Emerging Strategies in Early Childhood Education J. Wesley Little, Arthur J. Brigham, 1973.

Proceedings of the UPY-ICCCM International Conference on Education and Social Science (UPINCESS 2024) Ari Kusuma Wardana, 2024-12-29. This is an open access book. In recent decades, the world has witnessed various global crises that include climate change, pandemics, social inequality, economic instability, and conflict. These crises not only pose great challenges to governments and the private sector but also to the global community as a whole. This situation calls for a comprehensive and multidisciplinary approach to find sustainable solutions. Education plays a central role in equipping young people with the knowledge, skills, and values needed to address these global challenges. Through inclusive and quality education, individuals can be developed into innovative and responsible leaders ready to contribute to their society and environment. Education also plays an important role in raising awareness about global issues and promoting international cooperation. On the other hand, social sciences offer critical insights into the social, economic, and political dynamics underlying the global crisis. Research in the social sciences can uncover the root causes of inequality, conflict, and environmental degradation and identify effective interventions to address these problems. Social science also helps in understanding how public policies can be designed and implemented to support sustainable development and community well-being. With this background, the UPY-ICCCM International Conference on Education and Social Science (UPINCESS 2024) was held to bring together academics, researchers, practitioners, and policy makers from various countries to discuss, share knowledge, and collaborate in finding solutions to the global crises we face today. Thus, this conference is expected to make a real contribution in building a more just, prosperous, and sustainable world through education and social science.

New Education Policy, Sustainable Development and Nation Building Manish K. Verma, 2025-06-06. The book provides a comprehensive account of the linkages between education, sustainable development, and nation building from an interdisciplinary perspective. It examines various theories of education and sustainable development and critically explores the origin, evolution, and contours of education in India through the lens of the current policy debates around the Indian educational system. The book also investigates to what extent the New Educational Policy deliberations can be instrumental

for the nation's development as well as be an effective tool for devising sustainable solutions including the new challenges posed by climate change. An important blueprint of higher education policy and planning, the book will be indispensable for teachers, students, and researchers of education, public policy, educational studies, development studies, sustainable development, sociology, history, and political studies. It will also be of immense interest to policymakers, development practitioners, and NGOs.
