community and between regions essentially the role of minor knowledge in the development of modern men

The Workers' State Mark Pittaway, 2010-11-23 In 1956 Hungarian workers joined students on the streets to protest years of wage and benefit cuts enacted by the Communist regime Although quickly suppressed by Soviet forces the uprising led to changes in party leadership and conciliatory measures that would influence labor politics for the next thirty years In The Workers State Mark Pittaway presents a groundbreaking study of the complexities of the Hungarian working class its relationship to the Communist Party and its major political role during the foundational period of socialism 1944-1958 Through case studies of three industrial centers Ujpest Tata and Zala County Pittaway analyzes the dynamics of gender class generation skill level and rural versus urban location to reveal the embedded hierarchies within Hungarian labor He further demonstrates how industries themselves from oil and mining to armaments and textiles possessed their own unique labor subcultures From the outset the socialist state won favor with many workers as they had grown weary of the disparity and oppression of class systems under fascism By the early 1950s however a gap between the aspirations of labor and the goals of the state began to widen In the Stalinist drive toward industrialization stepped up production measures shortages of goods and housing wage and benefit cuts and suppression became widespread Many histories of this period have focused on Communist terror tactics and the brutal suppression of a pliant population In contrast Pittaway's social chronicle sheds new light on working class structures and the determination of labor to pursue its own interests and affect change in the face of oppression It also offers new understandings of the role of labor and the importance of local histories in Eastern Europe under communism

Empires of the Imagination Holger Hoock, 2010-07-09 Between the mid 18th and mid 19th centuries Britain evolved from a substantial international power yet relative artistic backwater into a global superpower and a leading cultural force in Europe In this original and wide ranging book Hoock illuminates the manifold ways in which the culture of power and the power of culture were interwoven in this period of dramatic change Britons invested artistic and imaginative effort to come to terms with the loss of the American colonies to sustain the generation long fight against Revolutionary and Napoleonic France and to assert and legitimate their growing empire in India Demonstrating how Britain fought international culture wars over prize antiquities from the Mediterranean and Near

East the book explores how Britons appropriated ancient cultures from the Mediterranean the Near East and India and casts a fresh eye on iconic objects such as the Rosetta Stone and the Parthenon Marbles

America's Forgotten Middle East Initiative Andrew Patrick, 2015-06-25 Sent to the Middle East by Woodrow Wilson to ascertain the viability of self determination in the disintegrating Ottoman Empire the King Crane Commission of 1919 was America's first foray into the region The commission's controversial recommendations included the rejection of the idea of a Jewish state in Syria US intervention in the Middle East and the end of French colonial aspirations The Commission's recommendations proved inflammatory even though its counsel on the question of the Palestinian mandate was eventually disregarded by Lloyd George and Georges Clemenceau in favour of their own national interests In the ensuing years the Commission's dismissal of claims by Zionist representatives like David Ben Gurion on their right to Palestine proved particularly divisive with some historians labeling it prophetic and accurate and others arguing that Commission members were biased and ill informed Here in the first book length analysis of the King Crane report in nearly 50 years Andrew Patrick chronicles the history of early US involvement in the region and challenges extant interpretations of the turbulent relationship between the United States and the Middle East
